A problem-based Evidence coursebook that presents the Federal Rules of Evidence in context, illuminates the rules' underlying theories and perspectives, and provides a fully updated and systematic account of the law in a student-friendly hornbook-style format. The material is accompanied with straightforward and systematic explanations. Lively discussion and interesting problems (rather than numerous appellate case excerpts) engage students in understanding the principles, policies, and debates that surround evidence law. The book

New to the Seventh Edition: A new case file to introduce numerous evidence issues throughout the semester, with spin-off problems in each chapter. Updated doctrine, including application of evidence rules to electronic evidence and the online environment. Professors and students will benefit from: An opening case file introducing students to the process of analyzing evidence in terms of the essential elements of a legal dispute, serving as an effective introduction to much of the course to follow A wide range of real-world problems exposes students to the depth and complexity of the Rules of Evidence Every chapter addresses basic rules interpretation, essential policy, and connects theory to practice Assessment problems (modeled on exam questions) at the end of each chapter, including answers with explanations Teaching materials Include: Updated and streamlined Teacher’s Manual, including sample syllabi for both 4- and 3-credit courses, transition guide for each chapter, teaching guidance, and answers to all the problems in the book Problems Supplement that includes most problems deleted from prior editions

Transnational Commercial Law Roy Goode, Herbert Kronke, Ewan McKendrick, Jeffrey Wool, 2012-03-29 Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.
