Energizing America Varun Sivaram, Colin Cunliff, David Hart, Julio Friedmann, David Sandalow, 2020-09-14 Clean energy innovation is central to the fight against climate change. To rise to this challenge, the United States should launch a National Energy Innovation Mission. Led by the president and authorized by Congress, this mission should harness the nation's unmatched innovative capabilities-at research universities, federal laboratories, and private firms (both large and small), in all regions of the country-to speed the progress of clean energy technologies. To jumpstart this mission and unlock a virtuous cycle of public and private investment, the US federal government should triple its funding for energy research, development, and demonstration (RD&D) over the next five years to \$25 billion by 2025. *Energizing America* offers policymakers a strategic framework to build a growing RD&D portfolio over the next five years, detailed funding proposals across the full spectrum of critical energy technologies, and recommendations for immediate action.

Implementing the Water-Energy-Food- Ecosystems Nexus and Achieving the Sustainable Development Goals Cesar Carmona-Moreno, E. Crestaz, Y. Cimmarrusti, F. Farinosi, M. Biedler, A. Amani, A. Mishra, A. Carmona-Gutierrez, 2021-09-15 The book's primary intention is to serve as a roadmap for professionals working in developing countries interested in the Nexus Water-Energy-Food-Ecosystems (WEFE) approach. The book shows a multi-disciplinary approach, showcasing the importance of the proper use of Nexus WEFE when implementing certain development programs in regions around the globe. It can be presented as a manual for an individual that either wishes to implement intervention projects following the NEXUS approach or students interested in cooperation and development. The book begins with a general explanation of the theoretical concepts and implementation processes of Nexus WEFE and continues getting into case studies, explaining the importance of proper implementation and potential drawbacks and solutions to them. This book has a particular focus on the European Union cooperation policies when implementing such an approach in developing countries.

Progress in the Areas of Energy Efficiency and Renewable Energy in Selected Countries of the UNECE Region ,2019 This publication explores the progress in energy efficiency and renewable energy in selected countries of South-Eastern Europe, Eastern Europe, and Central Asia, and in the Russian Federation. The study analyzes policy, legislative and regulatory frameworks, financial environment and level of awareness in the areas of energy efficiency and renewable energy from 2010 to the present. It also identifies the existing gaps at the required frameworks and environment to promote energy efficiency and renewable energy investments in the countries. This study is intended to support countries in their ongoing efforts towards improving energy efficiency and building a strong renewable energy base. It proposes a set of recommendations for necessary steps in achieving the long-term objectives for energy mix and meeting the ambitious related targets set by the countries.

Governance and Sustainability David Crowther,Shahla Seifi,2020-08-19 This book explores the concepts of sustainability and governance in relation to the governance of corporations - hence the ubiquity of the term corporate governance - and other bodies. It examines how these concepts are regularly used by politicians and by the media. The two concepts are however largely treated as being separate and discrete, and given equal coverage. The argument in this book is that the two concepts are inter-related and that good governance is a prerequisite for sustainability. The focus of the book therefore is different from most, as it seeks to integrate these two important issues. The approach used in this book is based on the tradition of the Social Responsibility Research Network - a worldwide body of scholars that, over its 20-year history, has sought to broaden the discourse and to treat all research as inter-related and business-relevant. The book examines diverse aspects of the changes to corporate and institutional behaviour that have recently manifested by focusing on these two aspects of sustainable development. Thus, the authors explore engagement and partnership between organisations, in order to consider the extent to which the focus has changed so much that we need to think about new approaches to our understanding of sustainability and differing effects in practice. The international mix of authors makes this an original contribution, sharing some of the best ideas from around the world.

Alzheimer's In America Maria Shriver, 2011-04-12 The Shriver Report: A Woman's Nation Takes on Alzheimer's will be the first comprehensive multi-disciplinary look at these questions at this transformational moment. The Report will digest the current trends in thinking about Alzheimer's, examine cutting-edge medical research, look at societal impacts, and include a groundbreaking and comprehensive national poll. It will feature original photography and personal essays by men and women - some from the public arena with names you know, some from everyday America - sharing their personal struggles with the disease as patients, caregivers and family members.

Seismic Attributes as the Framework for Data Integration Throughout the Oilfield Life Cycle Kurt J. Marfurt, 2018-01-31 Useful attributes capture and quantify key components of the seismic amplitude and texture for subsequent integration with well log, microseismic, and production data through either interactive visualization or machine learning. Although both approaches can accelerate and facilitate the interpretation process, they can by no means replace the interpreter. Interpreter "grayware" includes the incorporation and validation of depositional, diagenetic, and tectonic deformation models, the integration of rock physics systematics, and the recognition of unanticipated opportunities and hazards. This book is written to accompany and complement the 2018 SEG Distinguished Instructor Short Course that provides a rapid overview of how 3D seismic attributes provide a framework for data integration over the life of the oil and gas field. Key concepts are illustrated by example, showing modern workflows based on interactive interpretation and display as well as those aided by machine learning.

Asian Development Outlook 2020 Asian Development Bank, 2020-04-01 After a disappointing 2019, growth prospects in developing Asia have worsened under the impact of the current health crisis. Signs of incipient recovery near the turn of this year were quickly overthrown as COVID-19 broke out in January 2020 in the region's largest economy and subsequently expanded into a global pandemic. Disruption to regional and global supply chains, trade, and tourism, and the continued spread of the outbreak, leave the region reeling under massive economic shocks and financial turmoil. Across Asia, the authorities are responding with policies to contain the outbreak, facilitate medical interventions, and support vulnerable businesses and households. Assuming that the outbreak is contained this year, growth is expected to recover in 2021. Especially to face down fundamental threats such as the current medical emergency, innovation is critical to growth and development. As some economies in developing Asia challenge the innovation frontier, many others lag. More and better innovation is needed in the region to sustain growth that is more inclusive and environmentally sustainable. Five key drivers of innovation are sound education, productive entrepreneurship, high-quality institutions, efficient financial systems, and

dynamic cities that excite knowledge exchange. The journey to creating an innovative society takes long-term commitment and hard work.

Blockchain in Healthcare Taylor & Francis Group,Vikram Dhillon,John Bass,Max Hooper,David Metcalf,Alex Cahana,2021-06-30 Blockchain technology is poised to revolutionize more than just payment and crypto-currency. Many vertical industries will be reshaped by the new trusted data models enabled and inspired by the blockchain - healthcare is no exception. In fact, healthcare may hold the greatest opportunities for meaningful use of the technology. Early pioneers have explored some of the first use cases for medical payments, electronic health records, HIPAA/data privacy, drug counterfeiting, and credentialing of healthcare professionals. We have only begun to scratch the surface in how to automate the complexities of today's healthcare systems and design new systems which focus on trust, transparency and the alignment of incentives. Metcalf, Bass, Dhillon, and Hooper have curated a collection of examples based on the fundamentals of blockchain that build upon the early successes and examples that point to the future. After a brief introduction to bitcoin, blockchain and the protocols available, a getting-started guide is presented specific to health and healthcare. The authors discuss the complexities and possibilities of smart contracts and some of the early consortia that are exploring the possibilities. Examples and use cases are found throughout the book, with specific sections that cover the more sophisticated and far-reaching examples which have the potential to scale at the industry-level. In addition, a discussion of integrating blockchain technology into other advanced healthcare trends and IT systems - such as telemedicine, artificial intelligence, machine learning, the Internet of Things, value-based payments, patient engagement solutions, big data solutions, medical tourism, and precision medicine/genetic therapies among many others are presented. The final section provides a glimpse into the future using blockchain technology and examples of research projects that are still in labs across the globe. The appendices may prove particularly useful for additional details on how to get started, including resources and organizations specifically focusing on blockchain and distributed ledger solutions.

Geological Heritage and Biodiversity in Natural and Cultural Landscapes Antonio Miguel Martínez-Graña, José Ángel Sánchez Agudo, 2021-09-10 Geological Heritage has very diverse elements, both for its intrinsic nature and for its social and scientific significance. These elements have a scientific dimension (stratigraphic, geomorphological, lithological, paleontological, etc.) and a landscape dimension, both with implications for territorial management. In territorial management and planning, it is essential to carry out inventory and cataloging of places of natural and social interest to establish a comprehensive policy. The identification and valuation of the geological and biological heritage, and their interaction in the landscape should favor the conservation and preservation of this natural and historical heritage. Sustainable development implies rational use that prevents the degradation or loss of these unique environments of the natural environment as well as a dissemination and awareness of landscape resources for a better understanding and enjoyment, integrating activities of both environmental education and nature tourism.

Epidemiology of Alzheimer's Disease: From Gene to Prevention Richard Mayeux, 2012-12-06 This volume contains the proceedings of the 14th Colloque Médecine et Recherche of the Fondation Ipsen pour la Recherche Thérapeutique devoted to Alzheimer's Disease and dedicated to the epidemiological study of this dementia, a very important issue because the incidence and prevalence of Alzheimer's Disease rise exponentially with age. Epidemiological findings not only confirm dementia as a major challenge for the coming years but also contribute defining risk factors, predicting and may be preventing this disease.

Aviation Policy Framework Great Britain: Department for Transport, 2013-03-22 In July 2012, the Government consulted on its strategy for aviation, the draft Aviation Policy Framework. This final Aviation Policy Framework will fully replace the 2003 Air Transport White Paper (Cm.6046, ISBN 9780101604628) on aviation, alongside Government decisions following the recommendations of the Independent Airports Commission, established September 2012. The Aviation Policy Framework is underpinned by two core principles: (i) Collaboration: achieved by working together with industry, regulators, experts, local communities to identify workable solutions; (ii) Transparency: decision making based on clear, independent information and processes. The Framework Policy covers the following areas: (1) Supporting growth and benefits of aviation; (2) Managing aviation's environmental impacts, such as climate change and noise pollution; (3) The role of the Airports Commission; (4) Other aviation objectives, including: protecting passenger' rights; competition and regulation policy; airspace; safety; security and planning.
