Cultural Transfer and Political Conflicts Andreas Kötzing,Caroline Moine,2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international

group of younger scholars, Cultural Transfer and Political Conflicts critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.

Common European Framework of Reference for Languages Council of Europe,2002 This Framework has been widely adopted in setting curriculum standards, designing courses, developing materials and in assessment and certification. This compendium of case studies is written by authors who have a considerable and varied experience of using the Framework in their professional context. The aim is to help readers develop their understanding of the Framework and its possible uses in different sectors of education.

Human Security in Disease and Disaster Natasha Lindstaedt,2021-09-19 This timely new textbook lays bare the ways in which disease and disaster can turn politicians into global leaders or national liabilities. It explains the impact of crises on development and human security and explores how states and societies can respond more effectively. Written primarily for the student of politics, but also drawing from public health, public policy, and environmental studies, the book investigates the threats posed by disease and disasters, and demonstrates how states can shape the ways in which these crises unfold. Case studies include: • Diseases such as Covid-19 and Ebola • Natural disasters such as Typhoon Haiyan and the 2010 Haiti earthquake • Manmade disasters such as the Yemen and Congo civil wars or famine The book delves deep into how state response to these challenges can impact political and economic stability and ends by exploring the role played by international institutions and international cooperation in addressing common challenges. This introductory textbook is perfect for undergraduate and masters courses exploring the expanding politics and human security issues surrounding disease and disasters. It will also be of interest to think tanks and policy communities looking for fresh insights to bring into professional practice.

Comparative and International Education C. C. Wolhuter,2019-08-26 This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

Resisting Postmodern Architecture Stylianos Giamarelos,2022-01-10 Since its first appearance in 1981, critical regionalism has enjoyed a celebrated worldwide reception. The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation. Today, its main principles (such as acknowledging the climate, history, materials, culture and topography of a specific place) are integrated in architects' education across the globe. But at the same time, the richer cross-cultural history of critical regionalism has been reduced to schematic juxtapositions of 'the global' with 'the local'. Retrieving both the globalising branches and the overlooked cross-cultural roots of critical regionalism, Resisting Postmodern Architecture resituates critical regionalism within the wider

framework of debates around postmodern architecture, the diverse contexts from which it emerged, and the cultural media complex that conditioned its reception. In so doing, it explores the intersection of three areas of growing historical and theoretical interest: postmodernism, critical regionalism and globalisation. Based on more than 50 interviews and previously unpublished archival material from six countries, the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship. In so doing, it shows how the 'periphery' was not just a passive recipient, but also an active generator of architectural theory and practice. Stylianos Giamarelos challenges long-held 'central' notions of supposedly 'international' discourses of the recent past, and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory, history and historiography.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland - all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

The Paradox of Choice Barry Schwartz,2009-10-13 Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In The Paradox of Choice,

Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to the profound challenges of balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

The Manly Eunuch Mathew Kuefler, 2001-07-25 The question of masculinity formed a key part of the intellectual life of late antiquity and was crucial to the development of Christian society. This idea is at the heart of Mathew Kuefler's new book, which revisits the Roman Empire during the third and fifth centuries of the common era. Kuefler argues that the collapse of the Roman army, an increasingly autocratic government, and growing restrictions on the traditional rights of men within marriage and sexuality all led to an endemic crisis in masculinity: men of Roman aristocracy, who had always felt themselves to be soldiers, statesmen, and the heads of households, became, by their own definition, unmanly. The cultural and demographic success of Christianity during this epoch lay in the ability of its leaders to recognize and respond to this crisis. Drawing on the tradition of gender ambiguity in early Christian teachings, which included Jesus's exhortation that his followers make themselves eunuchs for the sake of the kingdom of heaven, Christian writers and thinkers crafted a new masculine ideal, one that took advantage of the changing social realities in Rome, inverted the Roman model of manliness, and helped solidify Christian ideology by reinstating the masculinity of its adherents.

Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the

university track for young people in many countries.

Five Myths about Nuclear Weapons Ward Wilson,2013 Expanded from an article that created a stir in foreign policy circles, this book shows why five central arguments promoting nuclear weapons are, in essence, myths.

Nudge Richard H. Thaler,Cass R Sunstein,2012-10-04 The completely updated, final edition of the global bestseller - one of the most influential books of the 21st century 'Few books can be said to have changed the world, but Nudge did. The Final Edition is marvellous: funny, useful, and wise' Daniel Kahneman Nudge has transformed the way individuals, companies and governments look at the world - and in the process has become one of the most important books of the twenty-first century. This completely updated edition offers a wealth of new insights for fans and newcomers alike - about COVID-19, diet, personal finance, retirement savings, medical care, organ donation, and climate change. Every day we make decisions: about the things we buy or the meals we eat; about the investments we make and the time we spend; about our health and that of the planet. Unfortunately, we often choose badly. We are all susceptible to biases that can lead us to make bad decisions that make us poorer, less healthy and less happy. And, as Richard Thaler and Cass Sunstein show, no choice is ever presented to us in a neutral way. But by knowing how people think, we can make it easier for them to choose what is best for themselves, for their families and for society. With brilliant insight and wonderful levity, Thaler and Sunstein demonstrate how best to nudge us in the right directions, without ever restricting our freedom of choice.

Bordering on Britishness Andrew Canessa,2018-12-17 This volume explores how Gibraltarian Britishness was constructed over the course of the twentieth century. Today most Gibraltarians are fiercely proud of their Britishness, sometimes even describing themselves as 'more British than the British' and Gibraltar's Chief Minister in 2018 announced in a radio interview that "We see the world through British eyes." Yet well beyond the mid-twentieth century the inhabitants of the Rock were overwhelmingly Spanish speaking, had a high rate of intermarriage with Spaniards, and had strong class links and shared interests with their neighbours across the border. At the same time, Gibraltarians had a very clear secondary status with respect to UK British people. By the beginning of the twenty-first century, however, Gibraltarians speak more English than Spanish (with increasing English monolingualism), have full British citizenship and are no longer discriminated against based on their ethnicity; they see themselves as profoundly different culturally to Spanish people across the border. *Bordering on Britishness* explores and interrogates these changes and examines in depth the evolving relationship Gibraltarians have with Britishness. It also reflects on the profound changes Gibraltar is likely to experience because of Brexit when its border with Spain becomes an external EU border and the relative political strengths of Spain and the UK shift accordingly. If Gibraltarian Britishness has evolved in the past it is certain to evolve in the future and this volume raises

the question of how this might change if the UK's political and economic strength - especially with respect to Gibraltar - begins to wane.

The SAGE Handbook of Intercultural Competence Darla K. Deardorff, 2009-08-31 Containing chapters by some of the world's leading experts and scholars on the subject, this book provides a broad context for intercultural competence. Including the latest research on intercultural models and theories, it presents guidance on assessing intercultural competence through the exploration of key assessment principles.

Virtual Reality Melanie Chan, 2014-01-16 The idea of virtual realities has a long and complex historical trajectory, spanning from Plato's concept of the cave and the simulacrum, to artistic styles such as Trompe L'oeil, and more recently developments in 3D film, television and gaming. However, this book will pay particular attention to the time between the 1980s to the 1990s when virtual reality and cyberspace were represented, particularly in fiction, as a wondrous technology that enabled transcendence from the limitations of physical embodiment. The purpose of this critical historical analysis of representations of virtual reality is to examine how they might deny, repress or overlook embodied experience. Specifically, the author will contend that embodiment is a fundamental aspect of immersion in virtual reality, rather than something which is to be transcended. In this way, the book aims to challenge distorted ideas about transcendence and productively contribute to debates about embodiment and technology.
