## **STATISTICAL THEORY AND ANALYSIS IN BIOASSAY** Uchenna Petronilla Ogoke, Ethelbert Chinaka

Nduka, 2021-08-21 Statistical Theory and Analysis in Bioassay is a seven chapter monograph tailored essentially to meet the needs of graduate students, practitioners and researchers in the fields of medicine, pharmacology, biosciences/life sciences and related fields that employs the tools of biostatistics in bioassays and analysis. In this wise, we have taken time to discuss in details relevant topics; principles, methods and applications. Practice exercises are also included where necessary. The earlier chapters give background information, definition of terms, purpose, types, structure and relative potency in bioassay. An important theorem, Fieller's theorem is proved in details with illustrative examples. The last two chapters are on dose-response relationship, fitting in parallelline assays and estimation. We are convinced that this monograph will meet the expectations of the readers while constructive criticisms that will improve another edition will be appreciated.

**Electrochemical Materials Science** John Bockris,2013-06-29 It is now time for a comprehensive treatise to look at the whole field of electrochemistry. The present treatise was conceived in 1974, and the earliest invitations to authors for contributions were made in 1975. The completion of the early been delayed by various factors. volumes has There has been no attempt to make each article emphasize the most recent situation at the expense of an overall statement of the modern

It is an attempt at making a mature statement about the present position in the vast area of what is best looked at as a new interdisciplinary field. Texas A & M University J. O'M. Bockris University of Ottawa B. E. Conway Case Western Reserve University Ernest Yeager Texas A & M University Ralph E. White Preface to Volume 4 The science of degradation of materials involves a vast area of science and technology, the economic importance of which rivals that of any other clearly defined area affecting the standard of life. The basis of the corrosion process is the electrochemical charge-transfer reaction, and the center of the subject of the degradation of materials is electrochemical material science.

*Fungi in vegetation science* W. Winterhoff, 2012-12-06 Readers will perhaps be surprised to find a volume about fungi within a handbook of vegetation science. Although fungi traditionally feature in textbooks on botany, at least since Whittaker (1969), they have mostly been categorised as an independent kingdom of organisms or, in contrast to the animal and plant kingdom, as probionta together with algae and protozoa. More relevant for ecology than the systematic separation of fungi from plants is the different lifestyle of fungi which, in contrast to most plants, live as parasites, saprophytes or in symbiosis. Theoretical factors aside, there are also practical methodological considerations which favour the distinction between fungal and plant communities, as has been shown for example by Dörfelt (1974). Despite their special position the coenology of fungi has been dealt with in the handbook of vegetation science. It would be wrong to conclude that we underestimate the important differences between fungal and plant communities. The reasons for including the former are that mycocoenology developed from phytocoenology, the similarity of the methods and concepts still employed today and the close correlation between fungi and plants in biocoenoses.

**Blackwell's Concise Encyclopedia of Ecology** Peter P. Calow, 2009-04-01 The language of ecology has grown rapidly and changed extensively over the last decade. From Arrhenotoky to Psammosere; from the One-tailed test to Zoocoenosis, the Blackwell Concise Encyclopedia of Ecology provides concise, non-technical definitions of over 2000 ecological terms, covering the complete spectrum of pure and applied ecological research. The definitions are drawn from the Encyclopedia of Ecology and Environmental Management, and are fully cross-referenced. This is the most comprehensive and up-to-date dictionary of ecological terms available. It should be invaluable to students and researchers alike. Over 2000 terms defined Avoids technical jargon Fully cross-referenced Includes common abbreviations

*Baba of Karo, a Woman of the Muslim Hausa* Baba (of Karo), Mary Felice Smith, 1981-01-01 Daughter of a Hausa farmer

and Koranic teacher, Baba became Mary Smith's friend in 1949, when M. G. and Mary Smith were engaged in fieldwork in Nigeria. In daily sessions for several weeks Baba dictated her life story, which Mrs. Smith has translated from the Hausa. The old woman's memories reached back to the days of slave raids and interstate warfare before the British occupation, and she has left a fascinating and valuable record of Hausa life in the late nineteenth century and the first half of the twentieth. Baba describes Hausa male-oriented society from a woman's point of view, narrating not only her own life history but stories of other women who were close to her. She tells of Hausa domestic life, farming, and slavery, and explains the Hausa institutions of bond friendship, adoption, polygynous marriage, and kinship, showing how, in a society that permits easy and frequent divorce, children are not exclusively dependent on their biological parents for emotional support. First published in 1945 and now reissued with a new foreword by Hilda Kuper, this autobiography of a shrewd, humorous, and courageous personality remains a classic in the field of African studies and a uniquely valuable account of a Muslim society in West Africa.

My Idol Years Mark Holden, 2017-05-01 From Carnation Kid and early pop stardom to LA songsmith and actor to producer and manager to Idol judge to barrister, Mark Holden's memoir is always startlingly honest, a unique portrait of the music and TV industries, of family and ageing in the public eye. In 2006 Mark had a premonition that 2007 was going to be his last year on Australian Idol and kept a revealing record of what happened behind the scenes. That diary provides a central thread in this hugely entertaining portrait of his rollercoaster life. Yet *My Idol Years* covers it all, including growing up in Adelaide, the Countdown years, and the wild side of making music and living in Los Angeles in the 1980s. It is a funny, warm and generous book full of stories about personalities including Elton John, David Hasselhoff, Molly Meldrum, John Paul Young, and of course his fellow Idol presenters. Mark also tells the story behind the Bobo the Clown incident on *Dancing with the Stars*, something that caused a media sensation at the time. But in what is arguably one of the most candid memoirs in recent times, Mark isn't afraid to reveal his own vulnerabilities, failings and challenges, as well as the triumphs. Ultimately *My Idol Years* is a touchdown, both a celebration of the music and the entertainment worlds and a moving testament to the value of family, friends and the many lessons learned along the way.
