

# 1854 Construct Validity Of Critical Thinking Scale For University Students In South South Geopolitical Zone Of Nigeria 2

## United Nations University

The End of Poverty Jeffrey Sachs, 2005 Hailed by The New York Times as probably the most important economist in the world, Jeffrey Sachs is internationally renowned for his work around the globe advising economies in crisis. Now he draws on all he has learned from twenty-five years of work to offer a uniquely informed vision of the keys to economic success in the world today and the steps that are necessary to achieve prosperity for all. Marrying vivid, passionate storytelling with profound, rigorous analysis, Jeffrey Sachs explains why, over the past two hundred years, wealth has diverged across the planet and why the poorest nations have so far been unable to improve their lot. He explains how to arrive at an in-depth diagnosis of a country's economic challenges and the options it faces. He leads readers along the same learning path he himself followed, telling the stories of his own work in Bolivia, Poland, Russia, India, China and Africa to bring us to a deep understanding of the challenges faced by developing nations in different parts of the world. Finally, he offers an integrated set of solutions to the interwoven economic, political, environmental and social problems that most challenge the world's poorest countries and, indeed, the world. Ultimately, *The End of Poverty* leaves readers with an understanding, not just of how grave the problem of poverty is, but how solvable it is and why making the necessary effort is a matter of both moral obligation and strategic self-interest of the rich countries. A work of astounding intellectual vision that grows out of unprecedented real-world experience, *The End of Poverty* is a road map to a safer, more prosperous world for us all.

*The End of Development* Andrew Brooks, 2017-05-15 Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated into places of poverty and prosperity. Tracing the long arc of human history from hunter-gatherer societies to the early twenty-first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and illuminating volume shows how the wealth of 'the West' and poverty of 'the rest' stem not from environmental factors or some unique European cultural, social or technological qualities, but from the expansion of colonialism and the rise of

America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between 'developed' and 'developing' nations and millions remain impoverished. Rather than address the root causes of inequality, overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. *The End of Development* provides a compelling account of how human history unfolded differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishment is somehow part of the natural order of things.

**That We May Learn Better** T. W. Yoloye, 2004

**The Road to Academic Excellence** Philip G. Altbach, Jamil Salmi, 2011-09-01 This book examines the experience of 11 universities in nine countries around the world that have grappled with the challenge of building successful research institutions in difficult circumstances and outlines key lessons of from this experience.

Making States Work United Nations University, 2005 The point of departure for this collection of articles is the idea that there is a link between international peace and strong states respectful of human rights and robust civil societies. Presented by Chesterman (New York U. School of Law, US), Ignatieff (Harvard U.'s John F. Kennedy School of Government, US), and Thakur (United Nations University)

Reimagining Global Health Paul Farmer, Arthur Kleinman, Jim Kim, Matthew Basilio, 2013-09-07 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

**The Archaeology of South Asia** Robin Coningham, Ruth Young, 2015-08-31 This book synthesises the archaeology of South Asia from the Neolithic period (c.6500 BCE) to the third century BCE.

*Humanitarianism in the Modern World* Norbert Götz, Georgina Brewis, Steffen Werther, 2020-07-23 A fresh look at two centuries of humanitarian history through a moral economy approach focusing on appeals, allocation, and accounting.

**Managing Chronicity in Unequal States** Laura Montesi, Melania Calestani, 2021-11-22 By portraying the circumstances of people living with chronic conditions in radically different contexts, from Alzheimer's patients in the UK to homeless people with psychiatric disorders in India, *Managing Chronicity in Unequal States* offers glimpses of what dealing with medically complex conditions in stratified societies means. While in some places the state regulates and intrudes on the most intimate aspects of chronic living, in others it is utterly and criminally absent. Either way, it is a present/absent actor that deeply conditions people's opportunities and strategies of care. This book explores how individuals, groups and communities navigate uncertain and unequal healthcare systems, in which inherent moral judgements on human worth have long-lasting effects on people's wellbeing. This is key reading for anyone wishing to deconstruct the issues at stake when analysing how care and chronicity are entangled with multiple institutional, economic, and other circumstantial factors. How people access the available informal and formal resources as well as how they react to official diagnoses and decisions are important facets of the management of chronicity. In the arena of care, people with chronic conditions find themselves negotiating restrictions and handling issues of power and (inter)dependency in relationships of inequality and proximity. This is particularly relevant in current times, when care has given in to the lure of the market, and the possibility of living a long and fulfilling life has been drastically reduced, transformed into a 'reward' for the few who have been deemed worthy of it.

**Scientific Communities in the Developing World** Jacques Gaillard, V. V. Krishna, Roland Waast, 1997

**Mobile Museums** Felix Driver, Mark Nesbitt, Caroline Cornish, 2021-04-19 *Mobile Museums* presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines - including the history of science, museum anthropology and postcolonial history - to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in *Mobile Museums* collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. *Mobile Museums* helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for *Mobile Museums* 'This book advances a paradigm shift in studies of museums and

collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge - and have implications for the remobilisation of museums in the future.' - Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' - Arthur MacGregor

*Postcolonial Thought and Social Theory* Julian Go, 2016 Social scientists have long resisted the radical ideas known as postcolonial thought, while postcolonial scholars have critiqued the social sciences for their Euro-centric focus. However, in *Postcolonial Thought and Social Theory*, Julian Go attempts to reconcile the two seemingly contradictory fields by crafting a postcolonial social science. Contrary to claims that social science is incompatible with postcolonial thought, this book argues that the two are mutually beneficial, drawing upon the works of thinkers such as Franz Fanon, Amilcar Cabral, Edward Said, Homi Bhabha, and Gayatri Spivak. Go concludes with a call for a third wave of postcolonial thought emerging from social science and surmounting the narrow confines of disciplinary boundaries.

*Singapore in Global History* Derek Thiam Soon Heng, Syed Muhd Khairudin Aljunied, 2011 This important overview explores the connections between Singapore's past with historical developments worldwide until present day. The contributors analyse Singapore as a city-state seeking to provide an interdisciplinary perspective to the study of the global dimensions contributing to Singapore's growth. The book's global perspective demonstrates that many of the discussions of Singapore as a city-state have relevance and implications beyond Singapore to include Southeast Asia and the world. This vital volume should not be missed by economists, as well as those interested in imperial history.

*Learning to Industrialize* Kenichi Ohno, 2014-04-03 This book proposes a new, pragmatic way of approaching economic development which features policy learning based on a comparison of international best policy practices. While the important role of government in promoting private sector development is being recognized, policy discussion often remains general without details as to what exactly to do and how to avoid common pitfalls. This book fills the gap by showing concrete policy contents, procedures, and organizations adopted in high-performing East Asian economies. Natural resources and foreign aid and investment can take a country to a certain income level, but growth stalls when given advantages are exhausted. Economies will be caught in middle income traps if growth impetus is not internally generated. Meanwhile, countries that have soared to high income introduced mindset, policies, and institutions that encouraged, or even forced, accumulation of human capital - skills, technology, and knowledge. How this can be done systematically is the main topic of policy learning. However, government should not randomly adopt what Singapore or Taiwan did in the past. A continued march to prosperity is possible only when policy makers acquire capability to formulate policy suitable for local context after studying a number

of international experiences. Developing countries wanting to adopt effective industrial strategies but not knowing where to start will benefit greatly by the ideas and hands-on examples presented by the author. Students of development economics will find a new methodological perspective which can supplement the ongoing industrial policy debate. The book also gives an excellent account of national pride and pragmatism exhibited by officials in East Asia who produced remarkable economic growth, as well as serious effort by an African country to emulate this miracle. The Open Access version of this book, available at <http://www.taylorfrancis.com/doi/view/10.4324/9780203085530> has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

*Unruly Waters* Sunil Amrith, 2018-12-11 From a MacArthur Genius, a bold new perspective on the history of Asia, highlighting the long quest to tame its waters Asia's history has been shaped by her waters. In *Unruly Waters*, historian Sunil Amrith reimagines Asia's history through the stories of its rains, rivers, coasts, and seas--and of the weather-watchers and engineers, mapmakers and farmers who have sought to control them. Looking out from India, he shows how dreams and fears of water shaped visions of political independence and economic development, provoked efforts to reshape nature through dams and pumps, and unleashed powerful tensions within and between nations. Today, Asian nations are racing to construct hundreds of dams in the Himalayas, with dire environmental impacts; hundreds of millions crowd into coastal cities threatened by cyclones and storm surges. In an age of climate change, *Unruly Waters* is essential reading for anyone seeking to understand Asia's past and its future.

**Theories of Social Capital** Ben Fine, 2010-03-15 Tracing the evolution of social capital since his highly acclaimed contribution of 2001 (*Social Capital Versus Social Theory*), Ben Fine consolidates his position as the world's leading critic of the concept. Fine forcibly demonstrates how social capital has expanded across the social sciences only by degrading the different disciplines and topics that it touches: a McDonaldization of social theory. The rise and fall of social capital at the World Bank is critically explained as is social capital's growing presence in disciplines, such as management studies, and its relative absence in others, such as social history. Writing with a sharp critical edge, Fine not only deconstructs the roller-coaster presence of social capital across the social sciences but also draws out lessons on how (and how not) to do research.

**The International Handbook of Political Ecology** Raymond L Bryant, 2015-08-28 The *International Handbook of Political Ecology* features chapters by leading scholars from around the world in a unique collection exploring the multi-disciplinary field of political ecology. This landmark volume canvasses key developments, topics, iss

*The History of Terrorism* Gérard Chaliand, Arnaud Blin, 2016-08-23 First published in English in 2007 under title: *The history of terrorism: from antiquity to al Qaeda*.

**Asia and Africa in the Global Economy** Ernest Aryeetey, 2003 This publication considers the different economic experiences of countries in Southeast Asia and sub-Saharan Africa, in terms of policy, institutional and structural aspects,

divergence in economic growth and performance levels, and the extent of their integration into the global economy. Chapters discuss a variety of issues including the dynamics of globalisation, local entrepreneurship, exports, foreign direct investment, management of financial flows, foreign aid, debt and development.

**Are Foreign Correspondents Redundant?** Richard Sambrook, 2010 International news reporting is undergoing a profound transformation. Western newspapers and broadcasters have steadily cut back on foreign correspondents and reporting over the last 20 years in the face of economic pressures. Now technology and cultural changes brought by globalisation are bringing additional pressures to news organisations and the internet has also allowed new voices to be heard. News organisations are having to adapt and redefine themselves in the face of turbulent changes to how we learn about the world.
