NAUTICAL ALMANAC FOR THE YEAR, 2019 GOVERNMENT PUBLICATIONS OFFICE., 2018 For over 150 years the United States Nautical Almanac Office has published The Nautical Almanac, first as part of the American Ephemeris and Nautical Almanac, and then on its own, to provide the US Navy with a convenient form of the astronomical data used for celestial navigation. This book is still the standard resource for marine celestial navigation for the U.S. Navy. The book is produced in collaboration with Her Majesty's Nautical Almanac Office, part of the U.K. Hydrographic Office. That Office maintains the copyright on the material it produces. The Nautical Almanac contains the following data tabulated at hourly intervals to a precision of 0.1 arcminute: the Greenwich hour angle and declination of the Sun, Moon, and navigational planets; the Greenwich hour angle of Aries; positions of the navigational stars; rise and set times of the Sun and Moon for a range of latitudes; and other data. Each edition also contains a sight reduction table; sight reduction formulas; and various correction tables for sight reduction. There is a useful concise sight reduction form at the back of the book. The Nautical Almanac is available several months in advance of its edition date.

Breast Oncoplasty and Reconstruction S.V.S. Deo,2023-12-09 The book covers the concepts, techniques and strategies of oncoplastic breast surgery and reconstruction for breast cancer patients. It includes contemporary surgical procedures with step-by-step illustrations, pre-operative and post-operative considerations, pearls and pitfalls shared from the personal experiences and surgical practices of the individual authors. Experienced authors with diverse backgrounds and an in-depth understanding of the domains are involved in curating the content of the book. This book mainly focuses on practical tips and surgical techniques to reach a broad spectrum of surgeons practicing breast surgery from low and middle-income countries. It provides both the scientific basis and practical tips from experienced surgeons in the field. Breast cancer is an emerging major public health problem in low and middle-income countries. While the surgical approach to breast cancer has witnessed a major shift from mastectomy to breast conservation, oncoplasty and reconstruction in western countries, the field of breast surgery is still evolving in low and middle-income countries. Barriers to adopting newer surgical approaches include socio-cultural factors, disease-related factors, resource-related factors and availability of expertise. This book fills the gap and helps surgeons in low and middle-income countries in adapting contemporary breast surgical techniques into their day-to-day practice. This book will be relevant for surgical oncologists, breast and endocrine surgeons, general surgeons practicing breast surgery and plastic surgeons. Additionally, it will serve as a resource book for residents and fellows from general surgery, surgical oncology, breast surgery and plastic surgery streams.
