Handbook of Research Methods for Tourism and Hospitality Management Robin Nunkoo, 2018-07-27 As research in tourism and hospitality reaches maturity, a growing number of methodological approaches are being utilized and, in addition, this knowledge is dispersed across a wide range of journals. Consequently there is a broad and multidisciplinary community of tourism and hospitality researchers whom, at present, need to look widely for support on methods. In this volume, researchers fulfil a pressing need by clearly presenting methodological issues within tourism and hospitality research alongside particular methods and share their experiences of what works, what does not work and where challenges and innovations lie.

The Study of Tourism Richard Sharpley, 2011-01-28 Over the last two decades, tourism has become firmly established as a recognized field of study and the focus of extensive academic research. There has been continual expansion in the provision of taught programmes at undergraduate and postgraduate level, dramatic developments in the tourism literature and a growing community of tourism academics. Despite this explosion in the study of tourism, however, it is still struggling to achieve wider academic legitimacy, it remains to some extent divorced from the industry upon which it is focused and, even within its academic ranks, there remains uncertainty over its role and future direction. This volume aims to critically explore

this paradoxical situation and to consider the future direction of the study of tourism. It charts the development of tourism as an area of study, analyzing approaches taken from an international context; it critiques contemporary epistemologies of tourism framed around the social science vs. management dichotomy and offers alternative approaches to the study of tourism. In doing so, it engages directly with a range of important academic debates: what tourism 'is' in an academic context, the purpose of studying tourism and how it should be studied in the future. This important and stimulating volume will have global appeal to higher level students, academics and researchers within tourism and related disciplines.

Planning and Managing the Experience Economy in Tourism Augusto Costa, Rui, Brandão, Filipa, Breda, Zelia, Costa, Carlos, 2021-12-03 Tourism is facing a new paradigm that has been brought on by the introduction of experiences in the development, management, and promotion of tourism. Associating experiences to tourism destination and products allows tourists to relate to their vacations differently and helps to fuel a destination's competitiveness and compliance with new needs and motivations that are being driven by the tourists. When properly design, managed, and developed, tourism experiences can contribute to the destination's overall sustainability by maximizing tourism's positive impacts and fostering their spillover to local communities. Planning and Managing the Experience Economy in Tourism is an essential reference book that seeks to advance research on tourism experience as well as investigate how tourism experiences can create and increase tourism competitiveness. The book explores how the experience concept has evolved in the last decade, alongside the needs and motivations of consumers, and how it can be conceptualized, designed, managed, and implemented both at the tourism firm and destination levels. Delving further into concepts like creative tourism, destination attributes, and smart experiences, this book serves as a dynamic resource for travel agencies, tourism managers, tourism professionals, marketers, destination managers, government officials, policymakers, academicians, students, tourism officials, planners, and researchers.
