Human Security in Disease and Disaster Natasha Lindstaedt, 2021-09-19 This timely new textbook lays bare the ways in which disease and disaster can turn politicians into global leaders or national liabilities. It explains the impact of crises on development and human security and explores how states and societies can respond more effectively. Written primarily for the student of politics, but also drawing from public health, public policy, and environmental studies, the book investigates the threats posed by disease and disasters, and demonstrates how states can shape the ways in which these crises unfold. Case studies include: • Diseases such as Covid-19 and Ebola • Natural disasters such as Typhoon Haiyan and the 2010 Haiti earthquake • Manmade disasters such as the Yemen and Congo civil wars or famine The book delves deep into how state response to these challenges can impact political and economic stability and ends by exploring the role played by international institutions and international cooperation in addressing common challenges. This introductory textbook is perfect for undergraduate and masters courses exploring the expanding politics and human security issues surrounding disease and disasters. It will also be of interest to think tanks and policy communities looking for fresh insights to bring into professional practice.

Disrupting Higher Education Curriculum Michael Anthony Samuel, Rubby Dhunpath, Nyna Amin, 2017-05-10 Discomfort with the inappropriateness of university curricula has met with increasing calls for disruptive actions to revitalise higher education. This book, conceived to envision an alternative emancipatory curriculum, explores the historical, ideological, philosophical and theoretical domains of higher education curricula. The authors acknowledge that universities have been and continue to be complicit in perpetuating cognitive damage through symbolic violence associated with indifference to the pernicious effects of race categorisation, gender inequalities, poverty, rising unemployment and cultural hegemony, as they continue to frame curricula, cultures and practices. The book contemplates the project of undoing cognitive damage, offering glimpses to redesign curriculum in the 21st century. The contributors, international scholars, emergent and expert researchers, include different nationalities, orientations and positionalities, constituting an interdisciplinary ensemble which collectively provides a rich commentary on higher education curriculum as we know it and where we think it could be in the future. The edited volume is a catalytic tool for disrupting canonised rituals of practice in higher education. "It has been a while since a scholarly book, so authoritative in its claims and innovative in its concepts, threatens to shake up the curriculum field at its foundations. Rich in metaphor and meaning, the superbly written chapters challenge a field that once more became moribund as we settled (sic) far too comfortably into accepting handed-down frames and fictions about knowledge, authority, power and agency that imprint 'cognitive damage' on those forced to the margins of schools and universities. Disrupting Higher Education Curriculum demonstrates, however, that it is in fact from those margins of the education enterprise that academics, teachers and learners can see more clearly how patterns of thought and

action hold us back from placing and experiencing our African humanity at the centre of the curriculum.” – Jonathan Jansen, Rector and Vice Chancellor of the University of the Free State, South Africa

Ethno-Musicology Jaap Kunst, 2012-12-06 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethno-musicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was.

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 This book surveys the history of higher education—principally universities—in Africa. Its geographical coverage encompasses the entire continent, from Afro-Arab Islamic Africa in the north to the former apartheid South Africa in the south, and the historical time span ranges from the Egyptian civilization to the present. Since little has been written on this topic, particularly its historical component, the work fills an important gap in the literature. The book delineates the broad contours of the history of higher education in Africa in exceptional historical breadth, voluminously documenting its subject in the text, detailed footnotes, and lengthy appendices. Its methodological approach is that of critical historiography in which the location of the African continent in world history, prior to the advent of European colonization, is an important dimension. In addition, the book incorporates a historical survey of foreign assistance to the development of higher education in Africa in the post-independence era, with a substantive focus on the role of the World Bank. It has been written with the following readership

in mind: those pursuing courses or doing research in African studies, studies of the African Diaspora, and comparative/international education. It should also be of interest to those concerned with developing policies on African higher education inside and outside Africa, as well as those interested in African Islamic history, the development of higher education in medieval Europe, the contributions of African Americans to African higher education, and such controversial approaches to the reading of African history as Eurocentrism and Afrocentrism.

Sport Richard D. Mandell, 1999 Today's calendar is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

British Sport: Local histories Richard William Cox, 2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

The Healthy Body and Victorian Culture Bruce Haley,1978 Health obsessed the Victorians. The quest for health guided Victorian living habits, shaped educational goals, and sanctioned a mania for athletic sports. As both metaphor and ideal, it influenced psychology, religion, moral philosophy; it affected the writing of history as well as the criticism of literature. Here is a wide-ranging and ably written exploration of this fascinating aspect of Victorian ideas. Bruce Haley looks at developments in personal and public health, and at theories about the relation between medical and psychological disorders. He examines influential conceptions of the healthy man: Carlyle's healthy hero, Spencer's biologically perfect man, Newman's gentleman-Christian, Kingsley's muscular Christian. He describes the development of sports and physical training in nineteenth-century England and their importance in schools and universities. He traces the concept of healthy body and healthy mind in boy's fiction (such as *Torn Brown's School Days*), self-help literature, and the widely read novels of George Eliot, Wilkie Collins, George Meredith, and Charles Kingsley. All these strands of social history, literature, and philosophy are woven together into a seamless whole.
