*Holistic Engagement* Loretta Pyles,Gwendolyn Adam,2016 With stories from the classroom, this book invites and challenges social work, human services and counseling educators to seek meaning in their methods and content in the processes of teaching. Empirically grounded, the authors propose a new model for advancing pedagogy to draw from many ways of knowing and wisdom across traditions. Through rich analysis of globalization, higher education, and the social work profession, as well as first person accounts, they co-create a story of holistic pedagogies that are being employed across the globe.

**Police Reform from the Bottom Up** Monique Marks,David Sklansky,2014-04-10 What role can and should police unions and rank-and-file officers play in driving and shaping police reform? Police unions and their members are often viewed as obstructionist and conservative, not as change agents. But reform efforts are much more likely to succeed when they are supported by the rank-and-file, and line officers have knowledge, skills and insights that can be invaluable in promoting reform. Efforts to involve police unions and rank-and-file officers in police reform are less common than they should be, but they are increasing, and there is a good deal to learn about policing, police reform and participatory management from the efforts made to date. In this pioneering volume, an international, cross-disciplinary collection of scholars and police unionists address a range of neglected questions, both empirical and theoretical, about the place of police officers themselves in the process of reform - what it has been, and what it could be. They provide a fresh view of police reform as occurring from the bottom up rather than the top down. This book will be highly useful for practitioners and scholars who have a serious interest in the possibilities and limits of police organizational change. This book is based on special issues of *Police Practice and Research* and *Policing and Society*.

**Infrastructures for Peace in Sub-Saharan Africa** Mediel Hove,Geoff Harris,2019-06-14 Cultures of violence are

characteristic of many countries in sub-Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual. And yet, the wide variations in levels of violence within and between countries show that it is not inevitable; rather, it is the result of choices made at individual, community and societal levels. This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace. Peace infrastructures vary hugely in sophistication and level. The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations, peace committees which serve local communities, peace education and peace club programmes in schools, mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non-government efforts in peacemaking and peacebuilding. The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace. 1. It is the only book available which documents the experience and potential of nonviolence in post-independence sub-Saharan Africa. 2. It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable. 3. It explains how strategic planning can be utilised, both to bring about change and to institutionalise it.

Police Occupational Culture Megan O'Neill, Monique Marks, Anne-Marie Singh, 2007-07-30 Using studies from Australia, Britain, the United States, Africa and Canada, this book offers a contemporary look at police culture from an international perspective by questioning established silos in topics, by presenting new ways of thinking about police culture and suggesting forms that police culture is likely to take in the future.

Transforming the Robocops Monique Marks, 2005 The structure, uniform, equipment, and training of the South African Police Service have changed since apartheid, says Marks (sociology, U. of KwaZulu-Natal); the force proclaims a community-oriented service ethic, hires more women and black personnel in high positions, and is rarely rather than often excessively violent during demonstrations and protests. Still, she asks how much the police have changed, and whether it is really to change them, or indeed to change the police anywhere.

en mathématiques la cohomologie galoisienne est l'étude de l'action d'un groupe de galois sur certains groupes par des méthodes cohomologiques elle permet d'obtenir des résultats à la fois sur le groupe de galois agissant et sur le groupe sur lequel il agit en particulier le groupe de galois d'une extension de corps de nombres  $L/K$  agit naturellement par exemple sur le groupe multiplicatif  $L^\times$  mais aussi sur le groupe des unités de l'anneau des entiers du corps  $L$  ou sur

in mathematics galois cohomology is the study of the group cohomology of galois modules that is the application of homological algebra to modules for galois groups a galois group  $G$  associated to a field extension  $L/K$  acts in a natural way on some abelian groups for example those constructed directly from  $L$  but also through other galois representations that may be derived by more abstract means galois cohomology accounts for the way in which taking galois invariant elements fails
