Ethno-Musicology Jaap Kunst, 2012-12-06 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethno-musicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was.

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 This book surveys the history of higher education—principally universities—in Africa. Its geographical coverage encompasses the entire continent, from Afro-Arab Islamic Africa in the north to the former apartheid South Africa in the south, and the historical time span ranges from the Egyptian civilization to the present. Since little has been written on this topic, particularly its historical component, the work fills an important gap in the literature. The book delineates the broad contours of the history of higher education in Africa in exceptional historical breadth, voluminously documenting its subject in the text, detailed footnotes, and lengthy appendices. Its methodological approach is that of critical historiography in which the location of the African continent in world history, prior to the advent of European colonization, is an important dimension. In addition, the book incorporates a historical survey of foreign assistance to the development of higher education in Africa in the post-independence era, with a substantive focus on the role of the World Bank. It has been written with the following readership in mind: those pursuing courses or doing research in African studies, studies of the African Diaspora, and comparative/international education. It should also be of interest to those concerned with developing policies on African higher education inside and outside Africa, as well as those interested in African Islamic history, the development of higher education in medieval Europe, the contributions of African Americans to African higher education, and such controversial approaches to the reading of African history as Eurocentrism and Afrocentrism.

Sport Richard D. Mandell, 1999 Today's calendar is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive

serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

British Sport: Local histories Richard William Cox, 2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

Extensively researched over the course of more than twenty years, this new work is the definitive source for scholars of communication, social and cultural history and the popular arts, as well as devoted fans of radio history. The encyclopedia includes entries for programs, announcers, orchestras, musicians, vocalists, comedians, vocal groups, readers, whistlers, musical saw soloists, ministers, sports commentators, reviewers (of books, plays and movies), celebrities, and other personnel broadcasting over American radio from the 1920s to the 1960s. Additional entries cover commercial radio, educational broadcasting, firsts in radio history, opera on radio, religious broadcasting, sports broadcasting, women in radio, border radio, children's programs, comedy on radio, crime shows and mysteries, daytime dramatic serials, and disk jockeys, among other topics.

Early British Swimming, 55 BC-AD 1719 Nicholas Orme, 1983 In 1857 Everard Digby published the first scientific treatise on swimming - and one of the first on any modern sport. Nicholas Orme rehabilitates Digby as a pioneer of the history of sport. The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

The Healthy Body and Victorian Culture Bruce Haley, 1978 Health obsessed the Victorians. The quest for health guided Victorian living habits, shaped educational goals, and sanctioned a mania for athletic sports. As both metaphor and ideal, it influenced psychology, religion, moral philosophy; it affected the writing of history as well as the criticism of literature. Here is a wide-ranging and ably written exploration of this fascinating aspect of Victorian ideas. Bruce Haley looks

at developments in personal and public health, and at theories about the relation between medical and psychological disorders. He examines influential conceptions of the healthy man: Carlyle's healthy hero, Spencer's biologically perfect man, Newman's gentleman-Christian, Kingsley's muscular Christian. He describes the development of sports and physical training in nineteenth-century England and their importance in schools and universities. He traces the concept of healthy body and healthy mind in boy's fiction (such as *Torn Brown's School Days*), self-help literature, and the widely read novels of George Eliot, Wilkie Collins, George Meredith, and Charles Kingsley. All these strands of social history, literature, and philosophy are woven together into a seamless whole.

The Water Goddess in Igbo Cosmology Sabine Jell-Bahlsen, 2008 This evocative study of a water Goddess among the Igbo of Lake Oguta in southeastern Nigeria, thoroughly explores the rituals, beliefs and social organization associated with rituals of women's power ... the analysis of this powerful Goddess, based on many years of research, is a notable contribution to African female ritual studies, long neglected by scholars.--Publisher's website.
