Law and Regulation of Air Cargo Ruwantissa Abeyratne, 2018-07-23 This book explores the legal and regulatory aspects of the complex air cargo sector, discussing in detail the general principles of the carriage of air cargo; artificial intelligence and air cargo; facilitation; carriage of hazardous goods; human remains; and animals, as well as cargo security; price fixing and anti competitive conduct in air cargo operations; liability issues; the air cargo supply chain and contract of carriage. It also discusses related achievements of the International Civil Aviation Organization; the International Air Transport Association and Airports Council International. The value of goods carried by airlines represents 7.4% of the global Gross Domestic Product. While cargo carried by air accounts for less than 1% of global cargo carriage, airlines carry 35% of the value of world trade, making this industry highly valuable and efficient, and the most reliable way to transport goods throughout the world. On average, airlines transport 52 million metric tons of goods per annum, worth an equivalent of \$6.8 trillion, i.e. \$18.6 billion worth of goods daily.

Extreme Programming Explained Kent Beck, Cynthia Andres, 2004-11-17 Accountability. Transparency. Responsibility. These are not words that are often applied to software development. In this completely revised introduction to Extreme Programming (XP), Kent Beck describes how to improve your software development by integrating these highly desirable concepts into your daily development process. The first edition of *Extreme Programming Explained* is a classic. It won awards for its then-radical ideas for improving small-team development, such as having developers write automated tests for their own code and having the whole team plan weekly. Much has changed in five years. This completely rewritten second edition expands the scope of XP to teams of any size by suggesting a program of continuous improvement based on: Five core values consistent with excellence in software development Eleven principles for putting those values into action Thirteen primary and eleven corollary practices to help you push development past its current business and technical limitations Whether you have a small team that is already closely aligned with your customers or a large team in a gigantic or

multinational organization, you will find in these pages a wealth of ideas to challenge, inspire, and encourage you and your team members to substantially improve your software development. You will discover how to: Involve the whole team-XP style Increase technical collaboration through pair programming and continuous integration Reduce defects through developer testing Align business and technical decisions through weekly and quarterly planning Improve teamwork by setting up an informative, shared workspace You will also find many other concrete ideas for improvement, all based on a philosophy that emphasizes simultaneously increasing the humanity and effectiveness of software development. Every team can improve. Every team can begin improving today. Improvement is possible-beyond what we can currently imagine. Extreme Programming Explained, Second Edition, offers ideas to fuel your improvement for years to come.

Dirty Assets Colin King, Clive Walker, 2016-05-23 Adopting a multi-disciplinary and comparative approach, this book focuses on the emerging and innovative aspects of attempts to target the accumulated assets of those engaged in criminal and terrorist activity, organized crime and corruption. It examines the 'follow-the-money' approach and explores the nature of criminal, civil and regulatory responses used to attack the financial assets of those engaged in financial crime in order to deter and disrupt future criminal activity as well as terrorism networks. With contributions from leading international academics and practitioners in the fields of law, economics, financial management, criminology, sociology and political science, the book explores law and practice in countries with significant problems and experiences, revealing new insights into these dilemmas. It also discusses the impact of the 'follow-the-money' approach on human rights while also assessing effectiveness. The book will appeal to academics and researchers of financial crime, organized crime and terrorism as well as practitioners in the police, prosecution, financial and taxation agencies, policy-makers and lawyers.

Encyclopedia of Traditional British Rural Sports Tony Collins, John Martin, Wray Vamplew, 2005 Providing a social, economic and political study of field sports and those other activities and customs labelled as rural sports, from the earliest of times to the present day in all of the United Kingdom and Ireland. This book brings together several distinct types of traditional rural sports with particular emphasis on the social history and 'traditional' aspects. It contains several hundred entries focusing on individual sports and others providing analysis of key concepts, themes and terminologies. The Encyclopedia of Traditional British Rural Sports is an invaluable reference that provides students, scholars and sports enthusiasts with a focussed and authoritative source of information on the history and culture of rural sport in Britain.

The Development of Transnational Policing John L. M. McDaniel, Karlie E. Stonard, David J. Cox, 2019-10-10 This book draws together the insights of eminent academics and specialists to present an overview of past and present approaches to transnational policing throughout the Anglophone world. It aims to revitalize the study of transnational policing by showing that past and present developments in this field remain poorly understood, while also suggesting future avenues of research. Containing chapters on police history, police accountability, gendered hate crime in an increasingly online world, counter-radicalisation strategies being pursued around the world, internet-facilitated sex trafficking and changes in organised crime, amongst others, the authors adopt revisionist, orthodox and progressive views in order to challenge our understanding and appreciation of developments in transnational policing. All of the chapters in the book use policing models employed within the UK as either their focal point or as a point of comparison so that direct comparisons and contrasts can be examined. The

Development of Transnational Policing illustrates distinctive and separate aspects of what remains an undoubtedly complex and dynamic field, but also forms an overview of developments and the dearth of academic research which surround them, in order hopefully to inspire researchers, policymakers and practitioners alike.

Talk Fiction Irene Kacandes, 2001-01-01 Everywhere you turn today, someone (or something) is talking to you?the television, the radio, cell phones, your computer. If you think some of the novels and stories you read are talking to you too, you're not alone, and you're not mistaken. In this innovative, multidisciplinary work, Irene Kacandes reads contemporary fiction as a form of conversation and as part of the larger conversation that is modern culture. ø Within a framework of talk as interaction, Kacandes considers texts that can be classified as statements, that is, texts that wholly or in part ask for their readers to react? to talk back?to them in certain ways. The works she addresses?from writers as varied as Harriet O. Wilson, Margaret Atwood, William Faulkner, Virginia Woolf, Graham Swift, G_ nter Grass, John Barth, Julio Cort³/₄zar, and Italo Calvino?conduct their interactions in certain modes to accomplish different sorts of cultural work: storytelling, testimony, apostrophe, and interactivity. By focusing on texts within these groupings, Kacandes is able to relate the different modes of talk fiction to extraliterary cultural developments in our oral age?and to show how such interactions, however contrary to the dominant twentieth-century view of literature as art for art's sake, help to keep literature alive and speaking to us.

Tourism Roy A.. Cook, Cathy H. C.. Hsu, Cathy J. Hsu, Joseph J.. Marqua, 2013-11-01 This title views the tourism industry from a business perspective - examining the management, marketing and finance issues most important to industry members. Chapters reveal an integrated model of tourism and address consumer behaviour, service quality and personal selling. Readings and integrative cases close each part and end-of-chapter exercises offer application activities for students.

Sol Plaatje's Native Life in South Africa Janet Remmington, Brian Willan, Bhekizizwe Peterson, 2016-10-01 Sheds new light on Native Life appearing at a critical historical juncture, and reflects on how to read it in South Africa's heightened challenges today. First published in 1916, Sol Plaatje's Native Life in South Africa was written by one of the South Africa's most talented early twentieth-century black leaders and journalists. Plaatje's pioneering book arose out of an early African National Congress campaign to protest against the discriminatory 1913 Natives Land Act. Native Life vividly narrates Plaatje's investigative journeying into South Africa's rural heartlands to report on the effects of the Act and his involvement in the deputation to the British imperial government. At the same time it tells the bigger story of the assault on black rights and opportunities in the newly consolidated Union of South Africa - and the resistance to it. Originally published in war-time London, but about South Africa and its place in the world, Native Life travelled far and wide, being distributed in the United States under the auspices of prominent African-American W E B Du Bois. South African editions were to follow only in the late apartheid period and beyond. The aim of this multi-authored volume is to shed new light on how and why Native Life

came into being at a critical historical juncture, and to reflect on how it can be read in relation to South Africa's heightened challenges today. Crucial areas that come under the spotlight in this collection include land, race, history, mobility, belonging, war, the press, law, literature, language, gender, politics, and the state.

Sport Richard D. Mandell,1999 Today's calendar is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

Transforming Provincial Politics Bryan M. Evans, Charles W Smith, 2015-03-27 Over the past thirty-five years, Canada's provinces and territories have undergone significant political changes. Abandoning mid-century Keynesian policies, governments of all political persuasions have turned to deregulation, tax reduction, and government downsizing as policy solutions for a wide range of social and economic issues. *Transforming Provincial Politics* is the first province-by-province analysis of politics and political economy in more than a decade, and the first to directly examine the turn to neoliberal policies at the provincial and territorial level. Featuring chapters written by experts in the politics of each province and territory, *Transforming Provincial Politics* examines how neoliberal policies have affected politics in each jurisdiction. A comprehensive and accessible analysis of the issues involved, this collection will be welcomed by scholars, instructors, and anyone interested in the state of provincial politics today.
