Psychotherapy for Borderline Personality Disorder Anthony Bateman, Peter Fonagy, 2004 Borderline Personality

disorder is a severe personality dysfunction characterized by behavioural features such as impulsivity, identity disturbance, suicidal behaviour, emptiness, and intense and unstable relationships. Approximately 2% of the population are thought to meet the criteria for BPD. The authors of this volume - Anthony Bateman and Peter Fonagy - have developed a psychoanalytically oriented treatment to BPD known as mentalization treatment. With randomised controlled trials having shown this method to be effective, this book presents the first account of mentalization treatment for BPD. The first section gives an overview of BPD, including discussion of nosology, epidemiology, natural history, and psychosocial aetiology. It additionally summarises the present state of our research knowledge about effective psychotherapeutic treatments and use of medication. The second section outlines the authors' theoretical approach and contrasts it with other well known methods, including DBT, CAT, and CBT. In the extensive final section, the authors outline their clinical approach starting with how treatment is organised. A detailed account of the transferable features of the model is provided along with the main strategies and techniques of treatment. Numerous clinical examples are given to illustrate the core techniques and detailed information provided about how to apply aspects of the mentalization based treatment approach in everyday practice. Aimed at mental health professionals, along with counsellors, psychotherapists, and psychoanalysts, the book will be a valuable tool, providing an effective means of treating those suffering from Borderline Personality Disorder.

Organizational Communication Dennis K. Mumby, 2012-08-02 *Organizational Communication: A Critical Approach* is the first textbook in the field that is written from a critical perspective while providing a comprehensive survey of theory and research in organizational communication. The text familiarizes students with the field of organizational communication—historically, conceptually, and practically—and challenges them to reconsider their common sense understandings of work and organizations, preparing them for participation in 21st century organizational settings. Linking theory with practice, Mumby skillfully explores the significant role played by organizations and corporations in constructing our identities. The book thus provides important ways for students to critically reflect on their own relationships to work, consumption, and organizations.

The Routledge Handbook of Hispanic Applied Linguistics Manel Lacorte, 2014-09-19 This book provides a comprehensive overview of Hispanic applied linguistics, allowing students to understand the field from a variety of perspectives and offering insight into the ever-growing number of professional opportunities afforded to Spanish language program graduates. The goal of this book is to re-contextualize the notion of applied linguistics as simply the application of theoretical linguistic concepts to practical settings and to consider it as its own field that addresses language-based issues and problems in a real-world context. The book is organized into five parts: 1) perspectives on learning Spanish 2) issues and environments in Spanish teaching 3) Spanish in the professions 4) the discourses of Spanish and 5) social and political contexts for Spanish. The book's all-inclusive coverage gives students the theoretical and sociocultural context for study in Hispanic applied linguistics while offering practical information on its application in the professional sector.

Testing and Assessment in Translation and Interpreting Studies Claudia V. Angelelli, Holly E. Jacobson, 2009 *Testing and Assessment in Translation and Interpreting Studies* examines issues of measurement that are essential to translation and interpreting. Conceptualizing testing both as a process and a product, the collection of papers explores these issues across languages and settings (including university classrooms, research projects, the private sector, and professional associations). The authors have approached their chapters from different perspectives using a variety of methods, some focusing on very specific variables, and others providing a much broader overview of the issues at hand. Chapters range from a discussion of the measurement of text cohesion in translation; the measurement of interactional competence in interpreting; the use of a particular scale to measure interpreters' renditions to the application of a specific approach to grading or general program assessment (such as interpreter or translator certification at the national level or program admissions processes). These studies point to the need for greater integration of research and practice in the specific area of testing and assessment and are a welcome addition to the field.
