Interdisciplinary Design of Game-based Learning Platforms Fengfeng Ke, Valerie Shute, Kathleen M. Clark, Gordon Erlebacher, 2018-12-07 This book represents a four-year research and development project. It presents a phenomenological examination and explanation of a functional design framework for games in education. It furnishes a rich description of the experiences and perceptions of performing interdisciplinary collaborative design among experts of very diverse fields, such as learning systems design, architectural design, assessment design, mathematics education, and scientific computing.

Framework for Equitable Allocation of COVID-19 Vaccine National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Board on Health Sciences Policy, Committee on Equitable Allocation of Vaccine for the Novel Coronavirus, 2020-11-30 In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. Framework for Equitable Allocation of COVID-19 Vaccine offers an overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

Laboratory Life Bruno Latour, Steve Woolgar, 2013-04-04 This highly original work presents laboratory science in a deliberately skeptical way: as an anthropological approach to the culture of the scientist. Drawing on recent work in literary criticism, the authors study how the social world of the laboratory produces papers and other texts, and how the scientific vision of reality becomes that set of statements considered, for the time being, too expensive to change. The book is based on field work done by Bruno Latour in Roger Guillemin's laboratory at the Salk Institute and provides an important link between the sociology of modern sciences and laboratory studies in the history of science.

The Prime of Miss Jean Brodie Muriel Spark, 2015-08-06 'Muriel Spark's most celebrated novel . . . This ruthlessly and destructively romantic school ma'am is one of the giants of post-war fiction' Independent 'A brilliantly psychological fugue' Observer The Prime of Miss Jean Brodie is Muriel Spark's most significant and celebrated novel, and remains as dazzling as when it was first published in 1961. Miss Jean Brodie is a teacher unlike any other, proud and cultured, enigmatic and freethinking; a romantic, with progressive, sometimes shocking ideas and aspirations for the girls in her charge. At the Marcia Blaine Academy she takes a select group of girls under her wing. Spellbound by Miss Brodie's unconventional teaching, these devoted pupils form the Brodie set. But as the girls enter their teenage years and they become increasingly drawn in by Miss Brodie's personal life, her ambitions for them take a startling and dark turn with devastating consequences.

Orthogeriatrics Paolo Falaschi, 2021 This new open access edition supported by the Fragility Fracture Network aims at giving the widest possible dissemination on fragility fracture (especially hip fracture) management and notably in countries where this expertise is sorely needed. It has been extensively revised and updated by the experts of this network to provide a unique and reliable content in one single volume. Throughout the book, attention is given to the difficult question of how to provide best practice in countries where the discipline of geriatric medicine is not well established and resources for secondary prevention are scarce. The revised and updated chapters on the epidemiology of hip fractures, osteoporosis, sarcopenia, surgery, anaesthesia, medical management of frailty, peri-operative complications, rehabilitation and nursing are supplemented by six new chapters. These include an overview of the multidisciplinary approach to fragility fractures and new contributions on pre-hospital care, treatment in the emergency room, falls prevention, nutrition and systems for audit. The reader will have an exhaustive overview and will gain essential, practical knowledge on how best to manage fractures in elderly patients and how to develop clinical systems that do so reliably.

Education and Development in Colonial and Postcolonial Africa Damiano Matasci, Miguel Bandeira Jerónimo, Hugo Gonçalves Dorés, 2020-01-03 This open access edited volume offers an analysis of the entangled histories of education and development in twentieth-century Africa. It deals with the plurality of actors that competed and collaborated to formulate

educational and developmental paradigms and projects: debating their utility and purpose, pondering their necessity and risk, and evaluating their intended and unintended consequences in colonial and postcolonial moments. Since the late nineteenth century, the “educability” of the native was the subject of several debates and experiments: numerous voices, arguments, and agendas emerged, involving multiple institutions and experts, governmental and non-governmental, religious and laic, operating from the corridors of international organizations to the towns and rural villages of Africa. This plurality of expressions of political, social, cultural, and economic imagination of education and development is at the core of this collective work.

The Woodpecker Method 2 Axel Smith,2024-11 Swedish chess Grandmaster Axel Smith returns with a sequel to his colossal bestseller, *The Woodpecker Method*, which was on the tactics of the World Champions. For *The Woodpecker Method 2*, he has found 1002 foundational positional exercises and prepared them for 'woodpecking' - solve the puzzles repeatedly, and boost your positional intuition. The quick explanation of the Woodpecker Method is that you need to solve a large number of puzzles in a row; then solve the same puzzles again and again, only faster. It's not a lazy shortcut to success - hard work is required. But the reward can be re-programming your unconscious mind.

Clinical Pathways in Stroke Rehabilitation Thomas Platz,2021-01-14 This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.

Game-Based Learning Patrick Felicia,2014-06-26 This book is an invitation to delve into the world of Game-Based

Learning, to understand the many facets that make games a truly interesting and effective tool to teach and train in the 21st century. It includes nine chapters which were initially presented at the iGBL conference, a conference held throughout Ireland, where researchers, practitioners, students and other stakeholders meet and share their interest in games and education. These chapters touch on some very important topics, including games for health; formal education; poetry and games; science teaching through mobile games; relaxation with gaming devices; and accounting for disabilities with handheld devices. Together, these chapters illustrate the advancements in the field of Game-Based Learning, the challenges faced by developers and educators, as well as the opportunities that this medium can offer. Each chapter is written with practicality in mind in an effort to provide the reader with both a solid theoretical approach and background, coupled to some practical guidelines and suggestions that can be applied easily.

Introduction to Permanent Plug and Abandonment of Wells Mahmoud Khalifeh, Arild Saasen, 2020-01-27 This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Preventing Chemical Weapons Lijun Shang, Malcolm Dando, Michael Crowley, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications, notably in the development of chemical weapons. Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict, which could fuel a desire by certain States to retain and use existing chemical weapons, as well as increase State interest in creating new weapons; whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons. Stark

indications of the multi-faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria, and also in more targeted chemical assassination operations in Malaysia and the UK. Using a multi-disciplinary approach, and drawing upon an international group of experts, this book analyses current and likely near-future advances in relevant science and technology, assessing the risks of their misuse. The book examines the current capabilities, limitations and failures of the existing international arms control and disarmament architecture - notably the Chemical Weapons Convention - in preventing the development and use of chemical weapons. Through the employment of a novel Holistic Arms Control methodology, the authors also look beyond the bounds of such treaties, to explore the full range of international law, international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents, in order to develop recommendations for more effective routes to combat their proliferation and misuse. A particular emphasis is given to the roles that chemical and life scientists, health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons; and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all.
