Diagnosis and Treatment of Chronic Cough Sang Heon Cho, Woo-Jung Song, 2021-02-06 This book is a practical resource for clinicians who manage patients with chronic cough, which represents a major challenge in the clinic due to multiple diagnostic and therapeutic considerations. Essential assessments for cough and treatable traits are described, covering the upper and lower airways and the gastrointestinal tract, and appropriate treatments are identified according to the different findings and diagnoses. Based on recent mechanistic and clinical advances, the authors also discuss novel diagnostic and therapeutic options, including pharmacological and non-pharmacological approaches to control cough. Particular considerations of importance when dealing with chronic cough in children and the elderly are addressed separately. The book will be an invaluable guide and reference for all practitioners who require up-to-date information on how best to assess, diagnose, and treat patients with chronic cough.

Continuous Renal Replacement Therapy John A. Kellum, Rinaldo Bellomo, Claudio Ronco, 2016 Continuous Renal Replacement Therapy provides concise, evidence-based, bedside guidance for the management of critically ill patients with acute renal failure, offering quick reference answers to clinicians' questions about treatments and situations encountered in daily practice.

Issues and trends in education for sustainable development Leicht, Alexander, Heiss, Julia, Won Jung Byun, 2018-02-19 Education for Sustainable Development (ESD) is globally acknowledged as a powerful driver of change, empowering learners to make decisions and take actions needed to build a just and economically viable society respectful of both the environment and cultural diversity.

Systematic Reviews in Educational Research Olaf Zawacki-Richter, Michael Kerres, Svenja Bedenlier, Melissa Bond, Katja Buntins, 2019-11-21 In this open access edited volume, international researchers of the field describe and discuss the systematic review method in its application to research in education. Alongside fundamental methodical considerations,

reflections and practice examples are included and provide an introduction and overview on systematic reviews in education research.

Psychology of Learning for Instruction Marcy Driscoll, Kerry Burner, 2022-02 For courses in cognition and instruction. In-depth coverage of modern learning theories and their practical applications helps inform reflective instructional practice. Psychology of Learning for Instruction focuses on the implications and applications of learning theories to instruction. Using excellent examples ranging from primary school instruction to corporate training, this text combines the latest thinking and research to give students the opportunity to explore the individual theories as viewed by the experts. Students are encouraged to apply reflective practice, which is designed to foster a critical and reflective mode of thinking when considering any particular approach to learning and instruction. The 4th Edition has been substantially revised and reorganized. Four new/updated instructional application chapters illustrate what learning theory looks like in practice. Additionally, new/updated chapters cover new psychological and educational perspectives as they relate to: digital technology; development; prior knowledge; situativity; neuroscience; and developing a personal theory of learning and instruction. Extend learning beyond the classroom Pearson eText is an easy-to-use digital textbook. It lets students read, highlight, and take notes, all in one place. The mobile app lets students learn on the go, offline or online. Learn more about Pearson eText.

Reader, Come Home Maryanne Wolf, 2018-08-14 The author of the acclaimed *Proust and the Squid* follows up with a lively, ambitious, and deeply informative book that considers the future of the reading brain and our capacity for critical thinking, empathy, and reflection as we become increasingly dependent on digital technologies. A decade ago, Maryanne Wolf's *Proust and the Squid* revealed what we know about how the brain learns to read and how reading changes the way we think and feel. Since then, the ways we process written language have changed dramatically with many concerned about both their own changes and that of children. New research on the reading brain chronicles these changes in the brains of children and adults as they learn to read while immersed in a digitally dominated medium. Drawing deeply on this research, this book comprises a series of letters Wolf writes to us—her beloved readers—to describe her concerns and her hopes about what is happening to the reading brain as it unavoidably changes to adapt to digital mediums. Wolf raises difficult questions, including: Will children learn to incorporate the full range of deep reading processes that are at the core of the expert reading brain? Will the mix of a seemingly infinite set of distractions for children's attention and their quick access to immediate, voluminous information alter their ability to think for themselves? With information at their fingertips, will the next generation learn to build their own storehouse of knowledge, which could impede the ability to make analogies and draw inferences from what they know? Will all these influences change the formation in children and the use in adults of slower cognitive processes like critical thinking, personal reflection, imagination, and empathy that comprise deep reading

and that influence both how we think and how we live our lives? How can we preserve deep reading processes in future iterations of the reading brain? Concerns about attention span, critical reasoning, and over-reliance on technology are never just about children—Wolf herself has found that, though she is a reading expert, her ability to read deeply has been impacted as she has become increasingly dependent on screens. Wolf draws on neuroscience, literature, education, and philosophy and blends historical, literary, and scientific facts with down-to-earth examples and warm anecdotes to illuminate complex ideas that culminate in a proposal for a biliterate reading brain. Provocative and intriguing, *Reader, Come Home* is a roadmap that provides a cautionary but hopeful perspective on the impact of technology on our brains and our most essential intellectual capacities—and what this could mean for our future.

Adolescent Gambling Mark Griffiths, 1995 Mark Griffiths has carried out extensive research into why some adolescents get hooked on gambling, how they gamble and what can be done about it. In this book he provides an overview of adolescent gambling worldwide.

Framework for Equitable Allocation of COVID-19 Vaccine National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Board on Health Sciences Policy, Committee on Equitable Allocation of Vaccine for the Novel Coronavirus, 2020-11-30 In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. Framework for Equitable Allocation of COVID-19 Vaccine offers an overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

The State of the World's Children 2009 UNICEF., 2008 Having a child remains one of the biggest health risks for women worldwide. Fifteen hundred women die every day while giving birth. That's a half a million mothers every year. UNICEF's flagship publication, *The State of the World's Children 2009*, addresses maternal mortality, one of the most intractable

problems for development work. The difference in pregnancy risk between women in developing countries and their peers in the industrialised world is often termed the greatest health divide in the world. A woman in Niger has a one in seven chance of dying during the course of her lifetime from complications during pregnancy or delivery. That's in stark contrast to the risk for mothers in America, where it's one in 4,800 or in Ireland, where it's just one in 48,000. Addressing that gap is a multidisciplinary challenge, requiring an emphasis on education, human resources, community involvement and social equality. At a minimum, women must be guaranteed antenatal care, skilled birth attendants and emergency obstetrics, and postpartum care. These essential interventions will only be guaranteed within the context of improved education and the abolition of discrimination.

Improving Healthcare Quality in Europe Characteristics, Effectiveness and Implementation of Different Strategies OECD, World Health Organization, 2019-10-17 This volume, developed by the Observatory together with OECD, provides an overall conceptual framework for understanding and applying strategies aimed at improving quality of care. Crucially, it summarizes available evidence on different quality strategies and provides recommendations for their implementation. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

Impacts of Information Technology on Patient Care and Empowerment McHaney, Roger W., Reychev, Iris, Azuri, Joseph, McHaney, Mark E., Moshonov, Rami, 2019-09-20 Modern technology has impacted healthcare and interactions between patients and healthcare providers through a variety of means including the internet, social media, mobile devices, and the internet of things. These new technologies have empowered, frustrated, educated, and confused patients by making educational materials more widely available and allowing patients to monitor their own vital signs and self-diagnose. Further analysis of these and future technologies is needed in order to provide new approaches to empowerment, reduce mistakes, and improve overall healthcare. Impacts of Information Technology on Patient Care and Empowerment is a critical scholarly resource that delves into patient access to information and the effect that access has on their relationship with healthcare providers and their health outcomes. Featuring a range of topics such as gamification, mobile computing, and risk analysis, this book is ideal for healthcare practitioners, doctors, nurses, surgeons, hospital staff, medical administrators, patient advocates, researchers, academicians, policymakers, and healthcare students.

Future Directions for the Demography of Aging National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Population, 2018-07-21 Almost 25 years have passed since the *Demography of Aging* (1994) was published by the National Research Council. *Future Directions for the Demography of Aging* is, in many ways, the successor to that original volume. The Division of Behavioral and Social Research at the National Institute on Aging (NIA) asked the National Academies of Sciences, Engineering, and Medicine to produce an authoritative

guide to new directions in demography of aging. The papers published in this report were originally presented and discussed at a public workshop held in Washington, D.C., August 17-18, 2017. The workshop discussion made evident that major new advances had been made in the last two decades, but also that new trends and research directions have emerged that call for innovative conceptual, design, and measurement approaches. The report reviews these recent trends and also discusses future directions for research on a range of topics that are central to current research in the demography of aging. Looking back over the past two decades of demography of aging research shows remarkable advances in our understanding of the health and well-being of the older population. Equally exciting is that this report sets the stage for the next two decades of innovative research—a period of rapid growth in the older American population.

Family Communication Kathleen M. Galvin, Dawn O. Braithwaite, Paul Schrodtt, Carma L. Bylund, 2018-08-06 Family Communication: Cohesion and Change encourages students to think critically about family interaction patterns and to analyze them using a variety of communication theories. Using a framework of family functions, current research, and first-person narratives, this text emphasizes the diversity of today's families in structure, ethnic patterns, gender socialization, and developmental experiences. New for the tenth edition are expanded pedagogical features to improve learning and retention, as well as updates on current theory and research integrated throughout the chapters for timely analysis and discussion. Cases and research featured in each chapter provide examples of concepts and themes, and a companion website offers expanded resources for instructors and students. On the book's companion website, www.routledge.com/cw/galvin, instructors will find a full suite of online resources to help build their courses and engage their students, as well as an author video introducing the new edition: Course Materials Syllabi & Suggested Calendars Course Projects & Paper Examples Essay Assignments Test/Quiz Questions and Answer Keys Case Studies in Family Communication Family Communication Film and Television Examples Family Communication in Literature Examples Chapter Outlines Detailed Outlines Discussion Questions Case Study Questions Sample Chapter Activities Chapter PowerPoint Slides

Reinforcement Learning, second edition Richard S. Sutton, Andrew G. Barto, 2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this

part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Bio-Inspired Innovation and National Security National Defense University, 2010-10 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the emerging opportunities market of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called biologically inspired innovations, to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

Late Effects of Childhood Cancer Daniel Green, Hamish Wallace, 2003-12-26 The treatment of childhood cancer has become increasingly successful over the last forty years, and during the last two decades in particular, and the overall cure rate is now 60-70%. This, in turn, has introduced new issues for the clinician as the number of long-term survivors has increased. Some of the therapies that have contributed most to the improvement in survival are now known to have serious consequences for the patient in later life, and many survivors will be affected by physical, educational and psychological disability to a lesser or greater degree. This definitive reference brings together all aspects of long-term effects of treatment for cancer during childhood in a single comprehensive volume. International in perspective, the book is structured according to complication rather than original site of malignancy for ease of reference. Topics covered include problems in the neurological system and special senses of sight and sound, cardiovascular, respiratory, gastrointestinal, urological and musculoskeletal complications, effects on the endocrine system and, in particular, future fertility, and secondary cancers. The book also reviews in detail the important issues of quality of life, prevention initiatives and strategies for long-term follow up. Key point summaries are included throughout, and the references are annotated to guide the reader quickly to seminal primary papers and key review articles. With an accessible and consistent approach throughout, *Late Effects of Childhood Cancer* is an invaluable source of information and guidance for pediatric oncologists, who need to keep fully informed in

order to advise patients and their parents appropriately, and also for pediatric and adult endocrinologists, adult oncologists and other physicians to whom the patient with late effects may initially present.

Promoting Adolescent Health Thomas J. Coates, Anne C. Petersen, Cheryl Perry, 2013-10-22 Promoting Adolescent Health: A Dialog on Research and Practice is a collection of essays that discusses the insights provided by professionals into the problems of encouraging adolescent health. The book presents the open dialog between the views of pediatrics, cardiologists, psychologists, health educators, sociologists, and nutrition scientists. The text gives discussions from a variety of perspectives on each of six problem areas: smoking, drugs and alcohol, sexuality, coronary risk factors, health-risk eating behaviors, and chronic disease. It also discusses the factors influential in smoking onset and describes the examination of health education and health promotion, adolescent medicine, developmental psychology, education, and research methodology. The book will provide valuable insights for anthropologists, psychiatrists, sociologists, students, and researchers in the field of adolescent behaviors.
