Beyond Backpacker Tourism Kevin Hannam, Anya Diekmann, 2010 Building on previous work on backpacking, this book takes the analysis of backpacker tourism further by engaging both with new theoretical debates into tourism experiences and mobilities as well as with new empirical phenomena such as the rise of the 'flashpacker' and alternative destinations.

Implants in Qualitatively Compromised Bone Georg Watzek, 2004 Bone quality is one of the most important factors in the successful osseointegration of dental implants. However, the concepts of bone quality and compromised bone have never been well defined in the field of implant dentistry. To provide a clear definition of these terms, the contributors to this volume have compiled data from almost two decades of experimental and case studies, resulting in a comprehensive review of the current knowledge regarding the placement of implants in compromised bone. The book also presents specific considerations for placing implants in different types of compromised bone, such as aged, underdeveloped, and irradiated bone. A useful work of reference for implant students, practicing implant clinicians, and implant-oriented researchers.
