**Reinforcement Learning, second edition** Richard S. Sutton,Andrew G. Barto,2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

**The Power of Change** National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Policy and Global Affairs, Board on Energy and Environmental Systems, Board on Science, Technology, and Economic Policy, Committee on Determinants of Market Adoption of Advanced Energy Efficiency and Clean Energy Technologies, 2016-09-30 Electricity, supplied reliably and affordably, is foundational to the U.S. economy and is utterly indispensable to modern society. However, emissions resulting from many forms of electricity generation create environmental risks that could have significant negative economic, security, and human health consequences. Large-scale installation of cleaner power generation has been generally hampered because greener technologies are more expensive than the technologies that currently produce most of our power. Rather than trade affordability and reliability for low emissions, is there a way to balance all three? *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* considers how to speed up innovations that would dramatically improve the performance and lower the cost of currently available technologies while also developing new advanced cleaner energy technologies. According to this report, there is an opportunity for the United States to continue to lead in the pursuit of increasingly clean, more efficient electricity through innovation in advanced technologies. *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* makes the case that America's advantages—world-class universities and national laboratories, a vibrant private sector, and innovative states, cities, and regions that are free to experiment with a variety of public policy approaches—position the United States to create and lead a new clean energy revolution. This study focuses on five paths to accelerate the market adoption of increasing clean energy and efficiency technologies: (1) expanding the portfolio of cleaner energy technology options; (2) leveraging the advantages of energy efficiency; (3) facilitating the development of increasing clean technologies, including renewables, nuclear, and cleaner fossil; (4) improving the existing technologies, systems, and infrastructure; and (5) leveling the playing field for cleaner energy technologies. *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* is a call for leadership to transform the United States energy sector in order to both mitigate the risks of greenhouse gas and other pollutants and to spur future economic growth. This study's focus on science, technology, and economic policy makes it a valuable resource to guide support that produces innovation to meet energy challenges now and for the future.

World History as the History of Foundations, 3000 BCE to 1500 CE Michael Borgolte, 2019-10-29 In *World History as the History of Foundations, 3000 BCE to 1500 CE*, Michael Borgolte investigates the origins and development of foundations

from Antiquity to the end of the Middle Ages. In his survey foundations emerge not as mere legal institutions, but rather as “total social phenomena” which touch upon manifold aspects, including politics, the economy, art and religion of the cultures in which they emerged. Cross-cultural in its approach and the result of decades of research, this work represents by far the most comprehensive account of the history of foundations that has hitherto been published.

Global Innovation Index 2017 Cornell University, INSEAD, World Intellectual Property Organization, 2017-06-15 The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year’s report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year’s theme from academic, business, and particular country perspectives from leading experts and decision makers.

**Lake Victoria** Joseph L. Awange, Obiero Ong'ang'a, 2006-08-18 This book constitutes a pioneering and unique work on Lake Victoria. It is the world’s second largest fresh-water lake and supports the livelihood of more than 30 million people. Surprisingly, there has been no comprehensive book addressing its problems and potentials. Ecology, environmental pollution and resource management are some of the issues addressed by this comprehensive insight into the limitations, challenges and opportunities facing Lake Victoria.

Annual Energy Review 2007 Bernan, 2008-07-31 Summarizes U.S. energy history 1949-2007 in tables and figures. Covers all major forms of energy (fossil fuels, nuclear, and renewable energy) and total energy by activity (e.g., production, consumption, trade, stocks, and prices). Also includes financial indicators related to energy; international energy; environmental indicators; and data unit conversions. Key long-term trends are graphically illustrated in special section called Energy Perspectives.

**Service Families Accomodation** Great Britain. National Audit Office, 2009 The Ministry of Defence (MOD) has over 50,000 properties across the United Kingdom, providing housing for around 42,000 Service personnel and their families. A survey has revealed that, while 52 per cent of Service families feel their accommodation is in a good condition, 31 per cent are dissatisfied with the condition of their property. The MOD is currently undertaking a programme to upgrade Service family accommodation. In the last two years it has upgraded some 1,700 properties and will continue upgrading an average of 800 per year. At the current rate of upgrade, it would take some 20 years before all properties reached condition 1 (the highest of four standards). Each year there are over 20,000 Service family moves. Families were satisfied with the move out process, but less satisfied when moving in to a new property, with complaints about the state of carpets, the general

condition, the standard of cleaning. Usually the accommodation is not seen before moving in, and personal family circumstances could be taken more into account when accommodation is allocated. The repairs service, run on a single contract in England and Wales, also came in for criticism from families. The MOD's provision of housing reflects better value for money than renting from the open market, but the current housing stock has been acquired over many years and in many cases is in the wrong location to meet demand. There is a shortage of properties for larger families. But the MOD also has 9,170 vacant properties. This is 18 per cent of its housing stock (against a target of 10 per cent), and vacant properties cost an average £4,200 each per year.

**The Cambridge Handbook of Immunities and International Law** Tom Ruys, Nicolas Angelet, Luca Ferro, 2019-04-30  
Few topics of international law speak to the imagination as much as international immunities. Questions pertaining to immunity from jurisdiction or execution under international law surface on a frequent basis before national courts, including at the highest levels of the judicial branch and before international courts or tribunals. Nevertheless, international immunity law is and remains a challenging field for practitioners and scholars alike. Challenges stem in part from the uncertainty pertaining to the customary content of some immunity regimes said to be in a 'state of flux', the divergent - and at times directly conflicting - approaches to immunity in different national and international jurisdictions, or the increasing intolerance towards impunity that has accompanied the advance of international criminal law and human rights law. Composed of thirty-four expertly written contributions, the present volume uniquely provides a comprehensive tour d'horizon of international immunity law, traversing a wealth of national and international practice.

Development of the Global Film Industry Qiao Li, Yanqiu Guan, Hong Lu, 2020-09-01  
The global film industry has witnessed significant transformations in the past few years. Regions outside the USA have begun to prosper while non-traditional production companies such as Netflix have assumed a larger market share and online movies adapted from literature have continued to gain in popularity. How have these trends shaped the global film industry? This book answers this question by analyzing an increasingly globalized business through a global lens. Development of the Global Film Industry examines the recent history and current state of the business in all parts of the world. While many existing studies focus on the internal workings of the industry, such as production, distribution and screening, this study takes a big picture view, encompassing the transnational integration of the cultural and entertainment industry as a whole, and pays more attention to the coordinated development of the film industry in the light of influence from literature, television, animation, games and other sectors. This volume is a critical reference for students, scholars and the public to help them understand the major trends facing the global film industry in today's world.
