Structural Hearing Felix Salzer,Professor Felix Salzer,1962-01-01 Written by a pupil of Heinrich Schenker, this outstanding work develops and extends Schenker's approach. More than 500 examples of music from the Middle Ages to the 20th century complement the detailed discussions and analyses.

Ethno-Musicology Jaap Kunst,2012-12-06 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethno-musicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was.

Sport Richard D. Mandell,1999 Today's calender is set in the minds of many people by the World Series, Wimbledon, the Super Bowl, and the World Cup, rather than by months and days. Sport must mean something. What? Richard Mandell's *Sport: A Cultural History* shows that sport has always vividly illustrated and reinforced the existing social and moral order. Considering that much of modern sport has evolved in England and America, it is remarkable that so few comprehensive serious studies of sport have appeared in English. This fascinatingly written, generously illustrated volume fills a gap in the literature of world cultural history. The author deals here not only with sport in the classical world where the Olympics were born, but also with sport in early industrial England, China, Japan, and modern America.

Life and Art in Prehistoric Thera Spyridon Marinatos,1972

Quarrying in Antiquity John Bryan Ward-Perkins,1972 A wide survey over four millennia is possible for quarrying tools and techniques because of their simplicity and long-lived traditions. The chief contribution of the Romans was their organisation of the stone trade by mass production, standardisation and long-distance transport. Indeed, in post-Roman Europe, especially in Britain, it was the excellence of Roman building stone which allowed so much subsequent 'quarrying' in the buildings themselves. One exception in Saxon times was the quarry for Bradford-on-Avon's church. With the 12th-century spurt in church building activity, however, natural stone quarries once more became common and distribution methods familiar to the Roman world re-emerged. - COPAC.

British Sport: Local histories Richard William Cox,2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain. It lists all secondary source material including reference works, in a classified order to meet the needs of the sports historian.

Early British Swimming, 55 BC-AD 1719 Nicholas Orme,1983 In 1857 Everard Digby published the first scientific treatise on swimming - and one of the first on any modern sport. Nicholas Orme rehabilitates Digby as a pioneer of the history of sport. The book opens with a history of swimming in Britain from the Romans to the sixteenth century, which is followed by an account of Digby's life and work.

Later Roman Egypt Roger S. Bagnall,2003 Egypt, with its ever-growing wealth of evidence from the papyri, has in recent decades been one of the liveliest areas of scholarship on the later Roman Empire. This volume collects two dozen articles on the social, economic, and administrative history of Egypt by Roger Bagnall, whose book 'Egypt in Late Antiquity' has helped to bring this region and this evidence into the mainstream of historical debate. In these studies some of the main

themes of his work are visible, in particular attempts to explore the possibilities for quantifying not only questions like the burden of taxation or the distribution of land-ownership, but more tantalizing and controversial matters like the rate at which the population of Egypt was Christianized.

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat,2005-08-30 Until recently, Eurocentrist history professors taught that it was the Europeans who brought higher education to the African continent. While the Europeans have indeed influenced African education in recent times, there is some vital information that most history books leave out: for centuries before the arrival of the Europeans, the vast and advanced native African civilizations already had sophisticated universities and other institutions of higher education to boast about. This book is an attempt to fill the chasm in today's literature regarding this topic. It will be of interest to those researching the accurate, non-Euro-biased history of Africa.

The History of Islam in Africa Nehemia Levtzion,Randall Lee Pouwels,2000 The history of the Islamic faith in Africa spans 14 centuries. This book provides a detailed mapping of the cultural, political, geographic and religious past of Islam in a single volume. Intended as a reference and textbook, it does not assume prior knowledge of the subject.

The Healthy Body and Victorian Culture Bruce Haley,1978 Health obsessed the Victorians. The quest for health guided Victorian living habits, shaped educational goals, and sanctioned a mania for athletic sports. As both metaphor and ideal, it influenced psychology, religion, moral philosophy; it affected the writing of history as well as the criticism of literature. Here is a wide-ranging and ably written exploration of this fascinating aspect of Victorian ideas. Bruce Haley looks at developments in personal and public health, and at theories about the relation between medical and psychological disorders. He examines influential conceptions of the healthy man: Carlyle's healthy hero, Spencer's biologically perfect man, Newman's gentleman-Christian, Kingsley's muscular Christian. He describes the development of sports and physical training in nineteenth-century England and their importance in schools and universities. He traces the concept of healthy body and healthy mind in boy's fiction (such as Tom Brown's School Days), self-help literature, and the widely read novels of George Eliot, Wilkie Collins, George Meredith, and Charles Kingsley. All these strands of social history, literature, and philosophy are woven together into a seamless whole.

Islam in Africa James Kritzeck,John Spencer Trimmingham,1969

The Baseball Bibliography Myron J. Smith (Jr.),2006 With over 57,000 entries, this two-volume set is the most comprehensive non-electronic, non-database, print bibliography on any American sport. Represented here are books and monographs, scholarly papers, government documents, doctoral dissertations, masters' theses, poetry and fiction, novels, pro team yearbooks, college and professional All-Star Game and World Series programs, commercially produced yearbooks, and periodical and journal articles--Provided by publisher.
