Positive and Negative Risk-taking as Correlates of Parenting Style and Self-esteem in College Students Joy

Prepejchal,2002 A substantial body of research has been accumulated on predictors of general risk-taking. The current study hypothesizes relationships between parenting style (authoritative, authoritarian, permissive indulgent, or permissive indifferent), self-esteem and positive or negative risk-taking behaviors of college students. Students (n=113) from a small Midwestern college completed the Rosenberg Self-Esteem Scale (RSE), the Child Report of Parent Behavior Inventory (CRPBI), and the Positive and Negative Risk-Taking Questionnaire (PNRTQ). For all students, parental acceptance was positively correlated to self-esteem and firm control was negatively correlated to self-esteem. For male students, father firm control is also related to lower levels of negative risk-taking. These findings suggest that the parent-child relationship is indicative of child self-esteem and, in the father-son relationship, predicts negative risk-taking. Parenting techniques are related to self-esteem, indicating that parents should be aware of their styles of interaction with their children and examine the motivations behind their use of acceptance and firm control. Possible explanations for these findings are discussed-- Abstract.

Juvenile Crime, Juvenile Justice Institute of Medicine,National Research Council,Commission on Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Law and Justice,Panel on Juvenile Crime: Prevention, Treatment, and Control,2001-06-05 Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and get tough pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an

authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

Delinquent Networks Jerzy Sarnecki, 2001-10-25 This book presents a study of co-offending relations among youths under twenty-one suspected of criminal offences in Stockholm during 1991–5. In total, the study includes just over 22,000 individuals suspected of around 29,000 offences. Jerzy Sarnecki employs the methods of network analysis which makes it possible to study the ties, social bonds, interactions, differential associations and connections that are central to many of the sociologically oriented theories on the aetiology of crime. Up to now, network analysis has been used only rarely in the criminological context. The book discusses many aspects of Stockholm's delinquent networks such as the existence of delinquent gangs and a criminal underworld, the durability of delinquent relations, and the choice of co-offenders with respect to sex, age, residential location, ethnic background and earlier delinquent experience. It also considers the effects of societal intervention on criminal networks. This unique study will appeal to a wide audience.

Bullying in Schools Ken Rigby, 2007 Bullying is now widely recognised as a serious problem that affects many children in schools. It can take many forms, including direct verbal and physical harassment and indirect forms such as deliberate exclusion and the targeting of individuals using cyber technology. Continual and severe bullying can cause both short term and long term damage, making it difficult for victims to form intimate relationships with others and for habitual bullies to avoid following a delinquent lifestyle and becoming perpetrators of domestic violence. Even though this type of abuse affects many of our school children, Ken Rigby believes there are grounds for optimism. This passionate and motivating book shows that there are ways of reducing the likelihood of bullying occurring in a school and effective ways of tackling cases when they

do occur. Using up-to-date studies, *Bullying in Schools* helps us to understand the nature of bullying and why it so often takes place in schools. Importantly, it examines and evaluates what schools can do to promote more positive peer relationships within the school community and take effective and sustainable action to deal with problems that may arise. Teachers, parents, school leaders, policy makers, and health professionals will find it invaluable and empowering.

The earlier chapters give background information, definition of terms, purpose, types, structure and relative potency in bioassay. An important theorem, Fieller's theorem is proved in details with illustrative examples. The last two chapters are on dose-response relationship, fitting in parallelline assays and estimation. Investing in All the People Lawrence H. Summers, 1994-01-01 World Bank Technical Paper 244. This report on the experiences of several Pacific island nations indicates that in remote villages, solar photovoltaic (PV) technologies are supplying reliable power at costs lower than those of the more commonly used diesel systems. Although the supply of electricity to households is limited, PV does provide isolated peoples with access to light and to information through television and VCRs. The study shows that the success of these programs depends not only on the technology itself but on personnel training, good fee collection systems, and careful financial management. Where managerial and technical expertise was lacking, maintenance by local, cooperatively owned utilites proved to be the best option. The authors present a

case study from Tuvalu, where the solar PV system exemplifies the program's effectiveness in serving remote areas. The successful Tuvalu Solar Electric Cooperative Society (TSECS), formed in 1984, has been maintained by a well-trained technical staff with local and visiting technicians. It has also benefited from fee collection through an outside agency that prevents diversion of funds to other projects, local user committees to communicate with the utility, and an exclusive focus on PV systems. Environmentally attractive at both the global and local levels, PV solar technology appears highly promising for small-scale applications in developing countries.

Gender, Peace and Conflict Inger Skjelsboek, Dan Smith, 2001-03-22 Gender is increasingly recognized as central to the study and analysis of the traditionally male domains of war and international relations. The book explores the key role of gender in peace research, conflict resolution and international politics. Rather than simply add gender and stir the aim is to transcend different disciplinary boundaries and conceptual approaches to provide a more integrated basis for research and study. To this end Gender, Peace & Conflict uniquely combines theoretical chapters alongside empirical case studies, to demonstrate the importance of a gender perspective to both theory and practice in conflict resolution and peace research.
