African Herbal Pharmacopoeia Thomas Brendler, 2010 The African Herbal Pharmacopoeia (AfrHP) provides comprehensive, up to date botanical, commercial and phytochemical information on over fifty of the most important African medicinal plants. The technical data were made on plant samples sourced from across the continent. These monographs prepared by leading African scientists, have been reviewed by international experts. Additional data includes micro morphology of the plant material, distribution maps and TLC Chromatograms. These data are crucial for producers, collectors and traders in medicinal plants and extracts as well as researchers, manufacturers and practitioners. The scope, quality and standard of these herbal monographs are comparable to those prepared in Europe, North America and Asia. Whilst this is the very first edition, it is being proposed to proceed to a second edition, quickly, as more plant species will be covered.

Theodore of Mopsuestia Frederick McLeod,2009-03-04 This addition to the Early Church Fathers series provides in one place new extensive translations of Theodore's major extant works that have not been available in English up unto the present. It also summarizes the secondary literature and discusses at length the fundamental features of his theological thinking, especially regarding his method of exegesis and his functional stress on the union of Christ's natures as occurring in 'one common prosopon.'

Forensic Autopsy Cristoforo Pomara,Steven B. Karch,Vittorio Fineschi,2010-02-18 All too often, forensic pathologists perform autopsies that are limited only to the body parts that are suspect, leading to biased and inaccurate results. A correct diagnosis for cause of death can only be reached by a strict and systematic examination of the whole body. Providing a step-by-step, photo-assisted guide to complete autopsy procedures,

Women in Jazz Marie Buscatto,2021-12-30 *Women in Jazz: Musicality, Femininity, Marginalization* examines the invisible discrimination against female musicians in the French jazz world and the ways in which women thrive as professionals despite such conditions. The author shines a light on the paradox for women in jazz: to express oneself in a feminine way is to be denigrated for it, yet to behave in a masculine manner is to be devalued for a lack of femininity. This masculine world

ensures it is more difficult for women to be recognized as jazz musicians than it is for men - even when musicians, critics and audiences are ideologically opposed to discrimination. Female singers are confined by the feminine stereotypes of their profession, while female instrumentalists must comport themselves into traditionally masculine roles. The author explores the academic and professional socializations of these musicians, the musical choice they make and how they are perceived by jazz professionals as a result. First published in French by CNRS Editions in 2007 (and later reissued in paperback in 2018, with the author's postscript that nothing much has changed), *Women in Jazz: Musicality, Femininity, Marginalization* expands the conversation beyond the French border, identifying female jazz musicians as a discriminated minority all around the world.

Biology and Ecology of Pharmaceutical Marine Tunicates Ramasamy Santhanam, Santhanam Ramesh, 2019-10-10
The ocean is a source of unique natural products, mainly accumulated in living organisms. The c.4000 species of tunicates or sea squirts (Phylum, Chordata; Subphylum, Urochordata) are a high-potential yet under-studied source of bioactive compounds for pharmaceuticals. The secondary metabolites such as alkaloids isolated from these organisms have led to the discovery of an approved anti-tumor drug, anti-cancer drugs Yondelis® and Aplidin®, as well as many others in clinical trial. There is an urgent need for more research on the bioactive compounds of marine tunicates and better knowledge about the identification and biology of these species. This is the first focused book to meet this need. The taxonomy, common name, global distribution, habitat, diagnostic features and pharmaceutical compounds (along with their activities) of 165 key species of tunicates are given, with high-quality illustrations. Contributed by scientists of both Marine Biology and Pharmacy disciplines, this book will serve as a standard reference for researchers, teachers and students of Fisheries Science, Marine Biology, Life Sciences, Biotechnology, Natural Products, and Pharmacy, and as a valuable guide for pharmaceutical companies involved in the development of new drugs from marine organisms.

Fifteen years ago the love of her life, Danny Belfont, walked out on her three weeks before their wedding and she has never been able to fully get him out of her heart. Then, on the overnight ferry, Lara finds out that Danny is playing in the onboard band and he spots her in the crowd. Will she meet him the next night to

talk? As the wonderful city of Amsterdam works its magic on Lara, she tries to sort out her thoughts. And if fate has brought Lara and Danny back together ... is it really for love or for something quite different?

Comparative Federalism and Covid-19 Nico Steytler, 2021-10-27 This comprehensive scholarly book on comparative federalism and the Covid-19 pandemic is written by some of the world's leading federal scholars and national experts. The Covid-19 pandemic presented an unprecedented emergency for countries worldwide, including all those with a federal or hybrid-federal system of government, which account for more than 40 per cent of the world's population. With case studies from 19 federal countries, this book explores the core elements of federalism that came to the fore in combatting the pandemic: the division of responsibilities (disaster management, health care, social welfare, and education), the need for centralisation, and intergovernmental relations and cooperation. As the pandemic struck federal countries at roughly the same time, it provided a unique opportunity for comparative research on the question of how the various federal systems responded. The authors adopt a multidisciplinary approach to question whether federalism has been a help or a hindrance in tackling the pandemic. The value of the book lies in understanding how the Covid-19 pandemic affected federal dynamics and how it may have changed them, as well as providing useful lessons for how to combat such pandemics in federal countries in the future. This book will be of great interest to students and scholars of politics and international relations, comparative federalism, health care, and disaster management. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.
