Fifty Years of Thunderbolt Tradition Jim Hansen,2006-08 No other high school in Nebraska evokes as much pride, passion, inspiration, and devotion as Pius X High School. The school that was started in 1956 and remains today Nebraska's largest co-educational parochial school, is a beacon for success and leadership. Thunderbolt athletics has been a bench mark for programs to follow, and only those privileged few student athletes who have had the opportunity to don the Pius X uniform can begin to understand why that is so. Pius X's undeniably rich tradition and success over the past fifty years are enough to separate it from other schools: 54 state titles in both boy and girl sports, 12 all sports awards, nine state football championships, and countless academic all state athletes. Coaches such as Aldrich, Kelley, Aylward, Moore, and Forycki, as well as many others, have set the standard of excellence, and have created the feelings of honor and utmost pride associated with Pius X and being a Thunderbolt. Travel back with us as we take a look at Past great athletes and teams and why they

make Pius X such a special and magical place. This is a must read for all past and present Thunderbolt athletes, and for Pius X fans and foes alike. Now read the stories and accounts of past Pius X athletes as they attempt to define the significance of being a part of the storied tradition that is a Pius X Thunderbolt.

Sports Journalism Kathryn T. Stofer, James R. Schaffer, Brian A. Rosenthal, 2019-01-29 The second edition of *Sports Journalism: An Introduction to Reporting and Writing* has passed the test of time, been used in classrooms internationally, received approval and praise from professors and students, and now it, too, has moved into the new environment of sports media. New chapters on social media and topical issues in the sports world, as well as fresh examples and new references to current technology fill its pages whether you choose to read from a tablet, a Smartphone, a Chromebook or old-fashioned paper wrapped in a cardboard cover. Inside this new edition you'll find • Three new chapters devoted to the evolution from a daily news source to a 24/7 news cycle. • Interviews with journalists whose circulation is measured in the number of Twitter followers he or she has. • A chapter encouraging discussion of ethical issues affecting today's athletes: Should college athletes be paid to compete? Can play be too violent? Is there a level playing field for men and women? How should eligibility be determined for athletes who may be transitioning their gender identity? • A glossary that includes terms such as 'hot takes,' 'scrum,' 'trolls.'

Slipping Backward James W. Hewitt, 2007-01-01 Globally, at least one in four women experiences domestic violence at some point in her life, according to World Bank figures, which are confirmed by local surveys throughout the world. Since domestic violence can cause both acute physical injuries and long-term chronic illness, an abused woman is likely to appeal to a family doctor or general practitioner as one of her first resources for help.

Rural Rebellion Ross Benes, 2021-01-26 After Ross Benes left Nebraska for New York, he witnessed his polite home state become synonymous with "Trump country." Long dismissed as "flyover" land, the area where he was born and raised suddenly became the subject of TV features and frequent opinion columns. With the rural-urban divide overtaking the national conversation, Benes knew what he had to do: he had to go home. In *Rural Rebellion* Benes explores Nebraska's shifting political landscape to better understand what's plaguing America. He clarifies how Nebraska defies red-state stereotypes while offering readers insights into how a frontier state with a tradition of nonpartisanship succumbed to the hardened right. Extensive interviews with US senators, representatives, governors, state lawmakers, and other power brokers illustrate how local disputes over health-care coverage and education funding became microcosms for our current national crisis. *Rural Rebellion* is also the story of one man coming to terms with both his past and present. Benes writes about the dissonance of moving from the most rural and conservative region of the country to its most liberal and urban centers as they grow further apart at a critical moment in history. He seeks to bridge America's current political divides by

contrasting the conservative values he learned growing up in a town of three hundred with those of his liberal acquaintances in New York City, where he now lives. At a time when social and political differences are too often portrayed in stark binary terms, and people in the Trump-supporting heartland are depicted in reductive, one-dimensional ways, Benes tells real-life stories to add depth and nuance to our understanding of rural Americans' attitudes about abortion, immigration, big government, and other contentious issues. His argument and conclusion are simple but powerful: that Americans in disparate places would be less hostile to one another if they just knew each other a little better. Part memoir, journalism, and social science, *Rural Rebellion* is a book for our times.

Dr. Strangelove William J. Ryczek, 2021-05-28 Dick Stuart (1932-2002) began as a minor league first baseman, noted for his outsized ego and terrible fielding. His brash personality and 66 home runs for the Lincoln Chiefs of the Western League made him a national figure in 1956. In 1958, he came up to the majors in Pittsburgh and played some fine seasons with the Pirates, and later the Boston Red Sox. In 1961, he was selected for the National League All-Star team, and he led the American League in RBI in 1963. A wise-cracking bon vivant, his career was not what it might have been. If he had worked harder, he might have been a better player. If Bill Mazeroski hadn't ended the 1960 Series with a home run, Stuart, who was on deck, might have been the hero. Yet his great hitting ability, quick wit and love for the limelight made him one of the most interesting players of his era.

American Indians and the Mass Media Meta G. Carstarphen, John P. Sanchez, 2012-10-01 Mention "American Indian," and the first image that comes to most people's minds is likely to be a figment of the American mass media: A war-bonneted chief. The Land O' Lakes maiden. Most American Indians in the twenty-first century live in urban areas, so why do the mass media still rely on Indian imagery stuck in the eighteenth and nineteenth centuries? How can more accurate views of contemporary Indian cultures replace such stereotypes? These and similar questions ground the essays collected in *American Indians and the Mass Media*, which explores Native experience and the mainstream media's impact on American Indian histories, cultures, and communities. Chronicling milestones in the relationship between Indians and the media, some of the chapters employ a historical perspective, and others focus on contemporary practices and new technologies. All foreground American Indian perspectives missing in other books on mass communication. The historical studies examine treatment of Indians in America's first newspaper, published in seventeenth-century Boston, and in early Cherokee newspapers; *Life* magazine's depictions of Indians, including the famous photograph of Ira Hayes raising the flag at Iwo Jima; and the syndicated feature stories of Elmo Scott Watson. Among the chapters on more contemporary issues, one discusses campaigns

to change offensive place-names and sports team mascots, and another looks at recent movies such as *Smoke Signals* and television programs that are gradually overturning the “movie Indian” stereotypes of the twentieth century. Particularly valuable are the essays highlighting authentic tribal voices in current and future media. Mark Trahan chronicles the formation of the Native American Journalists Association, perhaps the most important early Indian advocacy organization, which he helped found. As the contributions on new media point out, American Indians with access to a computer can tell their own stories—instantly to millions of people—making social networking and other Internet tools effective means for combating stereotypes. Including discussion questions for each essay and an extensive bibliography, *American Indians and the Mass Media* is a unique educational resource.

Die-Hard Fan's Guide to Longhorn Football Geoff Ketchum,2008-08-12 At last, here's the book Longhorn fans have hoped for: the ultimate die-hard fan's guide to one of the greatest college football programs ever. The *Die-Hard Fan's Guide to Longhorn Football* takes you back to the very beginning of University of Texas football in 1893 when, according to reporters at the time, Texas wiped up the face of the Earth with its first opponents. But the guide doesn't stop there. It works its way down the field of 115 years of Longhorn football legends, including complete coverage of Mack Brown's dominating teams, Darrell Royal's thoughts on his greatest players, Emory Bellard's account of how he developed the famed Wishbone offense, and exclusive interviews with Earl Campbell, Steve Worster, and many other Longhorn stars who recall their days playing in burnt orange.

Quality and Inequality in Regional and Urban Systems Karima Kourtit,Peter Nijkamp,Roger Stough,2019-11-25 In the aftermath of both ongoing globalisation (with both widening and deepening effects on countries, regions and cities) and structural changes resulting from the 2008 economic recession, regions and cities in our world are confronted with a different arena of players, performances and institutions. The challenges are formidable and numerous. Many regions and cities seem to resort to their indigenous strength, without much regard to other players in the field. This has enormous consequences for the competitive behaviour and profile of regional and urban actors but has at the same time deep impacts on the distribution of wealth, income and employment over and within countries, regions and cities. There is indeed much evidence that disparities among regions and in cities are increasing in this new force field. This special issue of REGION

makes a solid scientific attempt (i) to map out the spatial consequences of recent transitions in growth trajectories of countries or regions, and (ii) to trace policy strategies and design effective policy information, to cope adequately with these new challenges. The present special issue does so by highlighting the new force field of regional and urban dynamics from three angles in the context of spatial quality and inequality. These will be briefly sketched below.

History of Nebraska, Fourth Edition Ronald C. Naugle, James C. Olson, John J. Montag, 2014-11-30 History of Nebraska was originally created to mark the territorial centennial of Nebraska and then revised to coincide with the statehood centennial. This one-volume history quickly became the standard text for the college student and reference for the general reader, unmatched for generations as the only comprehensive history of the state. This fourth edition, revised and updated, preserves the spirit and intelligence of the original. Incorporating the results of years of scholarship and research, this edition gives fuller attention to such topics as the Native American experience in Nebraska and the accomplishments and circumstances of the state's women and minorities. It also provides a historical analysis of the state's dramatic changes in the past two decades.

Yellow Steel William R. Haycraft, 2002 In *Yellow Steel*, the first overarching history of the earthmoving equipment industry, William Haycraft examines the tremendous increase in the scope of mining and construction projects, from the Suez Canal through the interstate highway system, made possible by innovations in earthmoving machinery. Led by Cyrus McCormick's invention in 1831 of a practical mechanical reaper, many of the builders of today's massive earthmoving machines began as makers of reapers, plows, threshers, and combines. Haycraft traces the efforts of manufacturers such as Caterpillar, Allis-Chalmers, International Harvester, J. I. Case, Deere, and Massey-Ferguson to diversify from farm equipment to specialized earthmoving equipment and the important contributions of LeTourneau, Euclid, and others in meeting the needs of the construction and mining industries. He shows how postwar economic and political events, especially the creation of the interstate highway system, spurred the development of more powerful and more agile machines. He also relates the precipitous fall of several major American earthmoving machine companies and the rise of Japanese competitors in the early 1980s. Extensively illustrated and packed with detailed information on both manufacturers and machines, *Yellow Steel* knits together the diverse stories of the many companies that created the earthmoving equipment industry--how they began, expanded, retooled, merged, succeeded, and sometimes failed. Their history, a step-by-step linking of need and

invention, provides the foundation for virtually all modern transportation, construction, commerce, and industry.
