The Business of Innovation Jay Mitra, 2017-04-17 Moving beyond the narrow confines of a how to of Innovation management, The Business of Innovation sets out to track, trace and provide testimonies of innovation practice in small to large-scale organisations from countries around world. Through a combination of contemporary economic and social theory, and an array of practical examples from a wide range of sectors and industries, Jay Mitra offers critical insight into how global innovation works, where it works and most importantly, who makes it work, with an emphasis on innovative women. Suitable for postgraduate, doctoral and MBA students on business management and innovation courses and practitioners looking for a critical insight into the business of innovation.

A Research Agenda for Entrepreneurship and Innovation David B. Audretsch, Erik E. Lehmann, Albert N. Link, 2019 This book identifies and explains the most salient opportunities for future research in the fields of entrepreneurship and innovation. It draws on the experiences and insights of leading scholars in the world on a broad array of rich and promising topics, ranging from entrepreneurial ecosystems to finance and to the role of universities.

Entrepreneurial Development and Innovation in Family Businesses and SMEs Masouras, Andreas, Maris, Georgios, Kavoura, Androniki, 2020-06-19 Entrepreneurship is very important for both entrepreneurs and economic development. It helps boost innovation and competitiveness in every country and facilitates the creation of new jobs and new opportunities, especially for family businesses and small and medium enterprises (SMEs). Both entrepreneurship and innovation constitute a subject that is both topical and timeless, since institutions and the various institutional processes have always affected a country's sustainability. *Entrepreneurial Development and Innovation in Family Businesses and SMEs* is an essential scholarly publication that contributes to the understanding, improving and strengthening of entrepreneurial development, and innovation's role in family businesses and SMEs by providing both theoretical and applied knowledge in order to find how and why entrepreneurship and innovation can produce inefficient and dysfunctional outcomes. Featuring a wide range of topics such as women entrepreneurship, internationalization, and organizational learning, this book is ideal for researchers, policymakers, entrepreneurs, executives, managers, academicians, and students.

Entrepreneurship, Innovation, and Economic Development Adam Szirmai,Wim Naudé,Micheline Goedhuys,2011-04-28 Three sets of questions are addressed.

How to Get Published in the Best Entrepreneurship Journals Alain Fayolle, Mike Wright, 2014-01-31 Competition to publish in the top journals is fierce. This book provides entrepreneurship researchers with relevant material and insights to support them in their efforts to publish their research in the most prestigious entrepreneurship outlets. &a

Entrepreneurship and Innovation Tim Mazzarol, Sophie Reboud, 2019-11-27 This book provides an overview of the theory, practice and context of entrepreneurship and innovation at both the industry and firm level. It provides a foundation of ideas and understandings designed to shape the reader's thinking and behaviour to better appreciate the role of innovation and entrepreneurship in modern economies, and to recognise their own abilities in this regard. The book is aimed at students studying advanced levels of entrepreneurship, innovation and related fields as well as practitioners (for example, managers, business owners). As entrepreneurship and innovation are largely indivisible elements and cannot be adequately understood if studied separately, the book provides the reader with an overview of these elements and how they combine to create new value in the market. This edition is updated with recent international research, including research and examples from Europe, the US, and the Asia-Pacific region.

Entrepreneurship and innovation in the age of digital transformation Anna Ujwary-Gil, Anna Florek-Paszkowska, Bianka Godlewska-Dzioboń, 2021-11-01 PURPOSE: Explore what entrepreneurship and success factors can help drive business to resilience and stability and achieve competitive advantage through innovation in different countries and business realities in the era of digital transformation and turbulent times. METHODOLOGY: Based on the narrative literature review, we present research findings concerning new strategies and outlooks for business innovation in times of many unknowns. Each organization wants to find its way to gain success and create its unique business model, which can capture value creation and innovativeness and be more adaptive, resilient, and stable in critical moments and sustainable over time. FINDINGS: The articles presented in this issue explore the essential factors of business innovation and success in different organizations and the environments in which these businesses function. IMPLICATIONS FOR THEORY AND PRACTICE: This article synthesizes the presented research field's importance and relevance, connecting its theoretical background with practical research. Recommendations and implications for future trends of this research stream might also be helpful for professionals and academicians. ORIGINALITY AND VALUE: The novel studies presented in this issue were done in five different (developing and developed) countries and business sectors that present human-based and non-human-based factors as crucial factors needed to empower business transformation in a complex world. Each group of elements is essential in business success, and their components are interdependent. We need to look at the interactions and interdependencies of their components in a dynamic and network form and cannot simplify the reality, focusing only on one group of business components and ignoring

the other. These unique studies provide a valuable outlook to establish dynamic, adaptive business pathways towards a sustainable and resilient organizational future and propose future research paths needed to execute structural changes in businesses. Keywords: business model, innovation, critical success factors, digital transformation, knowledge management, talent management, competitiveness, leadership, transformation, change management, VUCA Table of Contents Business innovation and critical success factors in the era of digital transformation and turbulent times 7 Anna Florek-Paszkowska, Anna Ujwary-Gil, Bianka Godlewska-Dzioboń Survival of the funded: Econometric analysis of startup longevity and success 29 Daniel Keogh, Daniel K.N. Entrepreneurship Business Debates Vanessa Ratten, 2023-05-11 This book introduces entrepreneurship as a concept that is popular in the general media but also in academic study. What is evident is due to its positive and negative connotations in society. This book identifies that it is important to debate the topic of entrepreneurship in order to understand its multi-faceted nature. This edited book includes a number of chapters that discuss multidimensional perspectives from an international perspective. This book emphasizes the geo-political frontiers related to entrepreneurship based on current debates, which includes recent global changes. This book also challenges the debatable as to whether entrepreneurship should be examined at the individual, firm, regional, or industry level. This book goes further to demonstrate that this depends on the type and nature of the study. Therefore, it is better to consider entrepreneurship in a multidimensional way that incorporates different levels of analysis. This book shows each level of analysis that can be considered from a geo-political perspective. This means including an overview of the cultural factors that influence entrepreneurial behavior. In this way, this book helps readers to understand how and why geography and politics influence entrepreneurial action.

Complexity in Entrepreneurship, Innovation and Technology Research Elisabeth S.C. Berger, Andreas Kuckertz, 2016-02-25 This volume discusses the challenge of dealing with complexity in entrepreneurship, innovation and technology research. Businesses as well as entire economies are increasingly being confronted by widespread complex systems. Fields such as entrepreneurship and innovation cannot ignore this reality, especially with their inherent links to diverse research fields and interdisciplinary methods. However, most methods that allow more detailed analyses of complex problems are either neglected in mainstream research or are, at best, still emerging. Against this backdrop, this book

provides a forum for the discussion of emergent and neglected methods in the context of complexity in entrepreneurship, innovation and technology research, and also acts as an inspiration for academics across related disciplines to engage more in complexity research.

The Role of Innovation and Entrepreneurship in Economic Growth Michael J Andrews, Aaron Chatterji, Josh Lerner, Scott Stern, 2022-03-17 Innovation and entrepreneurship are ubiquitous today, both as fields of study and as starting points for conversations among experts in government and economic development. But while these areas continue to attract public and private investments, many measurements of their resulting economic growth—including productivity growth and business dynamism—have remained modest. Why this difference? Because not all business sectors are the same, and the transformative gains of some industries have been offset by stagnation or contraction in others. Accordingly, a nuanced understanding of the economy requires a nuanced understanding of where innovation and entrepreneurship occur and where they matter. Answering these questions allows for strategic public investment and the infrastructure for economic growth. *The Role of Innovation and Entrepreneurship in Economic Growth*, the latest entry in the NBER conference series, seeks to codify these answers. The editors leverage industry studies to identify specific examples of productivity improvements enabled by innovation and entrepreneurship, including those from new production technologies, increased competition, new organizational forms, and other means. Taken together, the volume illuminates whether the contribution of innovation and entrepreneurship to economic growth is likely to be concentrated, be it selected sectors or more broadly--

The Challenges of Corporate Entrepreneurship in the Disruptive Age Donald F. Kuratko, Sherry Hoskinson, 2018-11-22 Today's age of disruptive technology is a strategic game changer for most organizations. Unpredictable market conditions create unprecedented challenges for simple organizational survival, let alone avenues for innovation and growth. This volume explores this dynamic environment in which corporate entrepreneurship strategies are pursued.

Dynamics of Knowledge Intensive Entrepreneurship Franco Malerba, Yannis Caloghirou, Maureen McKelvey, Slavo Radošević, 2015-07-24 Knowledge intensive entrepreneurship lies at the core of the structural shift necessary for the growth and development of a knowledge based economy, yet research reveals that the EU has fewer young leading innovators, and Europe's new firms do not adequately contribute to industrial growth. This is especially true in the high R&D intensive, high-tech sectors. This structural malaise, undermining Europe's growth potential, is well diagnosed, but poorly understood. This volume fills this important gap by exploring new firms that have significant knowledge intensity in their activity and develop and exploit innovative opportunities in diverse sectors. Through an evolutionary and systemic approach to entrepreneurship, focusing on knowledge intensive entrepreneurship as both a micro and a macro phenomena and analyzing firms in the context of various socio-economic models, the authors explore firms creation and origins around the world, their

organization, strategies and business models as well as the role of innovation systems and institutions in their formation and growth. This comprehensive research text is vital reading for academics, researchers and students of high-tech and knowledge intensive entrepreneurship as well as those with an interest in industrial dynamics, innovation management and public policy.

Entrepreneurship, Innovation and Regional Development Jay Mitra, 2019-10-08 The fields of entrepreneurship, innovation and regional development are inextricably linked, with people, organisations and the environment or their location, forming the main building blocks in an integrated model of value creation. This second edition of a key textbook draws on the diversity of approaches in these areas to produce a unified understanding of this important subject and its sub-sets. The author connects theory and practice using references to academic studies as well as industry sources. The importance of technology is highlighted throughout to demonstrate the value of new technology-based ventures and the role of technology for innovation in both organisational and spatial contexts. The economic and social contexts of entrepreneurship are covered in dedicated chapters offering an appreciation of multiple perspectives on key themes of growth and development. Drawing on insights and concepts from a wide range of disciplines such as business, sociology, economics, geography and management, this unique textbook introduces entrepreneurship to students from different backgrounds and varied interests. With a range of new case studies and coverage of emerging themes such as smart cities, ecosystems, female entrepreneurship and social and human capital, this book provides an expert exposition of the elaborate empire of entrepreneurship.

Innovation and Entrepreneurship in the Global Economy Charlie Karlsson, Urban Gråsjö, Sofia Wixe, 2015-06-29 We have, in recent decades, been able to witness a veritable revolution in the world economy, known as 'globalization'. Generally, the term is connected to the rapid increase of the free movement of goods, capital, people, ideas, information and knowledge around the globe. This book contributes to the meso- and micro-economic literature on innovation and entrepreneurship in the global economy.

Entrepreneurship John Bessant, Joe Tidd, 2018-07-04 Successful entrepreneurship requires a specialized mix of innovation, drive, business acumen, and communication; an entrepreneur sees the potential and pitfalls in any idea, and understands the product, the market, and the business climate well enough to make smart decisions for the venture. This book is designed to go beyond the nuts and bolts of entrepreneurship and help students develop the critical foundation referred to as "entrepreneurial thinking." Organized to align with the typical flow of development, the text allows students to develop their own ideas alongside each lesson. Coverage of goals, opportunities, and resources includes detailed discussion of venture funding, financial resources, and the relationships needed to get an idea off of the ground; subsequent chapters include clear guidance on keeping the momentum going through product development, enterprise growth, value creation,

and the evolution of the business model. Based on the latest research and providing a truly global perspective, this book gives students a comprehensive, real-world foundation in entrepreneurship today.

Innovation and Entrepreneurship Martha Corrales-Estrada, 2019-09-27 The world of business is constantly changing. Here, a cast of key players from Latin America explore the conceptual foundations, methodologies, and tools for mini-cases and business challenges to innovation and entrepreneurship in emerging markets.

Entrepreneurship and Organizational Change Vanessa Ratten, 2020-01-06 Change is a part of any organization, but in order to compete in the globally connected business environment, organizations also need to incorporate an entrepreneurial focus. This book investigates how successful organizations have intelligently responded to change by utilizing creative, innovative and dynamic solutions. Pursuing a complexity theory approach, it analyzes the changes currently taking place, and discusses the optimal use of organizational resources. This provides the reader with a more cohesive way to assess the current and potential future challenges faced by organizations as they respond to environmental, social and economic changes.

Global Entrepreneurship & Innovation Sarika Pruthi, Jay Mitra, 2023-04-05 In a globalised world, entrepreneurial ventures and innovation projects today tend to function internationally across a range of different countries and regions in order to be successful. It is vital therefore for entrepreneurs, innovators and indeed all business professionals to be thinking and acting with a global mindset. This comprehensive textbook helps you to develop such a mindset by drawing on theory, research, examples and case studies. There is a strong focus on developing countries and emerging economies throughout the text given the centrality of these markets to successful business today. Dedicated chapters shine a unique spotlight on timely topics such as migration, immigration, ethnicity and digitalisation in relation to entrepreneurship. Case studies and examples are included from around the world and include small start-ups, SMEs and well-known international brands such as Amazon, Dyson and Uber. Written in an accessible style for readers, there are additionally a wide range of learning features in each chapter including learning outcomes, summaries and discussion questions, alongside visual aids. This text is essential reading for university and college courses related to international entrepreneurship and global innovation. Sarika Pruthi is Associate Professor in the School of Global Innovation and Leadership at Lucas College and Graduate School of Business, San José State University, USA. Jay Mitra is Professor of Business Enterprise and Innovation and Director of the Venture Academy at Essex Business School, University of Essex, UK, and Visiting Professor at Luneburg University, Germany.

Digital Entrepreneurship and Global Innovation Hosu, Ioan, Iancu, Ioana, 2016-09-30 Succeeding in the modern business world is a multi-faceted endeavor that involves numerous parts. By implementing effective strategies, companies can strive toward achieving a competitive advantage. Digital Entrepreneurship and Global Innovation is a pivotal reference source for the latest academic material on strategic entrepreneurship initiatives to facilitate organizational growth and

success, focusing on the role of digital technologies in business environments. Highlighting theoretical frameworks, industry perspectives, and emerging methodologies, this book is ideally designed for professionals, practitioners, upper-level students, and researchers involved in the field of entrepreneurship.

Entrepreneurship Álvaro Cuervo, Domingo Ribeiro, Salvador Roig, 2007-05-26 Entrepreneurship can, at times, seem like a veritable jungle where finding one's way can prove to be difficult. This book functions as a map locating the most important issues: those where an acceptable consensus already exists, and those that remain open to discussion. In so doing, we have presented the accounts of distinguished explorers in their own words.
