Colleges that Change Lives Loren Pope,1996 The distinctive group of forty colleges profiled here is a well-kept secret in a status industry. They outdo the Ivies and research universities in producing winners. And they work their magic on the B and C students as well as on the A students. Loren Pope, director of the College Placement Bureau, provides essential information on schools that he has chosen for their proven ability to develop potential, values, initiative, and risk-taking in a wide range of students. Inside you'll find evaluations of each school's program and personality to help you decide if it's a community that's right for you; interviews with students that offer an insider's perspective on each college; professors' and deans' viewpoints on their school, their students, and their mission; and information on what happens to the graduates and what they think of their college experience. Loren Pope encourages you to be a hard-nosed consumer when visiting a college, advises how to evaluate a school in terms of your own needs and strengths, and shows how the college experience can enrich the rest of your life.

The Antitrust Paradox Robert Bork,2021-02-22 The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

Framework for Equitable Allocation of COVID-19 Vaccine National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Board on Health Sciences Policy,Committee on Equitable Allocation of Vaccine for the Novel Coronavirus,2020-11-30 In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the

United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. Framework for Equitable Allocation of COVID-19 Vaccine offers an overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

Therapeutic Communication Jurgen Ruesch,1961 This volume deals with universal processes of therapeutic communication, a term which covers whatever exchange goes on between people who have a therapeutic intent, with an emphasis upon the empirical observation of the communicative process. -- Preface.

Computational Fluid-Structure Interaction Yuri Bazilevs,Kenji Takizawa,Tayfun E. Tezduyar,2013-01-25 Computational Fluid-Structure Interaction: Methods and Applications takes the reader from the fundamentals of computational fluid and solid mechanics to the state-of-the-art in computational FSI methods, special FSI techniques, and solution of real-world problems. Leading experts in the field present the material using a unique approach that combines advanced methods, special techniques, and challenging applications. This book begins with the differential equations governing the fluid and solid mechanics, coupling conditions at the fluid-solid interface, and the basics of the finite element method. It continues with the ALE and space-time FSI methods, spatial discretization and time integration strategies for the coupled FSI equations, solution techniques for the fully-discretized coupled equations, and advanced FSI and space-time methods. It ends with special FSI techniques targeting cardiovascular FSI, parachute FSI, and wind-turbine aerodynamics and FSI. Key features: First book to address the state-of-the-art in computational FSI Combines the fundamentals of computational fluid and solid mechanics, the state-of-the-art in FSI methods, and special FSI techniques targeting challenging classes of real-world problems Covers modern computational mechanics techniques, including stabilized, variational multiscale, and space-time methods, isogeometric analysis, and advanced FSI coupling methods Is in full color, with diagrams illustrating the fundamental concepts and advanced methods and with insightful visualization illustrating the complexities of the problems that can be solved with the FSI methods covered in the book. Authors are award winning, leading global experts in computational FSI, who are known for solving some of the most challenging FSI problems Computational Fluid-Structure Interaction: Methods and Applications is a comprehensive reference for researchers and practicing engineers who would like to advance their existing knowledge on these subjects. It is also an ideal text for graduate and senior-level undergraduate courses in computational fluid mechanics and computational FSI.

Biocomputing Panos M. Pardalos,J.C. Principe,2013-12-01 In the quest to understand and model the healthy or sick human body, re searchers and medical doctors are utilizing more and more quantitative tools and techniques. This trend is

pushing the envelope of a new field we call Biomedical Computing, as an exciting frontier among signal processing, pattern recognition, optimization, nonlinear dynamics, computer science and biology, chemistry and medicine. A conference on Biocomputing was held during February 25-27, 2001 at the University of Florida. The conference was sponsored by the Center for Applied Optimization, the Computational Neuroengineering Center, the Biomedical Engineering Program (through a Whitaker Foundation grant), the Brain Institute, the School of Engineering, and the University of Florida Research & Graduate Programs. The conference provided a forum for researchers to discuss and present new directions in Biocomputing. The well-attended three days event was highlighted by the presence of top researchers in the field who presented their work in Biocomputing. This volume contains a selective collection of refereed papers based on talks presented at this conference. You will find seminal contributions in genomics, global optimization, computational neuroscience, FMRI, brain dynamics, epileptic seizure prediction and cancer diagnostics. We would like to take the opportunity to thank the sponsors, the authors of the papers, the anonymous referees, and Kluwer Academic Publishers for making the conference successful and the publication of this volume possible. Panos M. Pardalos and Jose C.

The SAGE Encyclopedia of Abnormal and Clinical Psychology Amy Wenzel, 2017-03-16 Abnormal and clinical psychology courses are offered in psychology programs at universities worldwide, but the most recent major encyclopedia on the topic was published many years ago. Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology, such works do not provide students with an accessible reference for understanding the full scope of the field. The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume, A-Z work (print and electronic formats), will be such an authoritative work. Its more than 1,400 entries will provide information on fundamental approaches and theories, various mental health disorders, assessment tools and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. Key features include: 1,400 signed articles contained in 7 volumes and available in choice of print and/or electronic formats Although organized A-to-Z, front matter includes a Reader's Guide grouping related entries thematically Back matter includes a Chronology, Resource Guide, Bibliography, and detailed Index Entries conclude with References/Further Readings and Cross-References to related entries The Index, Reader's Guide themes, and Cross-References between and among entries all combine to provide robust search-and-browse features in the electronic version.

Thesis Writing for Master's and Ph.D. Program Subhash Chandra Parija, Vikram Kate, 2018-11-03 This book on Thesis Writing for Master's and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the

hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal.

Climate Change-Resilient Agriculture and Agroforestry Paula Castro, Anabela Marisa Azul, Walter Leal Filho, Ulisses M. Azeiteiro, 2019-01-24 This book collects wide-ranging contributions such as case studies, reviews, reports on technological developments, outputs of research/studies, and examples of successful projects, presenting current knowledge and raising awareness to help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change. It brings the topic of ecosystem services closer to education and learning, as targeted by the Framework Convention on Climate Change and the Paris Agreement, the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020. Climate change and its impacts on agriculture and agroforestry have been observed across the world during the last 50 years. Increasing temperatures, droughts, biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems' resilience to the effects of climate change. As such, there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever-changing climate conditions, and to preserve habitats and ecosystems services.

Contemporary Ergonomics and Human Factors 2015 Sarah Sharples, 2018-04-30 Ergonomics and human factors is the discipline concerned with the application of scientific knowledge to improve people's interaction with products, systems and environments. This book presents the proceedings of the international conference, Ergonomics and Human Factors 2015, the 29th year in which a volume in the Contemporary Ergonomics series has appeared. In addition to being the leading event in the UK that features ergonomics and human factors across all sectors, this is also the annual conference of the Chartered Institute of Ergonomics and Human Factors (CIEHF). The scope and breadth of ergonomics and human factors continues to expand at a rapid pace. Contemporary Ergonomics and Human Factors 2015 reflects many of these developments and includes contributions covering the latest work in healthcare, transportation, defence, stress, manufacturing, design, and health and safety. There are also developments in data analytics, culture and complexity. This book also celebrates the long tradition of work in ergonomics and human factors which began with the formation of the Ergonomics Research Society in 1949 and culminated in 2015 with a Royal Charter. This has conferred recognition, at the highest level, of the uniqueness

and value of our scientific discipline and the preeminent role of the Chartered Institute of Ergonomics and Human Factors in representing both the discipline and the profession. As well as being of interest to mainstream ergonomists and human factors specialists, Contemporary Ergonomics and Human Factors 2015 will appeal to those concerned with people's interaction with their working and leisure environment, including designers, manufacturing and production engineers, health and safety specialists, occupational, applied and industrial psychologists, and applied physiologists.

Hacking- The art Of Exploitation J. Erickson, 2018-03-06 This text introduces the spirit and theory of hacking as well as the science behind it all; it also provides some core techniques and tricks of hacking so you can think like a hacker, write your own hacks or thwart potential system attacks.

A Perfect Proposal Katie Fforde, 2010 Sophie Apperly's family has never taken her seriously. Fiercely academic, they see her more practical skills as frivolous whilst constantly taking advantage of her. So when her best friend Milly invites her over to New York, she jumps at the chance. It'll do her ungrateful family good to do without her for a while.

A Passion for Teaching Christopher Day, 2004 This book concentrates on the 'heart' of teaching; teachers' moral purposes, the nature of care, emotional commitment and motivation - celebrating and acknowledging the best teaching and the best teachers.

Social Justice and International Education LaNitra Berger, 2020-10 Social Justice and International Education: Research, Practice, and Perspectives brings together a group of educators, scholars, and practitioners in the field of international education who are doing important and innovative work promoting social justice, confronting inequality, and fostering social responsibility in a global context. The book does not operate on a singular definition of social justice; rather, the authors describe their own working definition and how it has guided their international education work. Divided into three parts, the book explores social justice research, social justice in practice, and different perspectives from practitioners across the field.

Exoplanet Atmospheres Sara Seager, 2010-08-02 Over the past twenty years, astronomers have identified hundreds of extrasolar planets--planets orbiting stars other than the sun. Recent research in this burgeoning field has made it possible to observe and measure the atmospheres of these exoplanets. This is the first textbook to describe the basic physical processes--including radiative transfer, molecular absorption, and chemical processes--common to all planetary atmospheres, as well as the transit, eclipse, and thermal phase variation observations that are unique to exoplanets. In each chapter, Sara Seager offers a conceptual introduction, examples that combine the relevant physics equations with real data, and exercises. Topics

range from foundational knowledge, such as the origin of atmospheric composition and planetary spectra, to more advanced concepts, such as solutions to the radiative transfer equation, polarization, and molecular and condensate opacities. Since planets vary widely in their atmospheric properties, Seager emphasizes the major physical processes that govern all planetary atmospheres. Moving from first principles to cutting-edge research, *Exoplanet Atmospheres* is an ideal resource for students and researchers in astronomy and earth sciences, one that will help prepare them for the next generation of planetary science. The first textbook to describe exoplanet atmospheres Illustrates concepts using examples grounded in real data Provides a step-by-step guide to understanding the structure and emergent spectrum of a planetary atmosphere Includes exercises for students

University Finances Dean O. Smith, 2019-03-05 Rigorous, detailed, and wide-ranging, *University Finances* is a unique and powerful resource.
