*Dark Sweat, White Gold* Devra Weber, 2023-04-28 In her incisive analysis of the shaping of California's agricultural work force, Devra Weber shows how the cultural background of Mexican and, later, Anglo-American workers, combined with the structure of capitalist cotton production and New Deal politics, forging a new form of labor relations. She pays particular attention to Mexican field workers and their organized struggles, including the famous strikes of 1933. Weber's perceptive examination of the relationships between economic structure, human agency, and the state, as well as her discussions of the crucial role of women in both Mexican and Anglo working-class life, make her book a valuable contribution to labor, agriculture, Chicano, Mexican, and California history. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1994. In her incisive analysis of the shaping of California's agricultural work force, Devra Weber shows how the cultural background of Mexican and, later, Anglo-American workers, combined with the structure of capitalist cotton production and New Deal politics

**Right Out of California** Kathryn S. Olmsted, 2010-05-11 “Olmsted finds in Depression-era California the crucible for strong-arm policies against farm workers that bolstered the conservative movement” (Kirkus Reviews). At a time when a resurgent immigrant labor movement is making urgent demands on twenty-first-century America—and when a new and virulent strain of right-wing anti-immigrant populism is roiling the political waters—Right Out of California is a fresh and profoundly relevant touchstone for anyone seeking to understand the roots of our current predicament. This major reassessment of modern conservatism reexamines the explosive labor disputes in the agricultural fields of Depression-era California, the cauldron that inspired a generation of artists and writers and that triggered the intervention of FDR's New Deal. Noted historian Kathryn S. Olmsted tells how this brief moment of upheaval terrified business leaders into rethinking their relationship to American politics—a narrative that pits a ruthless generation of growers against a passionate cast of reformers, writers, and revolutionaries. “Olmsted's vivid, accomplished narrative really belongs to the historiography of the left . . . As her strong research shows, race and gender prejudice informed, or deformed, almost the whole of American social and cultural life in the 1930s and was as common on the left as on the right.” —The New York Times Book Review “An accessible work that aids in contextualizing the rise of future conservative leaders such as Richard Nixon and Ronald Reagan.” —Publishers Weekly “A major reworking of the Republican right's origins, this is also a compelling read for anyone interested in California's outsize importance in America's recent past.” —Darren Dochuk, author of From Bible Belt to

Sunbelt

*Sport* Richard D. Mandell, 1999 Today's calendar is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

*The Tuft of Primroses, with Other Late Poems for The Recluse* William Wordsworth, 1986 For information about the Cornell Wordsworth series, please visit the series website at <http://CornellWordsworth.BookPub.net>

Encyclopedia of American Radio, 1920-1960 Luther F. Sies, 2000 This encyclopedic work comprehensively covers the performers and programming on American radio from its inception to its golden age. Extensively researched over the course of more than twenty years, this new work is the definitive source for scholars of communication, social and cultural history and the popular arts, as well as devoted fans of radio history. The encyclopedia includes entries for programs, announcers, orchestras, musicians, vocalists, comedians, vocal groups, readers, whistlers, musical saw soloists, ministers, sports commentators, reviewers (of books, plays and movies), celebrities, and other personnel broadcasting over American radio from the 1920s to the 1960s. Additional entries cover commercial radio, educational broadcasting, firsts in radio history, opera on radio, religious broadcasting, sports broadcasting, women in radio, border radio, children's programs, comedy on radio, crime shows and mysteries, daytime dramatic serials, and disk jockeys, among other topics.

British Sport: Local histories Richard William Cox, 2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

**Early British Swimming, 55 BC-AD 1719** Nicholas Orme, 1983 In 1857 Everard Digby published the first scientific treatise on swimming - and one of the first on any modern sport. Nicholas Orme rehabilitates Digby as a pioneer of the

history of sport. The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

**Security and Terror** Eli Jelly-Schapiro, 2018-05-11 When in 1492 Christopher Columbus set out for Asia but instead happened upon the Bahamas, Cuba, and Hispaniola, his error inaugurated a specifically colonial modernity. This is, *Security and Terror* contends, the colonial modernity within which we still live. And its enduring features are especially vivid in the current American century, a moment marked by a permanent War on Terror and pervasive capitalist dispossession. Resisting the assumption that September 11, 2001, constituted a historical rupture, Eli Jelly-Schapiro traces the political and philosophic genealogies of security and terror—from the settler-colonization of the New World to the wars in Afghanistan, Iraq, and beyond. A history of the present crisis, *Security and Terror* also examines how that history has been registered and reckoned with in significant works of contemporary fiction and theory—in novels by Teju Cole, Mohsin Hamid, Junot Díaz, and Roberto Bolaño, and in the critical interventions of Jean Baudrillard, Giorgio Agamben, Judith Butler, Michael Hardt and Antonio Negri, and others. In this richly interdisciplinary inquiry, Jelly-Schapiro reveals how the erasure of colonial pasts enables the perpetual reproduction of colonial culture.

**Brinch Hansen on Pascal Compilers** Per Brinch Hansen, 1985

XXXXX Xxxxx, Martin Howse, 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as *Endonomadology*, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software

is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.
