Relationships Among Parenting Styles, Ethnicity, Gender and Adolescents Internalized Distress in Impoverished Families, 2008 The principal objectives of the study were to examine the concurrent and long-term effect of parenting style and its interaction with the ethnicity and gender on adolescent internalized distress in low income families. The data were from the first two waves of the Three City Study. Nine hundred and fifteen mothers from Boston, Chicago, and San Antonio reported their parenting behaviors on authoritative, harsh, permissive, and disengaged parenting; and their adolescent children responded to the Brief Symptom Inventory 18 to indicate their internalized distress. The results of the study indicated that disengaged and harsh parenting were significantly associated with adolescent concurrent internalized distress; however, authoritative and permissive parenting styles were not significantly associated with adolescent concurrent internalized distress. Except for harsh parenting, prior parenting style also failed to predict adolescent internalized distress. There was no significant interaction between parenting styles and ethnicity; however, the interaction between child gender and harsh parenting was a significant predictor of children's psychological outcomes, such that gender moderated the association between harsh parenting and adolescent internalized distress.

Juvenile Crime, Juvenile Justice Institute of Medicine, National Research Council, Commission on Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Law and Justice, Panel on Juvenile Crime: Prevention, Treatment, and Control, 2001-06-05 Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and get tough pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an

authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

*Delinquent Networks* Jerzy Sarnecki, 2001-10-25 This book presents a study of co-offending relations among youths under twenty-one suspected of criminal offences in Stockholm during 1991-5. In total, the study includes just over 22,000 individuals suspected of around 29,000 offences. Jerzy Sarnecki employs the methods of network analysis which makes it possible to study the ties, social bonds, interactions, differential associations and connections that are central to many of the sociologically oriented theories on the aetiology of crime. Up to now, network analysis has been used only rarely in the criminological context. The book discusses many aspects of Stockholm's delinquent networks such as the existence of delinquent gangs and a criminal underworld, the durability of delinquent relations, and the choice of co-offenders with respect to sex, age, residential location, ethnic background and earlier delinquent experience. It also considers the effects of societal intervention on criminal networks. This unique study will appeal to a wide audience.

**Interpersonal Psychotherapy of Depression** Gerald L. Klerman, 1994-10 Reflecting exciting new trends in psychiatric treatment, the authors present their model of IPT, short-term psychotherapy for treating clinical depression.

**Gender, Peace and Conflict** Inger Skjelsboek, Dan Smith, 2001-03-22 Gender is increasingly recognized as central to the study and analysis of the traditionally male domains of war and international relations. The book explores the key role of gender in peace research, conflict resolution and international politics. Rather than simply add gender and stir the aim is to transcend different disciplinary boundaries and conceptual approaches to provide a more integrated basis for research and study. To this end *Gender, Peace & Conflict* uniquely combines theoretical chapters alongside empirical case studies, to

demonstrate the importance of a gender perspective to both theory and practice in conflict resolution and peace research.

**Handbook of Climate Change Resilience** Walter Leal Filho, 2019-08-26 Climate resilience, or the capacity of socio-ecological systems to adapt and upkeep their functions when facing physical-chemical stress, is a key feature of ecosystems and communities. As the risks and impacts of climate change become more intense and more visible, there is a need to foster a broader understanding of both the impacts of these disruptions to food, water, and energy supplies and to increase resilience at the national and local level. The Handbook of Climate Change Resilience comprises a diverse body of knowledge, united in the objective of building climate resilience in both the industrialised and the developing world. This unique publication will assist scientists, decision-makers and community members to take action to make countries, regions and cities more resilient.

**STATISTICAL THEORY AND ANALYSIS IN BIOASSAY** Uchenna Petronilla Ogoke, Ethelbert Chinaka Nduka, 2021-08-21 Statistical Theory and Analysis in Bioassay is a seven chapter monograph tailored essentially to meet the needs of graduate students, practitioners and researchers in the fields of medicine, pharmacology, biosciences/life sciences and related fields that employs the tools of biostatistics in bioassays and analysis. In this wise, we have taken time to discuss in details relevant topics; principles, methods and applications. Practice exercises are also included where necessary. The earlier chapters give background information, definition of terms, purpose, types, structure and relative potency in bioassay. An important theorem, Fieller's theorem is proved in details with illustrative examples. The last two chapters are on dose-response relationship, fitting in parallel line assays and estimation. We are convinced that this monograph will meet the expectations of the readers while constructive criticisms that will improve another edition will be appreciated.

**Environmental Regulation of Oil and Gas** Zhiguo Gao, Chih-Kuo Kao, 1998-09-10 This book contains in-depth articles written by scholars, international lawyers, and practitioners from around the world. **Peace and Conflict in Africa** David Francis, 2013-04-04 Nowhere in the world is the demand for peace more prominent and challenging than in Africa. From state collapse and anarchy in Somalia to protracted wars and rampant corruption in the Congo; from bloody civil wars and extreme poverty in Sierra Leone to humanitarian crisis and authoritarianism in Sudan, the continent is the focus of growing political and media attention. This book presents the first comprehensive overview of

conflict and peace across the continent. Bringing together a range of leading academics from Africa and beyond, *Peace and Conflict in Africa* is an ideal introduction to key themes of conflict resolution, peacebuilding, security and development. The book's stress on the importance of indigenous Africa approaches to creating peace makes it an innovative and exciting intervention in the field.

**Couples in Conflict** Alan Booth, Ann C. Crouter, Mari L. Clements, Tanya Boone-Holladay, 2016-01-08 This classic volume provides a solid foundation for thinking about creative ways in which our society can work to prevent or minimize destructive couple conflict and enhance couples' abilities to constructively handle their differences. A common thread throughout is that constructive conflict and negotiation are beneficial for relationships. The new introduction provides an overview of how this classic text is still relevant today. Divided into four parts, this book: \*addresses the societal and bio-evolutionary underpinnings of couple conflict; \*presents the interpersonal roots of couple conflict and the consequences for individuals and couples; \*discusses what effects couple conflict have on children and how individual differences in children moderate these effects; \*outlines policies and programs that address couple conflict; and \*concludes with an essay that pulls these four themes together and points to new directions for research and program efforts. This book serves as a supplement in graduate or advanced undergraduate courses on interpersonal relationships, couples and/or family and conflict, divorce, couples and/or family therapy taught in human development and family studies, clinical or counseling psychology, social work, sociology, and communications and it is also a helpful compendium for researchers and clinicians/counselors interested in couple conflict.

**Governance Without Government** James N. Rosenau, Ernst-Otto Czempiel, 1992-03-26 A world government capable of controlling nation-states has never evolved, but governance does underlie order among states and gives direction to problems arising from global interdependence. This book examines the ideological bases and behavioural patterns of this governance without government.

**Enhanced Cognitive-behavioral Therapy for Couples** Norman Epstein, Donald H. Baucom, 2002  
 Annotation Retaining much of the traditional conceptual model and methods of cognitive-behavioral therapy, Epstein (family studies, U. of Maryland at College Park) and Baucom (clinical psychology, U. of North Carolina at Chapel Hill) seek to enhance the therapy by integrating a developmental perspective on the interaction patterns of the couple and the influences of the couple's physical and interpersonal environment. They describe their model and present the theoretical and empirical foundations for clinical assessment and intervention strategies presented in the latter part of the book. Annotation c.
