Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Intergovernmental Panel on Climate Change,2012-05-28 Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. This Special Report explores the social as well as physical dimensions of weather- and climate-related disasters, considering opportunities for managing risks at local to international scales. SREX was approved and accepted by the Intergovernmental Panel on Climate Change (IPCC) on 18 November 2011 in Kampala, Uganda.

Thrombopoiesis and Thrombopoietins David Kuter,Pamela Hunt,William P. Sheridan,Dorothea Zucker-Franklin,2012-12-06 David Kuter and a host of leading international researchers summarize in one volume all the knowledge of thrombopoietins (TPO) available today. The distinguished experts review the history of the search to discover TPO, describe the molecular and biological characteristics of this new molecule, and present the results of the preclinical animal experiments that will guide clinical use of this new hormone. Along the way they provide the most recent and comprehensive guide to the biology of megakaryocytes and platelets.

Salt and Drought Stress Tolerance in Plants Mirza Hasanuzzaman,Mohsin Tanveer,2020-04-10 This book presents

various aspects of salt and drought stress signaling in crops, combining physiological, biochemical, and molecular studies. Salt and drought stress are two major constraints on crop production worldwide. Plants possess several mechanisms to cope with the adverse effects of salt and drought. Among these mechanisms, stress signaling is very important, because it integrates and regulates nuclear gene expression and other cellular activities, which can help to restore cellular homeostasis. Accordingly, understanding the signaling cascades will help plant biologists to grasp the tolerance mechanisms that allow breeders to develop tolerant crop varieties. This book is an essential resource for researchers and graduate students working on salt and drought stress physiology and plant breeding.

Problems and Solutions in Human Assessment Richard D. Goffin, Edward Helmes, 2012-12-06 The assessment of individual differences has generated shockwaves affecting sociology, education, and a number of other behavioral sciences as well as the fields of management and organizational behavior. In covering the assessment of individual differences, this book pays tribute to the interests and activities that Douglas N. Jackson has incorporated into his career as a psychologist. He continues to be a leader in putting academic findings to practical use. He has also inspired generations of students with his mastery of complex concepts and as a personal example of the ability to balance several simultaneous areas of research. Consistent with the focus of Jackson's research, the theme of this book will be how the use of deductive, construct-driven strategies in the assessment of individual differences leads to benefits in terms of the applicability of the assessment instruments and the clarity of the conclusions that can be drawn from the research.

Legumes for Soil Health and Sustainable Management Ram Swaroop Meena, Anup Das, Gulab Singh Yadav, Rattan Lal, 2018-07-06 Sustainable management of soils is an important global issue of the 21st century. Feeding roughly 8 billion people with an environmentally sustainable production system is a major challenge, especially considering the fact that 10% of the world's population at risk of hunger and 25% at risk of malnutrition. Accordingly, the 68th United Nations (UN) general assembly declared 2016 the "International Year of Pulses" to raise awareness and to celebrate the role of pulses in human nutrition and welfare. Likewise, the assembly declared the year 2015 as the "International Year of Soils" to promote awareness of the role of "healthy soils for a healthy life" and the International Union of Soil Science (IUSS) has declared 2015-2024 as the International Decade of Soils. Including legumes in cropping systems is an important toward advancing soil sustainability, food and nutritional security without compromising soil quality or its production potential. Several textbooks and edited volumes are currently available on general soil fertility or on legumes but, to date, none have been dedicated to the study of "Legumes for Soil Health and Sustainable Management". This is important aspect, as the soil, the epidermis of the Earth (geoderma), is the major component of the terrestrial biosphere. This book explores the impacts of legumes on soil health and sustainability, structure and functioning of agro-ecosystems, agronomic productivity and food security, BNF, microbial transformation of soil N and P, plant-growth-promoting rhizobacteria, biofertilizers, etc. With the advent of

fertilizers, legumes have been sidelined since World War II, which has produced serious consequences for soils and the environment alike. Therefore, legume-based rational cropping/soil management practices must support environmentally and economically sustainable agroecosystems based on (sequential) rotation and intercropping considerations to restore soil health and sustainability. All chapters are amply illustrated with appropriately placed data, tables, figures, and photographs, and supported with extensive and cutting-edge references. The editors have provided a roadmap for the sustainable development of legumes for food and nutritional security and soil sustainability in agricultural systems, offering a unique resource for teachers, researchers, and policymakers, as well as undergraduate and graduate students of soil science, agronomy, ecology, and the environmental sciences.

A 'Crisis of Whiteness' in the 'Heart of Darkness' Felix Lösing, 2020-12 The British and U.S.-American Congo Reform Movement has been praised for its confrontation of colonial atrocities. Its commitment to white supremacy, however, continues to be overlooked. Through a thorough analysis of contemporary sources, Felix Lösing unmasks the colonial and racist formation of the modern human rights discourse.

Engage Tb: Integrating Community-Based Tuberculosis Activities Into the Work of Nongovernmental and Other Civil Society Organizat World Health Organization, 2015-04-20 Tuberculosis (TB) affected an estimated 8.7 million people and caused 1.4 million deaths globally in 2011, including 0.5 million women and at least 64 000 children. About 13% of TB occurs among people living with HIV, and TB causes almost a quarter of AIDS deaths. There is evidence of links between TB and noncommunicable diseases such as diabetes mellitus and with determinants of ill-health like tobacco and drug use, alcoholism and malnutrition. TB mostly affects the productive segment of society in their prime. One third of people estimated to have TB are either not reached for diagnosis and treatment by the current health systems or are not being reported. Even in patients who are identified, TB is often diagnosed and treated late. In order to reach the unreached and to find TB patients early in the course of their illness, a wider range of stakeholders already involved in community-based activities needs to be engaged. These include the nongovernmental organizations (NGOs) and other civil society organizations (CSOs) that are active in community-based development, particularly in primary health care, HIV infection and maternal and child health, but have not yet included TB in their priorities and activities. NGOs and other CSOs are non-profit organizations that operate independently from the state and from the private for-profit sector. They include a broad spectrum of entities such as international, national and local NGOs, community-based organizations (CBOs), faith-based organizations (FBOs), patient-based organizations and professional associations. CBOs are membership-based non-profit organizations that are usually self-organized in specific local areas (such as a village) to increase solidarity and mutual support to address specific issues. For example, these include HIV support groups, women's groups, parent-teacher associations and micro-credit village associations. CBO membership is comprised entirely of community members themselves, so these organizations

can be considered to represent the community most directly. NGOs and other CSOs engage in activities that range from community mobilization, service delivery, and technical assistance to research and advocacy. The strengths of NGOs and other CSOs active in health care and other development interventions at the community level include their reach and spread and their ability to engage marginalized or remote groups. These organizations have a comparative advantage because of their understanding of the local context. Greater collaboration between NGOs and other CSOs and local and national governments could greatly enhance development outcomes. A more decentralized approach that formally recognizes the critical role of NGOs and other CSOs as partners addressing gaps through support to community-based actions will expand TB prevention, diagnosis, treatment and care activities. Community-based TB activities cover a wide range of activities contributing to prevention, diagnosis, improved treatment adherence and care that positively influence the outcomes of drug-sensitive, drug resistant and HIV-associated TB. The activities also include community mobilization to promote effective communication and participation among community members to generate demand for TB prevention, diagnosis, treatment and care services. While diagnostic tests for TB continue to be performed in clinical settings, for lack of simpler diagnostic methods, community-based TB activities are conducted outside the premises of formal health facilities (e.g. hospitals, health centres and clinics) in community-based structures (e.g. schools, places of worship, congregate settings) and homesteads. Such community-based TB activities could and should be integrated with other community-based activities supporting primary health care services, including those for HIV infection, maternal and child health and noncommunicable diseases to improve synergy and impact. Community-based TB activities utilize community structures and mechanisms through which community members, CBOs and groups interact, coordinate and deliver their responses to the challenges and needs affecting their communities.--Page 1.

Small States and EU Governance S. Bunse,2009-03-26 Small States and EU Governance shows that the EU's rotating Council presidency and small states' capacity to make use of it have been underestimated. It examines the political objectives the presidency serves and presents a systematic and comparative assessment of its nature and influence in internal market and foreign policy issues.

Accessibility Denied. Understanding Inaccessibility and Everyday Resistance to Inclusion for Persons with Disabilities Hanna Egard,Kristofer Hansson,David Wästerfors,2021-11-09 This book explores the societal resistance to accessibility for persons with disabilities, and tries to set an example of how to study exclusion in a time when numerous policies promise inclusion. With 12 chapters organised in three parts, the book takes a comprehensive approach to accessibility, covering transport and communication, knowledge and education, law and organisation. Topics within a wide cross-disciplinary field are covered, including disability studies, social work, sociology, ethnology, social anthropology, and history. The main

example is Sweden, with its implementation of the United Nations Convention on the Rights of Persons with Disabilities within the context of the Nordic welfare state. By identifying and discussing persistent social and cultural conditions as well as recurring situations and interactions that nurture resistance to advancing accessibility, despite various strong laws promoting it, the book's conclusions are widely transferable. It argues for the value of alternating between methods, theoretical perspectives, and datasets to explore how new arenas, resources and technologies cause new accessibility concerns — and possibilities — for persons living with impairments. We need to be able to follow actors closely to uncover how they feel, act, and argue, but also to connect to wider discursive and institutional patterns and systems. This book will be of interest to scholars and students of disability studies, social work, sociology, ethnology, social anthropology, political science, and organisation studies.

Engines of Truth Wendie Ellen Schneider, 2016-01-28 During the Victorian era, new laws allowed more witnesses to testify in court cases. At the same time, an emerging cultural emphasis on truth-telling drove the development of new ways of inhibiting perjury. Strikingly original and drawing on a broad array of archival research, Wendie Schneider's examination of the Victorian courtroom charts this period of experimentation and how its innovations shaped contemporary trial procedure. Blending legal, social, and colonial history, she shines new light on cross-examination, the most enduring product of this time and the "greatest legal engine ever invented for the discovery of truth."

Financial Globalization and Democracy in Emerging Markets L. Armijo, 1999-01-13 When Mexico's peso crisis occurred in December 1994, all of Latin America experienced the 'tequila effect'. In January 1998, after seven months of financial turmoil in East Asia, Alan Greenspan, the usually reticent Chairman of the US Federal Reserve Bank, noted that such 'vicious cycles...may, in fact, be a defining characteristic of the new high-tech international financial system'. This book examines the impact of the new, highly liquid portfolio capital flows on governments, opposition, politicians, business and the workforce in such emerging market countries as Mexico, Brazil, Russia, Indonesia, Vietnam, Thailand and Indonesia. Hailed as 'exemplary and innovative', 'fine-grained and accessible' and 'a must read', this collection of original essays is newly available in paperback.

Rewriting the First World War Andrew Suttie, 2005-01-01 This book assesses Lloyd George's attempt to shape the history of 1914-18 through his War Memoirs. His account of the British conduct of the war focused on the generals' incompetence, their obsession with the Western Front, and their refusal to consider alternatives to the costly trench warfare in France and Belgium. Yet as War Minister and Prime Minister Lloyd George presided over the bloody offensives of 1916-17, and had earlier taken a leading role in mobilising industrial resources to provide the weapons which made them possible. Rewriting the First World War examines how Lloyd George addressed this paradox.
