XXXXX Xxxxx, Martin Howse, 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism

and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

Sport Richard D. Mandell, 1999 Today's calender is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's

Sport: A Cultural History shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

British Sport: Local histories Richard William Cox, 2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

Early British Swimming, 55 BC-AD 1719 Nicholas Orme, 1983 In 1857 Everard Digby published the first scientific treatise on swimming - and one of the first on any modern sport. Nicholas Orme rehabilitates Digby as a pioneer of the history of sport. The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

A Mathematical Medley George Szpiro, 2010 Describes in layman's terms mathematical problems that have recently been solved (or thought to have been solved), research that has been published in scientific journals, and mathematical observations about contemporary life. Anecdotal stories about the lives of mathematicians and stories about famous old problems are interspersed among other vignettes.

The Baseball Bibliography Myron J. Smith (Jr.), 2006 With over 57,000 entries, this two-volume set is the most comprehensive non-electronic, non-database, print bibliography on any American sport. Represented here are books and monographs, scholarly papers, government documents, doctoral dissertations, masters' theses, poetry and fiction, novels, pro team yearbooks, college and professional All-Star Game and World Series programs, commercially produced yearbooks, and periodical and journal articles--Provided by publisher.

The Healthy Body and Victorian Culture Bruce Haley, 1978 Health obsessed the Victorians. The quest for health guided Victorian living habits, shaped educational goals, and sanctioned a mania for athletic sports. As both metaphor and ideal, it influenced psychology, religion, moral philosophy; it affected the writing of history as well as the criticism of literature. Here is a wide-ranging and ably written exploration of this fascinating aspect of Victorian ideas. Bruce Haley looks at developments in personal and public health, and at theories about the relation between medical and psychological disorders. He examines influential conceptions of the healthy man: Carlyle's healthy hero, Spencer's biologically perfect man, Newman's gentleman-Christian, Kingsley's muscular Christian. He describes the development of sports and physical training

in nineteenth-century England and their importance in schools and universities. He traces the concept of healthy body and healthy mind in boy's fiction (such as Tom Brown's School Days), self-help literature, and the widely read novels of George Eliot, Wilkie Collins, George Meredith, and Charles Kingsley. All these strands of social history, literature, and philosophy are woven together into a seamless whole.

The Dreaming of the Bones W. B. Yeats,2011-01-01 William Butler Yeats was born near Dublin in 1865, and was encouraged from a young age to pursue a life in the arts. He attended art school for a short while, but soon found that his talents and interest lay in poetry rather than painting. As a writer in nearly every genre but the novel, he was an instrumental figure in the Irish Literary Revival of the 20th Century that redefined Irish writing. Yeats was awarded the Nobel Prize in Literature in 1923, and received honorary degrees from Queen's University (Belfast), Trinity College (Dublin), and the Universities of Oxford and Cambridge. The Dreaming of the Bones was first published in 1919 and performed in 1931, it was one of the plays that comprised Yeats' Four Plays for Dancers. Written in the Japanese Noh tradition, performed with masks, the play reflects on a belief that the dead may dream back.
