The Book of Disquiet Fernando Pessoa,2017-08-17 Written over the course of Fernando Pessoa's life, The Book of Disquiet was first published in 1982, pieced together from the thousands of individual manuscript pages left behind after his death in 1935. Now this fragmentary modernist masterpiece appears in a major new edition that unites Margaret Jull Costa's celebrated translation with previously missing texts, presented for the first time in order of composition and accompanied by facsimiles of the original manuscript. A mosaic of dreams and a hymn to the streets and cafés of 1930s Lisbon, The Book of Disquiet is an extraordinary record of the inner life of one of the century's most important writers.

Machine Man Max Barry,2013-05-02 A wickedly observed, disturbing, darkly funny and surprisingly moving parable for a new tech-obsessed age by the acclaimed author of Jennifer Government. Scientist Charles Neumann loses a leg in an industrial accident. It's not a tragedy. It's an opportunity. Charlie always thought his body could be better. He begins to explore a few ideas. To build parts. Better parts. Prostheticist Lola Shanks loves a good artificial limb. In Charlie, she sees a man on his way to becoming artificial everything. But others see a madman.Or a product.Or a weapon . . . A story for this age of pervasive technology, Machine Man is a darkly funny unravelling of one man's quest for ultimate self-improvement.

Faster Than The Speed Of Light Joao Magueijo,2011-12-31 The idea that the speed of light is a constant - at 186,000 miles per second - is one of the few scientific facts that almost everyone knows. That constant - c- also appears in the most famous of all scientific equations: $e=mc^2$ - Yet over the last few years, a small group of highly reputable young physicists have suggested that the central dogma of modern physics may not be an absolute truth - light may have moved faster in the earlier life of the universe, it may still be moving at different speeds elsewhere today. In telling the story of this heresy, and its gradual journey towards acceptance, Joao Magueijo writes as one of the three central figures in the story, introducing the reader to modern cosmology, to the implications of VSL (variable speed of light) and to the world of physicists. The initial rejection of Magueijo's ideas is beginning to give way to a reluctant acceptance that the young men may have a point - only the next few years will tell the final fate of this 'dangerous' idea.
