Reducing Gun Violence in America Daniel W. Webster, Jon S. Vernick, 2013-01-28 The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

Structural Hearing Felix Salzer, Professor Felix Salzer, 1962-01-01 Written by a pupil of Heinrich Schenker, this outstanding work develops and extends Schenker's approach. More than 500 examples of music from the Middle Ages to the 20th century complement the detailed discussions and analyses.

Encyclopedia of Traditional British Rural Sports Tony Collins, John Martin, Wray Vamplew, 2005 Providing a social, economic and political study of field sports and those other activities and customs labelled as rural sports, from the earliest of times to the present day in all of the United Kingdom and Ireland. This book brings together several distinct types of traditional rural sports with particular emphasis on the social history and 'traditional' aspects. It contains several hundred entries focusing on individual sports and others providing analysis of key concepts, themes and terminologies. The Encyclopedia of Traditional British Rural Sports is an invaluable reference that provides students, scholars and sports enthusiasts with a focussed and authoritative source of information on the history and culture of rural sport in Britain.

Ethno-Musicology Jaap Kunst, 2012-12-06 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethno-musicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal

Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was.

A Mathematical Medley George Szpiro,2010 Describes in layman's terms mathematical problems that have recently been solved (or thought to have been solved), research that has been published in scientific journals, and mathematical observations about contemporary life. Anecdotal stories about the lives of mathematicians and stories about famous old problems are interspersed among other vignettes.

Sport Richard D. Mandell,1999 Today's calender is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

British Sport: Local histories Richard William Cox,2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

Early British Swimming, 55 BC-AD 1719 Nicholas Orme,1983 In 1857 Everard Digby published the first scientific treatise on swimming - and one of the first on any modern sport. Nicholas Orme rehabilitates Digby as a pioneer of the history of sport. The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

Numbers Rule George Szpiro,2020-11-03 The author takes the general reader on a tour of the mathematical puzzles and paradoxes inherent in voting systems, such as the Alabama Paradox, in which an increase in the number of seats in the Congress could actually lead to a reduced number of representatives for a state, and the Condorcet Paradox, which demonstrates that the winner of elections featuring more than two candidates does not necessarily reflect majority preferences. Szpiro takes a roughly chronological approach to the topic, traveling from ancient Greece to the present and, in

addition to offering explanations of the various mathematical conundrums of elections and voting, also offers biographical details on the mathematicians and other thinkers who thought about them, including Plato, Pliny the Younger, Pierre Simon Laplace, Thomas Jefferson, John von Neumann, and Kenneth Arrow.

Calculus 30 : a Curriculum Guide for the Secondary Level Burt Thiessen, Saskatchewan. Saskatchewan Science and Technology, Saskatchewan. Saskatchewan Learning, 2005

XXXXX Xxxxx, Martin Howse, 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this Hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on

the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of uclaf.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

The Healthy Body and Victorian Culture Bruce Haley, 1978 Health obsessed the Victorians. The quest for health guided Victorian living habits, shaped educational goals, and sanctioned a mania for athletic sports. As both metaphor and ideal, it influenced psychology, religion, moral philosophy; it affected the writing of history as well as the criticism of literature. Here is a wide-ranging and ably written exploration of this fascinating aspect of Victorian ideas. Bruce Haley looks at developments in personal and public health, and at theories about the relation between medical and psychological disorders. He examines influential conceptions of the healthy man: Carlyle's healthy hero, Spencer's biologically perfect man, Newman's gentleman-Christian, Kingsley's muscular Christian. He describes the development of sports and physical training in nineteenth-century England and their importance in schools and universities. He traces the concept of healthy body and healthy mind in boy's fiction (such as Tom Brown's School Days), self-help literature, and the widely read novels of George Eliot, Wilkie Collins, George Meredith, and Charles Kingsley. All these strands of social history, literature, and philosophy are woven together into a seamless whole.

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 Until recently, Eurocentrist history professors taught that it was the Europeans who brought higher education to the African continent. While the Europeans have indeed influenced African education in recent times, there is some vital information that most history books leave out: for centuries before the arrival of the Europeans, the vast and advanced native African civilizations already had sophisticated universities and other institutions of higher education to boast about. This book is an attempt to fill the chasm in today's literature regarding this topic. It will be of interest to those researching the accurate, non-Euro-biased history of Africa.
