Border Management Modernization Gerard McLinden, Enrique Fanta, David Widdowson, Tom Doyle, 2010-11-30 Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

Tattooed Skin and Health J. Serup, N. Kluger, W. Bäuml, 2015-03-26 With about 10-20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face

the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

Medical Devices and the Public's Health Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Public Health Effectiveness of the FDA 510(k) Clearance Process, 2011-10-25 Medical devices that are deemed to have a moderate risk to patients generally cannot go on the market until they are cleared through the FDA 510(k) process. In recent years, individuals and organizations have expressed concern that the 510(k) process is neither making safe and effective devices available to patients nor promoting innovation in the medical-device industry. Several high-profile mass-media reports and consumer-protection groups have profiled recognized or potential problems with medical devices cleared through the 510(k) clearance process. The medical-device industry and some patients have asserted that the process has become too burdensome and is delaying or stalling the entry of important new medical devices to the market. At the request of the FDA, the Institute of Medicine (IOM) examined the 510(k) process. Medical Devices and the Public's Health examines the current 510(k) clearance process and whether it optimally protects patients and promotes innovation in support of public health. It also identifies legislative, regulatory, or administrative changes that will achieve the goals of the 510(k) clearance process. Medical Devices and the Public's Health recommends that the U.S. Food and Drug Administration gather the information needed to develop a new regulatory framework to replace the 35-year-old 510(k) clearance process for medical devices. According to the report, the FDA's finite resources are best invested in developing an integrated premarket and postmarket regulatory framework.

OECD Reviews of Regulatory Reform, 1999

Rethinking EU Consumer Law Geraint Howells, Christian Twigg-Flesner, Thomas Wilhelmsson, 2017-07-28 In *Rethinking EU Consumer Law*, the authors analyse the development of EU consumer law on the basis of a number of clear themes, which are then traced through specific areas. Recurring themes include the artificiality of the EU's consumer image, the problems created by the drive towards maximum harmonisation, and the unexpected effects EU Consumer Law has had on national law. The book argues that EU Consumer Law has the potential of enhancing the protecting of consumers throughout the EU and could offer a model for consumer law elsewhere in the world, but in order to unlock this potential, there needs to be a rethink with regard to the EU's approach to consumer law and policy.

Law and the Semantic Web V. Richard Benjamins, Pompeu Casanovas, Joost Breuker, Aldo Gangemi, 2005-02-09 by Roberto Cencioni At the Lisbon Summit in March 2000, European heads of state and government set a new goal for the European Union — to become the most competitive knowledge-based society in the world by 2010. As part of this objective, ICT (information and communication technologies) services should become available for every citizen, and for all schools,

homes and businesses. The book you have in front of you is about Semantic Web technology and law. Law is something omnipresent; all citizens — at some points in their lives — have to deal with it. In addition, law involves a large group of professionals, and is a multi-billion business world wide. Information technology is important because it that can improve citizens' interaction with law, as well as improve legal professionals' work environment. Legal professionals dedicate a significant amount of their time to finding, reading, analyzing and synthesizing information in order to take decisions, and prepare advice and trials, among other tasks. As part of the "Semantic-Based Knowledge and Content Systems" Strategic Objective, the European Commission is funding projects to construct technology to make the Semantic Web vision come true. 1 The articles in this book are related to two current foci of the Strategic Objective : • Knowledge acquisition and modelling, capturing knowledge from raw information and multimedia content in webs and other distributed repositories to turn poorly structured information into machine-processable knowledge.

Knowledge Production and Contradictory Functions in African Higher Education Nico Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world-class universities inevitably located predominantly in North America, Europe and, increasingly, East Asia. The rest of the world, including Africa, is left to play catch-up. But that discourse should focus rather on the tensions, even contradictions, between excellence and engagement with which all universities must grapple. Here the African experience has much to offer the high-participation and generously resourced systems of the so-called developed world. This book offers a critical review of that experience, and so makes a major contribution to our understanding of higher education.

Trends and Issues in Global Tourism 2010 Roland Conrady, Martin Buck, 2010-02-04 This book offers insights into important trends and future scenarios in the global tourism and travel industry and analyses current challenges in the aviation and hospitality industry, destination management and general travel behaviour.
