Montgomery and Colossal Cracks Stephen Hart, 2000-05-30 A reinterpretation of the British Army's conduct in the crucial 1944-45 Northwest Europe campaign, this work examines systematically the Colossal Cracks operational technique employed by Montgomery's Anglo-Canadian 21st Army Group and demonstrates the key significance that morale and casualty concerns exerted on this technique. To ensure a full understanding of the campaign, one needs to look not only at Montgomery's methods but at those of his army commanders, Dempsey and Crerar; thus, this study addresses the scant attention to date paid to these two figures. Hart suggests that Montgomery and his two senior subordinates handled this formation more effectively than some scholars have suggested. In fact, Colossal Cracks, the concentration of massive force at a point of German weakness, represented the most appropriate weapon the 1944 British Army could develop under the circumstances. Previous studies have been characterized by an overemphasis on Montgomery's role in the campaign, rather than a systematic examination of overall British methods. They have ignored the difficulties that the 1944 British Army faced given its manpower shortage, and they have underestimated the appropriateness of Monty's methods to the campaign war aims that Britain pursued: namely, the desire that Britain's modest military forces secure a high profile within a larger Allied effort. The cautious, firepower-laden approach used by the 21st Army Group was both crude and a double-edged sword; however, despite these weaknesses, Colossal Cracks represented an appropriate technique given the nature of British war aims and the relative capabilities of the forces involved. It proved to be just enough to defeat the Germans and keep alive British hopes that her war aims might be achieved.

Ethno-Musicology Jaap Kunst, 2012-12-06 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethno-musicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self tuition in the matter here brought together. Regarding the possibility of a

new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was.

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 This book surveys the history of higher education—principally universities—in Africa. Its geographical coverage encompasses the entire continent, from Afro-Arab Islamic Africa in the north to the former apartheid South Africa in the south, and the historical time span ranges from the Egyptian civilization to the present. Since little has been written on this topic, particularly its historical component, the work fills an important gap in the literature. The book delineates the broad contours of the history of higher education in Africa in exceptional historical breadth, voluminously documenting its subject in the text, detailed footnotes, and lengthy appendices. Its methodological approach is that of critical historiography in which the location of the African continent in world history, prior to the advent of European colonization, is an important dimension. In addition, the book incorporates a historical survey of foreign assistance to the development of higher education in Africa in the post-independence era, with a substantive focus on the role of the World Bank. It has been written with the following readership in mind: those pursuing courses or doing research in African studies, studies of the African Diaspora, and comparative/international education. It should also be of interest to those concerned with developing policies on African higher education inside and outside Africa, as well as those interested in African Islamic history, the development of higher education in medieval Europe, the contributions of African Americans to African higher education, and such controversial approaches to the reading of African history as Eurocentrism and Afrocentrism.

Encyclopedia of Traditional British Rural Sports Tony Collins, John Martin, Wray Vamplew, 2005 Providing a social, economic and political study of field sports and those other activities and customs labelled as rural sports, from the earliest of times to the present day in all of the United Kingdom and Ireland. This book brings together several distinct types of traditional rural sports with particular emphasis on the social history and 'traditional' aspects. It contains several hundred entries focusing on individual sports and others providing analysis of key concepts, themes and terminologies. The Encyclopedia of Traditional British Rural Sports is an invaluable reference that provides students, scholars and sports enthusiasts with a focussed and authoritative source of information on the history and culture of rural sport in Britain.

Encyclopedia of American Radio, 1920-1960 Luther F. Sies, 2000 This encyclopedic work comprehensively covers the performers and programming on American radio from its inception to its golden age. Extensively researched over the course of more than twenty years, this new work is the definitive source for scholars of communication, social and cultural history and the popular arts, as well as devoted fans of radio history. The encyclopedia includes entries for programs, announcers, orchestras, musicians, vocalists, comedians, vocal groups, readers, whistlers, musical saw soloists, ministers, sports commentators, reviewers (of books, plays and movies), celebrities, and other personnel broadcasting over American radio from the 1920s to the 1960s. Additional entries cover commercial radio, educational broadcasting, firsts in radio history, opera on radio, religious broadcasting, sports broadcasting, women in radio, border radio, children's programs, comedy on radio, crime shows and mysteries, daytime dramatic serials, and disk jockeys, among other topics.

The Water Goddess in Igbo Cosmology Sabine Jell-Bahlsen, 2008 This evocative study of a water Goddess among the Igbo of Lake Oguta in southeastern Nigeria, thoroughly explores the rituals, beliefs and social organization associated with rituals of women's power ... the analysis of this powerful Goddess, based on many years of research, is a notable contribution to African female ritual studies, long neglected by scholars.--Publisher's website.

Science, Technology and Society Martin Bridgstock, 1998-03-28 Provides a comprehensive introduction to the human, social and economic aspects of science and technology. It is broad, interdisciplinary and international, with a focus on Australia. The authors present complex issues in an accessible and engaging form. Invaluable for both students and teachers.

XXXXX Xxxxx, Martin Howse, 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from

the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

Quarrying in Antiquity John Bryan Ward-Perkins,1972 A wide survey over four millennia is possible for quarrying tools and techniques because of their simplicity and long-lived traditions. The chief contribution of the Romans was their organisation of the stone trade by mass production, standardisation and long-distance transport. Indeed, in post-Roman Europe, especially in Britain, it was the excellence of Roman building stone which allowed so much subsequent 'quarrying' in the buildings themselves. One exception in Saxon times was the quarry for Bradford-on-Avon's church. With the 12th-century spurt in church building activity, however, natural stone quarries once more became common and distribution methods familiar to the Roman world re-emerged. - COPAC.
