Cultural Transfer and Political Conflicts Andreas Kötzing, Caroline Moine, 2017-07-17 Film festivals during the Cold War were fraught with the political and social tensions that dominated the world at the time. While film was becoming an increasingly powerful medium, the European festivals in particular established themselves as showcases for filmmakers and their perceptions of reality. At the same time, their prestigious, international character attracted the interest of states and private players. The history of these festivals thus sheds light not only on the films they made available to various publics, but on the cultural policies and political processes that informed their operations. Presenting new research by an international group of younger scholars, *Cultural Transfer and Political Conflicts* critically investigates postwar history in the context of film festivals reconstructing not only their social background and international dispensation, but also their centrality for cultural transfers between the East, the West and the South during the Cold War.

Antibiotic Discovery and Development Thomas J. Dougherty, Michael J. Pucci, 2011-12-18 This volume covers all aspects of the antibiotic discovery and development process through Phase II/III. The contributors, a group of highly experienced individuals in both academics and industry, include chapters on the need for new antibiotic compounds, strategies for screening for new antibiotics, sources of novel synthetic and natural antibiotics, discovery phases of lead development and optimization, and candidate compound nominations into development. Beyond discovery, the handbook will cover all of the studies to prepare for IND submission: Phase I (safety and dose ranging), progression to Phase II (efficacy), and Phase III (capturing desired initial indications). This book walks the reader through all aspects of the process, which has never been done before in a single reference. With the rise of antibiotic resistance and the increasing view that a crisis may be looming in infectious diseases, there are strong signs of renewed emphasis in antibiotic research. The purpose of the handbook is to offer a detailed overview of all aspects of the problem posed by antibiotic discovery and development.

The Caribbean World Bank, 1988 The countries of the Caribbean region benefit from a number of preferential trade arrangements. In addition to the industrialized countries' General System of Preferences (GSP) which are applicable to most developing countries, there are some very special arrangements formulated to promote exports from the Caribbean countries

-- the Caribbean Basin Initiative (CBI) of the United States, CARIBCAN of Canada, and the much older Lome Conventions of the European Communities, which includes the Caribbean as well as most African and some Pacific countries. Yet, in spite of this preferential treatment, the Caribbean export performance has been worse than the performance of the developing countries as a whole. This report examines the Caribbean export performance in the 1980s in some detail, analyzes the possible reasons behind this performance, and presents some recommendations to improve it. The scope of the analysis in this report is limited to the member countries of the Caribbean Group for Cooperation in Economic Development. This report not only has a Caribbean perspective, it examines all three major arrangements - the CBI, CARIBCAN, and Lome Convention in the environment of both groups and specific exporters in the three different markets. In this way, the greatly varying performances can lead to insights on export performance and ways to improve it.

The Psychosomatic Assessment Fava, Giovanni Andrea Fava, N. Sonino, T. N. Wise, 2012 Expands and refines the psychosomatic approach in clinical practice Psychosomatic medicine has developed methods to increase diagnostic accuracy and improve targeted therapeutic approaches in all fields of medicine. In this context, clinimetrics, the science of clinical measurements, provides unprecedented opportunities for psychosomatic assessment. This volume illustrates how this approach can be translated into everyday practice complementing and improving the medical interview. The most sensitive and reliable clinical methods are presented for evaluating specific psychosocial aspects of disease, i.e. childhood adversities, life events and chronic stress, lifestyle, sexual function, subclinical and affective disturbances, personality, illness behavior, well-being and family dynamics. Each chapter provides practical illustrations as to how crucial information can be obtained with specific methods individualized according to the patients' needs. A hyperlink is provided to a website that contains many of the instruments assessed in the volume. This book enables the reader to understand the value of the psychosomatic approach in clinical practice. It is intended to expand and refine the skills of clinicians who work in general and specialized medicine and psychiatry, whether physicians, psychologists or other health professionals.

Film Festivals Marijke de Valck, Brendan Kredell, Skadi Loist, 2016-02-26 The last decade has witnessed an explosion of interest in film festivals, with the field growing to a position of prominence within the space of a few short years. *Film Festivals: History, Theory, Method, Practice* represents a major addition to the literature on this topic, offering an authoritative and comprehensive introduction to the area. With a combination of chapters specifically examining history, theory, method and practice, it offers a clear structure and systematic approach for the study of film festivals. Offering a collection of essays written by an international range of established scholars, it discusses well-known film festivals in Europe, North America and Asia, but equally devotes attention to the diverse range of smaller and/or specialized events that take place around the globe. It provides essential knowledge on the origin and development of film festivals, discusses the use of

theory to study festivals, explores the methods of ethnographic and archival research, and looks closely at the professional practice of programming and film funding. Each section, moreover, is introduced by the editors, and all chapters include useful suggestions for further reading. This will be an essential textbook for students studying film festivals as part of their film, media and cultural studies courses, as well as a strong research tool for scholars that wish to familiarize themselves with this burgeoning field.

Kwame Nkrumah David Birmingham,1998 Nkrumah became president of the new Republic of Ghana in 1960, and was the first African statesman to achieve world recognition. This biography chronicles his public accomplishments as he struggled with colonial transition, African nationalism, and pan-Africanism, and relates his personal trials. This revised edition incorporates new material on his retirement years. For general readers and students. Annotation copyrighted by Book News, Inc., Portland, OR

Postpartum Hemorrhage and Cesarean Section Dallas Brewer,2018 In this collection, a combined method of preventing and stopping a postpartum obstetric hemorrhage is proposed, involving surgical hemostasis by ligation of the descending branch of the uterine artery and placement of a hemostatic external supraplental pleated suture, as well as mechanical compression of the uterine cavity with both vaginal and uterine Zhukovsky catheters, and coagulopathy management using thromboelastography (TEG). Uterine hemostatic sutures and their advantages and disadvantages are described in detail, and the benefits of the innovative external supraplental pleated suture are discussed. Intrauterine balloon tamponade (IUBT) devices have been shown to to be an effective management for severe postpartum hemorrhage (PPH) resulting from uterine atony as well as placental site bleeding. IUBT have now been incorporated into standard protocols for management of severe PPH as a second line conservative surgical procedure due to its simplicity and relatively non-invasive nature. In recent decades, the use of second line procedures has rapidly increased and the effectiveness of these second-line procedures in reducing hysterectomy has been demonstrated in literature. Among these various second line procedures, the use of uterine balloon tamponade increased most rapidly. Balloon tamponade is less invasive and easier to apply than other second line management. Intrauterine balloon tamponade should probably be the first second-line procedure to consider in management of severe PPH. Lastly, the book discusses how anesthesia in pregnant women with rare diseases is challenging. Because of the low occurrence and heterogeneity of these diseases, most anesthesiologists are not familiar with the symptomatology, associated comorbidities, and their consequences for anesthesia. The authors suggest that peroperative monitoring should primarily focus on the cardiopulmonary system, the depth of the neuromuscular block, and the core temperature. Because of the high risk of respiratory depression following general anesthesia in patients with rare diseases, these patients should be closely monitored during the postoperative period, with an emphasis on complete reversal of neuromuscular blockade.

Ecosystem-Based Fisheries Management Jason Link, 2010-10-07 Responsible fisheries management is of increasing interest to the scientific community, resource managers, policy makers, stakeholders and the general public. Focusing solely on managing one species of fish stock at a time has become less of a viable option in addressing the problem. Incorporating more holistic considerations into fisheries management by addressing the trade-offs among the range of issues involved, such as ecological principles, legal mandates and the interests of stakeholders, will hopefully challenge and shift the perception that doing ecosystem-based fisheries management is unfeasible. Demonstrating that EBFM is in fact feasible will have widespread impact, both in US and international waters. Using case studies, underlying philosophies and analytical approaches, this book brings together a range of interdisciplinary topics surrounding EBFM and considers these simultaneously, with an aim to provide tools for successful implementation and to further the debate on EBFM, ultimately hoping to foster enhanced living marine resource management.

Glastonbury Abbey Roberta Gilchrist, Cheryl Green, 2015 Published for the first time ever, the results of thirty-six seasons of excavation at the iconic site of Glastonbury Abbey, one of the key sites for an understanding of early monasticism in Britain.

Comparative Electoral Management Toby S. James, 2019-11-04 This book offers the first comparative monograph on the management of elections. The book defines electoral management as a new, inter-disciplinary area and advances a realist sociological approach to study it. A series of new, original frameworks are introduced, including the PROSeS framework, which can be used by academics and practitioners around the world to evaluate electoral management quality. A networked governance approach is also introduced to understand the full range of collaborative actors involved in delivering elections, including civil society and the international community. Finally, the book evaluates some of the policy instruments used to improve the integrity of elections, including voter registration reform, training and the funding of elections. Extensive mixed methods are used throughout including thematic analysis of interviews, (auto-)ethnography, comparative historical analysis and, cross-national and national surveys of electoral officials. This text will be of key interest to scholars, students and practitioners interested and involved in electoral integrity and elections, and more broadly to comparative politics, public administration, international relations and democracy studies. Chapters 1 and 4 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Polish Cinema in a Transnational Context Ewa Mazierska, Michael Goddard, 2014 This volume introduces a novel treatment of Polish cinema by discussing its international reception, performance, co-productions, and subversive émigré auteurs, such as Andrzej Zulawski and Walerian Borowczyk. The opening up of Poland economically and politically to global influences after the fall of the Berlin Wall in 1989, coupled with the rise of transnational approaches to the study of film,

presents ideal conditions for examining Polish cinema from a transnational vantage point. Yet not only have studies of Polish cinema remained largely within a national framework but Polish cinema, as well as many other Eastern European cinemas, has been virtually excluded from new research in transnational cinema. *Polish Cinema in a Transnational Context* addresses this lacuna in film studies, offering extended analysis of this national cinema's global influence. Contributors assess the reception of Polish films in Europe and North America, Polish international coproductions, the presence of Polish performers in foreign films, and the works of subversive émigré auteurs like Andrzej Zulawski and Walerian Borowczyk. The collection presents familiar films and filmmakers in a new and revealing light, while also focusing on lesser-known filmmakers and aspects of Polish cinema. The resulting volume moves the discussion beyond the border of Polish national belonging. Contributors: Peter Hames, Darragh O'Donoghue, Helena Goscilo, Dorota Ostrowska, Charlotte Govaert, Eva Närke, Izabela Kalinowska, Ewa Mazierska, Alison Smith, Lars Kristensen, Jonathan Owen, Michael Goddard, Robert Murphy, Kamila Kuc, Elzbieta Ostrowska. Ewa Mazierska is professor of film studies at the University of Central Lancashire. Michael Goddard is senior lecturer in media at the University of Salford.

Benign Anorectal Disorders Nisar Ahmad Chowdri, Fazl Q. Parray, 2015-11-09 Management of benign anorectal disorders is challenging for the treating surgeons as the patients are highly distressed, the symptoms are always alarming, and surgical intervention may be associated with lifelong disabilities such as loss of sphincter control. Written by highly experienced colorectal surgeons, this book provides detailed notes on optimal management of these disorders including pre- and post-operative management. Chapters cover the entire range of benign disorders such as hemorrhoids, fissure, fistula-in-ano, anorectal injuries, anal incontinence, rectal prolapse, pelvic floor disorders, benign tumors and ulcers, and strictures. Chapters on surgical anatomy and physiology equip the surgeons with the information necessary to understand the complex anatomy and functioning of this region which makes surgery all the more difficult. *Benign Anorectal Disorders* is an essential reading for colorectal surgeons, general surgeons, fellows-in-training and the post-graduate students.

The Lupus Book Daniel J. Wallace, 2013 Lupus, a disease of the immune system, can be quite deadly, claiming the lives of thousands of patients yearly. Dr. Daniel J. Wallace is one of the world's leading authorities on this disorder, an eminent clinician who has treated over 3000 lupus patients, the largest such practice in America. His *The Lupus Book*, originally published in 1995, immediately established itself as the most readable and helpful book on the disease. Now Dr. Wallace has once again completely revised *The Lupus Book*, incorporating a wealth of new information. This Fifth Edition discusses new drug information and newly discovered information about the pathology of the disease--all laid out in user-friendly language that any patient could understand. In particular, Wallace discusses the first drug for Lupus to be approved by the FDA--belimumab (Benlysta)--as well as other drugs in clinical trials. Readers will also discover fully updated sections on the science of lupus and breakthroughs in research. And as in past editions, the book provides absolutely lucid answers to such questions

as: What causes lupus? How and where is the body affected? Can a woman with lupus have a baby? And how can one manage this disease? Indeed, Dr. Wallace has distilled his extensive experience, providing the most up-to-date information on causes, prevention, cure, exercise, diet, and many other important topics. There is also a glossary of terms and an appendix of lupus resource materials compiled by the Lupus Foundation of America. Over a million Americans have lupus. The new Fifth Edition offers these patients and their families an abundance of reliable, up-to-date information that will help them manage the disease and live a happier life.

Ethno-Musicology Jaap Kunst, 2012-12-06 This booklet hardly needs a preface; the contents, I think, speak for themselves. It contains a short and carefully brought up to date resume of all that I, as a private University Lecturer in Amsterdam, have tried to teach my pupils. It is intended as a general introduction to ethno-musicology, before going on to the study of the forms of separate music-cultures. I sincerely hope that those, who wish to teach themselves and to qualify in this branch of knowledge, will find a satisfactory basis for self tuition in the matter here brought together. Regarding the possibility of a new edition, any critical remarks or information as to possible desiderata would be very gratefully received. J.K. PREFACE TO THE SECOND EDITION My request for critical remarks and desiderata has not been ignored. My sincere thanks to all who took the trouble to let me know what they missed in my booklet. Through their collaboration the contents have undergone a considerable improvement and enlargement as compared to the original edition issued in 1950 by the Royal Tropical Institute, Amsterdam, under the title 'Musicologica'. I have taken care to add many particulars from non-European sources, with the result that now the book is no longer so Europe-centric as it was.

Sound, Speech, Music in Soviet and Post-Soviet Cinema Lilya Kaganovsky, Masha Salazkina, 2014-03-07 This innovative volume challenges the ways we look at both cinema and cultural history by shifting the focus from the centrality of the visual and the literary toward the recognition of acoustic culture as formative of the Soviet and post-Soviet experience. Leading experts and emerging scholars from film studies, musicology, music theory, history, and cultural studies examine the importance of sound in Russian, Soviet, and post-Soviet cinema from a wide range of interdisciplinary perspectives. Addressing the little-known theoretical and artistic experimentation with sound in Soviet cinema, changing practices of voice delivery and translation, and issues of aesthetic ideology and music theory, this book explores the cultural and historical factors that influenced the use of voice, music, and sound on Soviet and post-Soviet screens.

"A Nation is Dying" Jeri Laber, Barnett R. Rubin, 1988 Nearly one million Afghan civilian non-combatants ... have been murdered during the eight years of the Soviet-Afghan conflict ... More than five million refugees ... have fled to neighboring Pakistan and Iran. It is vital for the world to know what has happened. [This book] analyzes these events without political or

ideological bias, recording human rights violations on both sides of the conflict, and provides an invaluable framework in which to understand them--Page 4 of cover.
