**Juvenile Crime, Juvenile Justice** Institute of Medicine, National Research Council, Commission on Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Law and Justice, Panel on Juvenile Crime: Prevention, Treatment, and Control, 2001-06-05 Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and get tough pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to

individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

*Internal Security Management in Nigeria* Oshita O. Oshita, Ikenna Mike Alumona, Freedom Chukwudi Onuoha, 2019-07-23 This book explores the disturbing dimensions of the problem of insecurity in Nigeria, such as herdsmen violence, the Boko Haram insurgency, cybercrime, militancy in the Niger Delta, communal conflict and violence, as well as police corruption. It offers a comprehensive discussion of the theoretical foundations of internal security, the threats to internal security, the role of formal and informal agencies in internal security management and the challenges of internal security management.

*Delinquent Networks* Jerzy Sarnecki, 2001-10-25 This book presents a study of co-offending relations among youths under twenty-one suspected of criminal offences in Stockholm during 1991-5. In total, the study includes just over 22,000 individuals suspected of around 29,000 offences. Jerzy Sarnecki employs the methods of network analysis which makes it possible to study the ties, social bonds, interactions, differential associations and connections that are central to many of the sociologically oriented theories on the aetiology of crime. Up to now, network analysis has been used only rarely in the criminological context. The book discusses many aspects of Stockholm's delinquent networks such as the existence of delinquent gangs and a criminal underworld, the durability of delinquent relations, and the choice of co-offenders with respect to sex, age, residential location, ethnic background and earlier delinquent experience. It also considers the effects of societal intervention on criminal networks. This unique study will appeal to a wide audience.

Couples in Conflict Alan Booth, Ann C. Crouter, Mari L. Clements, Tanya Boone-Holladay, 2016-01-08 This classic volume provides a solid foundation for thinking about creative ways in which our society can work to prevent or minimize destructive couple conflict and enhance couples' abilities to constructively handle their differences. A common thread throughout is that constructive conflict and negotiation are beneficial for relationships. The new introduction provides an overview of how this classic text is still relevant today. Divided into four parts, this book: \*addresses the societal and bio-evolutionary underpinnings of couple conflict; \*presents the interpersonal roots of couple conflict and the consequences for individuals and couples; \*discusses what effects couple conflict have on children and how individual differences in children moderate these effects; \*outlines policies and programs that address couple conflict; and \*concludes with an essay that pulls these four themes together and points to new directions for research and program efforts. This book serves as a supplement in graduate or advanced undergraduate courses on interpersonal relationships, couples and/or family and conflict, divorce, couples and/or family therapy taught in human development and family studies, clinical or counseling psychology, social work, sociology, and communications and it is also a helpful compendium for researchers and clinicians/counselors interested in couple conflict.

**STATISTICAL THEORY AND ANALYSIS IN BIOASSAY** Uchenna Petronilla Ogoke, Ethelbert Chinaka Nduka, 2021-08-21 Statistical Theory and Analysis in Bioassay is a seven chapter monograph tailored essentially to meet the needs of graduate students, practitioners and researchers in the fields of medicine, pharmacology, biosciences/life sciences and related fields that employs the tools of biostatistics in bioassays and analysis. In this wise, we have taken time to discuss in details relevant topics; principles, methods and applications. Practice exercises are also included where necessary. The earlier chapters give background information, definition of terms, purpose, types, structure and relative potency in bioassay. An important theorem, Fieller's theorem is proved in details with illustrative examples. The last two chapters are on dose-response relationship, fitting in paralleline assays and estimation. We are convinced that this monograph will meet the expectations of the readers while constructive criticisms that will improve another edition will be appreciated.

Global Nonkilling Leadership Forum Book of Proceedings Glenn D. Paige, 2008 There exists a long history of nonviolent cross-border interventions in situations of conflict. This history constitutes a rich source of practical experience, of lessons learned. This volume collects the stories of nonviolent cross-border intervention in one place for scrutiny. In line with a new

and comprehensive typology developed for this book, various examples of nonviolent cross-border direct interventions, which have been undertaken by activists rather than by humanitarian agencies, are described here and the lessons provided by these interventions are detailed.

Enhanced Cognitive-behavioral Therapy for Couples Norman Epstein, Donald H. Baucom, 2002 Annotation Retaining much of the traditional conceptual model and methods of cognitive-behavioral therapy, Epstein (family studies, U. of Maryland at College Park) and Baucom (clinical psychology, U. of North Carolina at Chapel Hill) seek to enhance the therapy by integrating a developmental perspective on the interaction patterns of the couple and the influences of the couple's physical and interpersonal environment. They describe their model and present the theoretical and empirical foundations for clinical assessment and intervention strategies presented in the latter part of the book. Annotation c. *50th IMO - 50 Years of International Mathematical Olympiads* Hans-Dietrich Gronau, Hanns-Heinrich Langmann, Dierk Schleicher, 2011-01-03 In July 2009 Germany hosted the 50th International Mathematical Olympiad (IMO). For the very first time the number of participating countries exceeded 100, with 104 countries from all continents. Celebrating the 50th anniversary of the IMO provides an ideal opportunity to look back over the past five decades and to review its development to become a worldwide event. This book is a report about the 50th IMO as well as the IMO history. A lot of data about all the 50 IMOs are included. We list the most successful contestants, the results of the 50 Olympiads and the 112 countries that have ever taken part. It is impressive to see that many of the world's leading research mathematicians were among the most successful IMO participants in their youth. Six of them gave presentations at a special celebration: Bollobás, Gowers, Lovász, Smirnov, Tao and Yoccoz. This book is aimed at students in the IMO age group and all those who have interest in this worldwide leading competition for highschool students.

*Contested Environments* Nick Bingham, Andrew Blowers, Chris Belshaw, 2003-07-09 Why are food scares become so

common? Whose voices count in decisions affecting the landscapes where we live? Will we soon be wars over water? What makes people protest outside international trade meetings? These are just a few of the questions that are explored in *Contested Environments*. By bringing together perspectives from science, social science, technology, and humanities, the book addresses in a uniquely interdisciplinary way why environmental issues are so often controversial. Other features include the detailed examination of a wide range of topics from specific disputes such as those around GM crops, national parks, energy policy, water supply, and international trade to broader debates like environmental justice, economic valuation of environments, and the media the promotion of integrative thinking through the book-wide use of the concepts of value, power, and action the inclusion of frequent activities to encourage readers to develop both their appreciation of particular issues and generic skills the rich illustration of the text with examples from around the world. The book is part of a series entitled *Environment: Change, Contest and Response*. The series forms a significant part of an interdisciplinary Open University course on environmental matters. The other books in the series are: *Understanding Environmental Issues*; *Changing Environments*; *Environmental Responses*.
