STATISTICAL THEORY AND ANALYSIS IN BIOASSAY Uchenna Petronilla Ogoke, Ethelbert Chinaka

Nduka, 2021-08-21 Statistical Theory and Analysis in Bioassay is a seven chapter monograph tailored essentially to meet the needs of graduate students, practitioners and researchers in the fields of medicine, pharmacology, biosciences/life sciences and related fields that employs the tools of biostatistics in bioassays and analysis. In this wise, we have taken time to discuss in details relevant topics; principles, methods and applications. Practice exercises are also included where necessary. The earlier chapters give background information, definition of terms, purpose, types, structure and relative potency in bioassay. An important theorem, Fieller's theorem is proved in details with illustrative examples. The last two chapters are on dose-response relationship, fitting in parallelline assays and estimation. We are convinced that this monograph will meet the expectations of the readers while constructive criticisms that will improve another edition will be appreciated.

Essentials of Interventional Cancer Pain Management Amitabh Gulati, Vinay Puttanniah, Brian M. Bruel, William S.

Rosenberg, Joseph C. Hung, 2018-12-28 This text provides a comprehensive review and expertise on various interventional cancer pain procedures. The first part of the text addresses the lack of consistency seen in the literature regarding interventional treatment options for specific cancer pain syndromes. Initially, it discusses primary cancer and treatment-related cancer pain syndromes that physicians may encounter when managing cancer patients. The implementation of paradigms that can be used in treating specific groups of cancer such as breast cancer, follows. The remainder of the text delves into a more common approach to addressing interventional cancer pain medicine. After discussing interventional options that are commonly employed by physicians, the text investigates how surgeons may address some of the more severe pain syndromes, and covers the most important interventional available for our patients, intrathecal drug delivery. Chapters also cover radiologic options in targeted neurolysis and ablative techniques, specifically for bone metastasis, rehabilitation to address patients' quality of life and function, and integrative and psychological therapies. Essentials of Interventional Cancer Pain Management globally assesses and addresses patients' needs throughout the cancer journey. Written by experts in the field, and packed with copious tables, figures, and flow charts, this book is a must-have for pain physicians, residents, and

fellows.

The Invention of Africa V. Y. Mudimbe, 1988 What is the meaning of Africa and of being African? What is and what is not African philosophy? Is philosophy part of Africanism? These are the kind of fundamental questions which this book addresses. North America: Indiana U Press

Minimally Invasive Cancer Management Frederick L. Greene, B. Todd Heniford, 2013-03-14 As minimal access approaches to cancer diagnosis, staging, and therapy become more widely used, it is vital for general surgeons, along with laparoscopists, surgical oncologists and medical oncologists, to stay up to date. The editors, a team consisting of a renowned surgical oncologist and a laparoscopic specialist, aim to provide a resource for the practicing general surgeon using basic minimally invasive techniques. The book discusses diagnosis including biopsy with microinstrumentation, staging, and palliative and curative resection. Specific tumor sites are addressed, including esophagus, stomach, spleen, small bowel, pancreato-biliary, hepatic resection, and colo-rectal resection. Minimally invasive approaches to the thoracic and retroperitoneal areas are included. The book provides a thorough overview of basic cancer biology, instrumentation, and ultrasound. Additionally, Greene and Heniford explore controversial issues such as port-site recurrence and the effect of pneumoperitoneum on the spread of cancer cells in the abdomen. Many photographs and line drawings, including 16 in full color, illustrate the principles discussed in the text. A must-have for every practicing general surgeon, laparoscopic fellow, and general surgery resident.

Pediatric Dermatologic Surgery Keyvan Nouri, Latanya Benjamin, Jasem Alshaiji, Jan Izakovic, 2019-06-10 A complete guide to the surgical techniques used to treat childhood skin conditions Recent advances have expanded the role of pediatric dermatologic surgery in both specialist and primary care settings. However, such surgeries can pose unique challenges to trainees and experienced practitioners alike. Procedures are carried out under local anesthesia and can be a source of distress and concern among young patients. Moreover, child's skin poses its own set of complicating factors, making the business of performing these procedures especially delicate and precise. This book provides a step-by-step primer on invasive and non-invasive treatments of childhood skin disorders, offering concise and clearly illustrated guidance on current methods and best practices. Addressing conditions' effects, the impact of recent developments in their treatment, the ethics of operative procedures on children, and multiple treatment options for childhood dermatologic disease, *Pediatric Dermatologic Surgery* is an indispensable resource for trainee dermatologists and pediatricians, as well as practicing specialists.

Biochemistry and Molecular Biology of Parasites Joseph Marr, Miklos Muller, 1995-09-06 The study of parasitic organisms at the molecular level has yielded fascinating new insights of great medical, social, and economical importance, and has pointed the way for the treatment and prevention of the diseases they cause. *Biochemistry and Molecular Biology of Parasites* presents an up-to-date account of this modern scientific discipline in a manner that allows and encourages the

reader to place the biochemistry and molecular biology of these organisms in their biological context. The chapters are cross-referenced and grouped in an arrangement that provides a fully integrated whole, and permits the reader to create a composite of the biochemical function of these organisms. Individual chapter includes those devoted to metabolism, in both aerobic and anaerobic protozoa; antioxidant mechanisms; parasite surfaces; organelles; invasion mechanisms; and chemotherapy. The helminths are discussed not only from the point of view of their cellular biochemistry and metabolism, but also with respect to both their integrated functions such as neurochemistry, structure and functions of surfaces, and reproduction. Written by expert investigators, this book will be of interest to all experienced researchers, graduate students, and to the newcomer eager to become familiar with the biochemistry and molecular biology of parasites.

Skin of Color Andrew F. Alexis,Victoria H. Barbosa,2012-09-28 A concise practical guide to treatment and diagnosis of skin related disorders for skin of color patients.

Endocrinology of the Testis and Male Reproduction Manuela Simoni,Ippo T. Huhtaniemi,2017-09-18 This book provides a comprehensive overview of endocrinology of the male reproductive system, explaining how it works and how, sometimes, it fails to work. World-class specialists present state of the art knowledge on all aspects, including anatomy, physiology, molecular biology, genetics, pathophysiology, clinical manifestations of testicular diseases, endocrine aspects of andrological and sexual diseases, and therapy. Extensive consideration is given to sexual development, testicular function, the clinical approach to disorders of male reproduction, male hypogonadism, sexual dysfunction, and male infertility. In addition, sociodemographic, psychological, and ethical aspects of male reproductive disorders are discussed. The book is intended as a major reference for endocrinologists, andrologists, and sexologists, as well as basic and clinical scientists. It is published as part of the SpringerReference program, which delivers access to living editions constantly updated through a

dynamic peer-review publishing process.

Linguistic Ecology Peter Mühlhäusler, 2002-11-01 In this book, the author examines the transformation of the Pacific language region under the impact of colonization, westernization and modernization. By focusing on the linguistic and socio-historical changes of the past 200 years, it aims to bring a new dimension to the study of Pacific linguistics, which up until now has been dominated by questions of historical reconstruction and language typology. In contrast to the traditional portrayal of linguistic change as a natural process, the author focuses on the cultural and historical forces which drive language change. Using the metaphor of language ecology to explain and describe the complex interplay between languages, speakers and social practice, the author looks at how language ecologies have functioned in the past to sustain language diversity, and, at what happens when those ecologies are disrupted. Whilst most of the examples used in the book are taken from the Pacific and Australian region, the insights derived from this area are shown to have global applications. The text should be useful for linguists and all those interested in the large scale loss of human language.

International Handbook of Curriculum Research William F. Pinar, 2013-10-15 Continuing its calling to define the field and where it is going, the Second Edition of this landmark handbook brings up to date its comprehensive reportage of scholarly developments and school curriculum initiatives worldwide, providing a panoramic view of the state of curriculum studies globally. Its international scope and currency and range of research and theory reflect and contribute significantly to the ongoing internationalization of curriculum studies and its growth as a field worldwide. Changes in the Second Edition: Five new or updated introductory chapters pose transnational challenges to key questions curriculum research addresses locally. Countries absent in the First Edition are represented: Chile, Colombia, Cypress, Ethiopia, Germany, Iran, Luxembourg, Nigeria, Peru, Poland, Portugal, Singapore, South Africa, Spain, and Switzerland. 39 new or updated chapters on curriculum research in 34 countries highlight curriculum research that is not widely known in North America. This handbook is an indispensable resource for prospective and practicing teachers, for curriculum studies scholars, and for education students around the world.

The Norfolk Dialect Peter Trudgill, 2021-07-13 A number of volumes purport to explain the particular features of dialects found in the two counties of Norfolk and Suffolk. Of the two, the Norfolk dialect is perhaps the most well known, and often mimicked wrongly by those that believe it is just a matter in intonation or the use of a particular vocabulary. The Norfolk Dialect looks at the linguist history of the county stretching back to pre-Roman times, the influence of the Saxon and Viking invasions, and the creation of a distinct dialect within the new English language that emerged. It examines and illustrates the differences and similarities with the Suffolk dialect demonstrating that such relationships are caused by not only geographical proximity but also inaccessible divisions that pass through regions such as the Fens. The book discusses the development of dialect's vocabulary and grammar, how its origins follow similar patterns with other dialects spoken

throughout England and the origins of place-names and their pronunciation. Above all, the book shows that the Norfolk dialect is a version of the English language with its own fascinating history, unique structure and form that is worthy of respect and understanding, and, as such, needs to be maintained and cherished rather than lost to future generations.

Introductory Statistics 2e (hardcover, Full Color) Barbara Illowsky, Susan Dean, 2023-12-14 Book Publication Date: Dec 13, 2023. Full color. Introductory Statistics 2e provides an engaging, practical, and thorough overview of the core concepts and skills taught in most one-semester statistics courses. The text focuses on diverse applications from a variety of fields and societal contexts, including business, healthcare, sciences, sociology, political science, computing, and several others. The material supports students with conceptual narratives, detailed step-by-step examples, and a wealth of illustrations, as well as collaborative exercises, technology integration problems, and statistics labs. The text assumes some knowledge of intermediate algebra, and includes thousands of problems and exercises that offer instructors and students ample opportunity to explore and reinforce useful statistical skills.

Gender and the Violence(s) of War and Armed Conflict Stacy Banwell, 2020-10-16 The ebook edition of this title is Open Access, thanks to Knowledge Unlatched funding, and freely available to read online. Drawing on historical and contemporary case studies, this book delves into visual and text-based materials to unpack gender-based violence(s) perpetrated and experienced by both sexes within and beyond the conflict zone.

Nigeria's University Age Tim Livsey, 2017-11-13 This book explores the world of Nigerian universities to offer an innovative perspective on the history of development and decolonisation from the 1930s to the 1960s. Using political, cultural and spatial approaches, the book shows that Nigerians and foreign donors alike saw the nation's new universities as vital institutions: a means to educate future national leaders, drive economic growth, and make a modern Nigeria. Universities were vibrant places, centres of nightlife, dance, and the construction of spectacular buildings, as well as teaching and research. At universities, students, scholars, visionaries, and rebels considered and contested colonialism, the global Cold War, and the future of Nigeria. University life was shaped by, and formative to, experiences of development and decolonisation. The book will be of interest to historians of Africa, empire, education, architecture, and the Cold War.
