Corruption and Development in Nigeria Oláyínká Àkànlé, David O. Nkpe, 2021-12-28 Despite being Africa's largest economy and most populous country, with abundant natural resources, Nigeria still faces substantial development challenges. This book argues that corruption lies at the heart of many of the country's problems. Drawing on a range of different disciplinary perspectives, this volume explores the relationship between corruption and development, investigating the causes, contexts, and consequences of corruption, and the pathways for addressing it. As well as covering the wider background and theory surrounding corruption in the country, the book will investigate different sectors: the media, the judiciary, the health sector, industry, the criminal justice system, and of course politics and governance. The book concludes by considering attitudes and perceptions to corruption within Nigeria, current approaches to countering corruption, and future pathways to addressing the problem. This book's critical investigation of the links between corruption and

development in Nigeria will be of interest to researchers of corruption, development and African Studies, as well as to policy makers, practitioners, and local stakeholders.

Failed State 2030 ,2011 This monograph describes how a failed state in 2030 may impact the United States and the global economy. It also identifies critical capabilities and technologies the US Air Force should have to respond to a failed state, especially one of vital interest to the United States and one on the cusp of a civil war. Nation-states can fail for a myriad of reasons: cultural or religious conflict, a broken social contract between the government and the governed, a catastrophic natural disaster, financial collapse, war and so forth. Nigeria with its vast oil wealth, large population, and strategic position in Africa and the global economy can, if it fails disproportionately affect the United States and the global economy. Nigeria, like many nations in Africa, gained independence from the United Kingdom in 1960. It is the most populous country in Africa and will have nearly 250 million people by 2030. In its relatively short modern history, Nigeria has survived five military coups as well as separatist and religious wars, is mired in an active armed insurgency, is suffering from disastrous ecological conditions in its Niger Delta region, and is fighting one of the modern world's worst legacies of political and economic corruption. A nation with more than 350 ethnic groups, 250 languages, and three distinct religious affiliations--Christian, Islamic, and animist Nigeria's 135 million people today are anything but homogenous. Of Nigeria's 36 states, 12 are Islamic and under the strong and growing influence of the Sokoto caliphate. While religious and ethnic violence are commonplace, the federal government has managed to strike a tenuous balance among the disparate religious and ethnic factions. With such demographics, Nigeria's failure would be akin to a piece of fine china dropped on a tile floor--it would simply shatter into potentially hundreds of pieces.--DTIC abstract.

By presenting the seemingly paradoxical situation of a 'traditional' marriage in a 'modern' Indian, middle-class family, Karnad reveals how particular notions of wealth,

well-being, sexual propriety, tradition, and modernity form the basis of middle-class society in contemporary India.
