The Effects of Early Social-Emotional and Relationship Experience on the Development of Young Orphanage Children The St. Petersburg-USA Orphanage Research Team,2009-04-27 Undertaken at orphanages in Russia, this study tests the role of early social and emotion experience in the development of children. Children were exposed to either multiple caregivers who performed routine duties in a perfunctory manner with minimal interaction or fewer caregivers who were trained to engage in warm, responsive, and developmentally appropriate interactions during routine care. Engaged and responsive caregivers were associated with substantial improvements in child development and these findings provide a rationale for making similar improvements in other institutions, programs, and organizations.

Situation Analysis of Children and Adolescents in Kenya ,2014

The State of the World's Children 2005 Carol Bellamy,2004 The 2005 edition of UNICEF's annual report examines the key issues which threaten the welfare of children around the world, using the concept of childhood as the state and condition of a child's life. The Convention of the Rights of the Child, adopted in 1989, offers a new definition of childhood based on human rights; yet for hundreds of millions of children the promise of childhood is threatened by poverty, armed conflict and HIV/AIDS threaten their survival and development. The report examines these three major threats in detail, and offers a comprehensive agenda of action to combat them. It concludes by calling on all stakeholders, including governments, donors, international agencies and communities to reaffirm and recommit to their moral and legal responsibilities to children.

Yingcamu ,2006

Vulnerable Children Deborah J. Johnson,DeBrenna LaFollette Agbényiga,Robert K. Hitchcock,2015-05-19 They are laborers, soldiers, refugees, and orphans. In areas of the world torn by poverty, disease, and war, millions of children are invisible victims, deprived of home, family, and basic human rights. Their chances for a stable adult life are extremely slim. The powerful interdisciplinary volume *Vulnerable Children* brings a global child-rights perspective to the lives of indigenous, refugee, and minority children in and from crisis-prone regions. Focusing on self-determination, education, security, health, and related issues, an international panel of scholars examines the structural and political sources of children's

vulnerabilities and their effects on development. The book analyzes intervention programs currently in place and identifies challenges that must be met at both the community and larger policy levels. These chapters also go a long way to explain the often-blurred line between vulnerability and resilience. Included in the coverage: Dilemmas of rights-based approaches to child well-being in an African cultural context. Poverty and minority children's education in the U.S.: case study of a Sudanese refugee family. The heterogeneity of young children's experiences in Kenya and Brazil. A world tour of interventions for children of a parent with a psychiatric illness. An exploration of fosterage of Owambo orphans in Namibia. UNICEF in Colombia: defending and nurturing childhood in media, public, and policy discourses. *Vulnerable Children* is a must-have volume for researchers, graduate students, and clinicians/professionals/practitioners across a range of fields, including child and school psychology, social work, maternal and child health, developmental psychology, anthropology, sociology, social policy, and public health.

PG Textbook of Pediatrics Piyush Gupta, PSN Menon, Siddarth Ramji, Rakesh Lodha, 2015-08-31 The book attempts to provide the essential information that postgraduates throughout India need to capture to effectively address the health problems that our children and youth may face in the times to come. Our objective is to be comprehensive yet concise and reader friendly, embracing both the new advances in science as well as the time-honored art of pediatric practice. Both Indian and international experts in respective fields have provided the details which have been further scrutinized for exposition and usefulness to pediatric postgraduates by a chosen team of eminent academicians. We have liberally included tables, line diagrams, images, clinical photographs, illustrative figures, flowcharts and algorithms in the main text. The book is divided in 10 major Parts and further arranged into 51 Sections to cover all aspects of postgraduate pediatric curriculum. Themes which have major public health relevance for India are extensively covered. It is almost impossible to cover all pediatric problems with the same degree of detail and hence a careful balance has been made in the details of description of diseases and their management to the needs of the students, and to keep the book to a manageable size. Take-home messages are provided at the end of each chapter. Selected recent references, mostly leading articles, reviews and position statements, are provided for more detailed information if desired by the student or the teacher.

State of the World's Children UNICEF., 2009 On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report *The State of the World's Children* to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-12-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Interventions for Orphans and Vulnerable Children at Four Project Sites in South Africa Geoffrey Setswe, 2008 This report describes interventions for orphans and vulnerable children (OVC) at four sites in South Africa. The project sites are the Rustenburg and Orkney areas in the North West province, and the Kopanong and Matjhabeng municipalities in the Free State. The report highlights the knowledge, attitudes, practices, prevention, care and support issues concerning HIV/AIDS among the people located in these 4 areas. In 2002, the Human Sciences Research Council (HSRC) was commissioned by the WK Kellogg Foundation to develop and implement a five-year intervention project focusing on orphans and vulnerable children (OVC) in southern Africa. In collaboration with several partner organisations, the project currently focuses on how children, families and communities in Botswana, South Africa and Zimbabwe are coping with the impact of HIV/AIDS. The aim of the project is to develop models of best practice so as to enhance and improve support structures for OVC in the southern African region as a whole.

From Neurons to Neighborhoods National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Integrating the Science of Early Childhood Development, 2000-11-13 How we raise young children is

one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of expertise. The debate has intensified as discoveries about our development-in the womb and in the first months and years- have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about brain wiring and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

Child poverty, evidence and policy Jones, Nicola A.,Sumner, Andy,2011-02-23 Available Open Access under CC-BY-NC licence. This book is about the opportunities and challenges involved in mainstreaming knowledge about children in international development policy and practice. It focuses on the ideas, networks and institutions that shape the development of evidence about child poverty and wellbeing, and the use of such evidence in development policy debates. It also pays particular attention to the importance of power relations in influencing the extent to which children's voices are heard and acted upon by international development actors. The book weaves together theory, mixed method approaches and case studies spanning a number of policy sectors and diverse developing country contexts in Africa, Asia and Latin America. It therefore provides a useful introduction for students and development professionals who are new to debates on children, knowledge and development, whilst at the same time offering scholars in the field new methodological and empirical insights.
