Vermoesen,2012-12-06 This book contains the proceedings of the '8th Nitrogen Workshop' which was held at the University of Ghent, Belgium, from 5 to 8 September 1994. Although nitrogen dynamics in different ecosystems have been studied for several decades, new orientations and other emphases have recently emerged. Previously, nitrogen was considered as an essential element mostly in terms of productivity, but now, more emphasis is attached to environmental consequences. More than 100 contributions in this book tackle recent developments within the fields of nitrogen advice systems, plant response to fertilization, immobilization and mobilization, nitrification, denitrification, leaching, ammonia volatilization and biological nitrogen fixation. A large number of papers is devoted to the formation of gaseous nitrogen compounds, while mineralization-immobilization is another topic of important interest. The book also contains the reports of discussion groups on different aspects of the nitrogen cycle.

When an angler team illegally catches a tarpon to feed it to sharks for attention, Doc enlists the kids of Sharks Inc.—Luke, Maribel, and Sabina—to uncover their scheme. Making It to the Forefront Neslihan Aydogan-Duda,2012-05-17 Nanotechnology, as shortly described as the study of manipulating matter on an atomic and molecular scale, is one of the most dynamic and promising industries, receiving a great deal of attention from researchers, business leaders, investors, and policymakers around the world. In Making It to the Forefront, Nesli Aydogan-Duda has assembled a distinguished group of authors to analyze the particular challenges and opportunities of nanotechnology emergence and management in the developing world. In so doing, they address the issues from several angles, ranging from cultural issues to capital markets, industrial clusters to government policy and legal structure. Drawing from in-depth research and case studies in Turkey, Latin America, India, China, and Iran, and a comparison with the development of the industry in the United states, the authors present a cross-cultural approach, with particular emphasis on the strategic nature of the nanotechnology industry for economic development, consumer welfare, and homeland security. Among the topics they consider are the importance of knowledge transfer from universities to the market and, more generally, the interface between science and its commercialization—and the institutional infrastructure that is necessary to maximize the potential of science and technology. In doing so, the authors provide unprecedented theoretical and empirical contributions to the study of nanotechnology, and, more generally, insight into the complex business, political, and cultural environment that must be established in order for such an industry to thrive in the context of a developing country.

International Human Rights and their Enforcement in Africa Kiwinda Mbondenyei, 2011-12-29 Whilst the establishment of the African human rights system was a good gesture that signalled the recognition of the value and essence of international human rights in the continent, a continuous study of the system has become necessary. This is particularly in light of the fact that the continent is in desperate need of well established and effective regional human rights enforcement mechanisms. At the moment, the regional human rights system is stuck between prospects and pitfalls because of the gap that exists between the promise of human rights and their actual realisation. By all means, this trend needs to be reversed. The main objective and purpose of this book is to underscore the challenges besetting the effective enforcement of international human rights law in Africa and the prospects and promises of an effective regional human rights system.

Human Rights Andrew Clapham, 2015 Focusing on highly topical issues such as torture, arbitrary detention, privacy, and discrimination, this book will help readers to understand for themselves the controversies and complexities behind human rights.

The African Charter of Human and Peoples' Rights Fatsah Ouguergouz, 2021-11-22 This work reveals the true dimension of the African Charter through a systematic analysis of its real or apparent innovations and a detailed assessment of the commitments of the States parties. It also analyzes the effectiveness of the mechanism put in place to monitor compliance with those commitments, examining the practice of the African Commission on Human and Peoples' Rights from its establishment in 1987. It incorporates major recent achievements in the field of the protection of human rights in Africa, including the creation of the African Court of Human and Peoples' Rights and the establishment of the African Union. This work is the expanded and updated English version of *La Charte africaine des droits de l'homme et des peuples - Une approche juridique des droits de l'homme entre tradition et modernité* (Presses Universitaires de France, Paris).

The African Human Rights System Vincent O. Nmehielle, 2021-09-13 This volume is a comprehensive treatment of the African human rights system in terms of the laws, practice, and institutions of the system. The volume discusses, analyzes, and evaluates normative instruments of the African system: the Charter of the Organization of the African Unity (OAU), and the African Charter on Human and Peoples' Rights, presenting article-by-article analysis of its provisions and those of the Protocol on the Establishment of the African Court on Human and Peoples' Rights. Similarly the OAU (now the African

Union), the African Commission on Human and Peoples' Rights, and the proposed African Court on Human Rights, as institutions of the system, are discussed. The book emphasizes a comparative approach and presents a summary of the UN, the European and the Inter-American human rights mechanisms with regard to their impact on the African system. The role of NGOs in the African system is also considered, as well as the controversial issue of human rights in pre-colonial and colonial Africa.

Revisiting the Origins of Human Rights Pamela Slotte, Miia Halme, 2015-09-11 Scholars of history, law, theology and anthropology critically revisit the history of human rights.
