*AU-18 Space Primer* Air Command Staff College, 2012-08-01 The US National Space Policy released by the president in 2006 states that the US government should develop space professionals. As an integral part of that endeavor, AU-18, Space Primer, provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not space aware-unacquainted with space capabilities, organizations, and operations-and for those who are space aware, especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 Jointspacemindedness and Operational Space research seminars, as well as select members of the academic year 2009 Advanced Space research seminar. **Cultural Transfer and Political Conflicts** Andreas Kötzing, Caroline Moine, 2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international group of younger scholars, Cultural Transfer and Political Conflicts critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.

The Managerial Imperative and the Practice of Leadership in Schools Larry Cuban, 1988-01-15 With this significant new work, Larry Cuban provides a unique and insightful perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes

the enduring structural relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban analyzes the dominant images (moral and technical), roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked over the last century. He concludes that when these powerful images and roles are wedded to the structural conditions in which schooling occurs, managerial behavior results, thus narrowing the potential for more thoughtful, effective, and appropriate leadership. Cuban then turns to consider this situation with respect to the contemporary movement for school reform, identifying significant concerns both for policymakers and practitioners. This honest, thought-provoking book by a leading scholar, writer, and practitioner in the field represents an invaluable resource—an insightful introduction for those just entering the field and a fresh, new perspective for those long-familiar with its complexities. Cuban's ethnographic approach to the development of his own career and viewpoint, as well as his highly readable style, make this a work of lasting value.

**Gauged Brickwork** Gerard Lynch, 2018-10-03 Gauged brickwork is a term used to describe the superior finish required in the details of an important brickwork elevation, such as moulded reveals, arches, string courses and other forms of

ornamentation. This is achieved through shaping the individual bricks to produce a high degree of regularity, accurate dimensions and extreme fineness in the joints. This practical handbook combines simple diagrams and photographs to describe each stage of the process, from rubbing, cutting and shaping the bricks to laying and carving them. It emphasizes the importance of this skill in repairing and repointing rubbed and gauged brickwork and the damage that can be done by those unskilled in the craft. The second edition of this standard reference work has been substantially updated with new material, including additional photographs and illustrations to explain the various procedures and applications. It also now offers a fascinating and detailed historical perspective on the development of this important craft. The insights gleaned from this revised edition will be extremely valuable to architects and builders involved in conserving and repairing gauged brickwork, and also to those who are required to commission new decorative work to a high standard.

**Advanced Reporting** Miles Maguire, 2014-07-25 News gathering is a large, complicated and often messy task that has traditionally been viewed by journalists as irretrievably idiosyncratic, best learned through trial and error. Advanced Reporting takes the opposite approach, focusing on reporting as a process of triangulation based on three essential activities: analyzing documents, making observations and conducting interviews. In this readable book, veteran journalism professor Miles Maguire shows how the best reporters use these three tools in a way that allows them to cross-check and authenticate facts, to reduce or eliminate unsupportable allegations and to take readers and viewers to a deeper level of insight and understanding. This book will help to prepare students for a profession marked by increasing complexity and competition. To succeed in this environment, journalists must learn to make the most of digital media to intensify the impact of their work. At the same time, reporters must contend with a host of sophisticated public relations techniques while engaging with news audiences that no longer just consume journalism, but also collaborate in its creation. Discussion questions and exercises

help students put theory into practice.

Contemporary Management Gareth Jones, Jennifer George, Charles Hill, 2000

**The Anthology of Babel** Ed Simon, 2020-01-21 Why should there only be literary scholarship about authors who actually lived, and texts which exist? Where are the articles on Enoch Campion, Linus Withold, Redondo Panza, Darshan Singh, or Heidi B. Morton? That none of these are real authors should be no impediment to interpreting their invented writings. In the first collection of its kind, The Anthology of Babel publishes academic articles by scholars on authors, books, and movements that are completely invented. Blurring the lines between scholarship and creative writing, The Anthology of Babel inaugurates a completely new literary genre perfectly attuned to the era we live in, a project evocative of Jorge-Louis Borges, Umberto Eco, and Italo Calvino.

Offering a collection of essays written by an international range of established scholars, it discusses well-known film festivals in Europe, North America and Asia, but equally devotes attention to the diverse range of smaller and/or specialized events that take place around the globe. *The Realities and Futures of Work* David Peetz, 2019-09-27 What do we know about the current realities of work and its likely futures? What choices must we make and how will they affect those futures? Many books about the future of work start by talking about the latest technology, and focus on how technology is going to change the way we work. And there is no doubt that technology will have huge impacts. However, to really understand the direction in which work is going, and the impact that technology and other forces will have, we need to first understand where we are. This book covers topics ranging from the 'mega-drivers of change' at work, power, globalisation and financialisation, to management, workers, digitalisation, the gig economy, gender, climate change, regulation and deregulation. In doing this, it refers to some of the great works of science fiction. It demolishes several myths, such as that the employment relationship is doomed, that we are all heading to becoming 'freelancers' or 'gig workers' one day, that most jobs will be destroyed by technological change, that the growth in jobs will mainly be in STEM fields, that we will no longer value collectivism as we will all be 'individuals', or that the death of unionism is inevitable. The Realities and Futures of Work also rejects the idea of technological determinism—that whatever will be, will be, thanks to technological change—and so it refuses to accept that we simply need to prepare to adapt ourselves to the future by judicious training since there is nothing else we can do about it. Instead, this book provides a realistic basis for thinking about both the present and the future. It emphasises the choices we make, and the implications of those choices for the future of work.

**Space Capstone Publication Spacepower** Us Government United States Space Force, 2020-08-11 This book, Space Capstone Publication Spacepower: Doctrine for Space Forces, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that

govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.
